GRABBING A GOLDEN DREAM WITH GOLDEN GLOVES Does boxing teach anything besides how to club someone into submission? Can it transcend its sordid reputation and instill love, compassion and honor in Americas most troubled kids? In this raw yet uplifting memoir about amateur boxing, author Peter Wood tells of his begrudging return to a world he thought hed left behind. He steps back into the mud of boxing, coaching two troubled teens who dreamas he once didof becoming Golden Gloves champions.His compelling story moves far beyond the grunt and sweat of the local gym. It explores the classrooms of a suburban high school and digs through the remains of unhappy childhoods. Its a story about how boxing is a

way out, and how it cleanses the soul. This book brings the subculture of amateur boxing up close and weaves a powerful story of redemption, beating demons and battling for glory.

As daring and defiant as Kirk Douglas journeying "20,000 Leagues Under the Sea," there's no stopping diver Hawk Ridley as he takes the plunge into a briny world of untold riches and danger. The Caribbean is a fortune hunter's dream, salted with the gold of galleons long ago claimed by the deep. Now Hawk's headed for the Windward Passage of Haiti to stake his claim. But a rival team has also picked up the scent, and they're willing to turn the sea red with blood to get to the gold first. Fighting off ruthless competitors is nothing new to Hawk but fighting off a beautiful woman is a different story. Is she an innocent stowaway or a seductive saboteur? Between the cool millions lying on the bottom of the ocean, and the boiling - hot race to grab it, Hawk's about to find the answer and make a discovery "Twenty Fathoms Down" that will blow you out of the water. When it came to research, Hubbard was not one to head for the library. He always went to the source - in this case a U.S. navy deep - sea diver who agreed to show him the ropes and the danger. Hubbard admits it was daunting - even frightening - but he returned from the experience with all the first - hand knowledge he needed to fathom the true nature of life and death underwater. From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and

public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Auto Repair For Dummies

Every year around the globe, people cross paths with avalanches-some massive, some no deeper than a pizza box-often with deadly results. Avalanche expert Jill Fredston stalks these so-called freaks of nature, forecasting where and when they will strike, deliberately triggering them with explosives, teaching potential victims how to stay alive, and leading rescue efforts when tragedy strikes. Having spent decades trying to keep avalanches and people apart, Fredston brings them together unforgettably in *Snowstruck*. From a rare store of personal experience, she conveys a panorama of perspectives: a skier making what may prove his final decision, a victim buried so tightly that he can't move a finger, rescuers racing both time and weather, forecasters treading the line between reasonable risk and danger. Seamlessly interweaving these accounts, Fredston brings to life the awesome forces of nature that can turn the mountains deadly-and the equally inexorable forces of human nature that lure us time and again into treacherous terrain.

I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired

great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

On his 40th birthday, community college teacher Eldred Duker feels he's getting older faster and faster. Childless, he and his wife Marie visit the orphanage he and his now-estranged sister Anne lived in as small children and, as Marie has long wanted to do, end up adopting six-year-old Hope. Hope is sexually assaulted at age 16. Herself molested by one of their mother's male friends as a child, Anne comes for a visit to help. After Hope is on her own, Marie is killed in a car accident. Slowly

at first, Duke starts losing his grip on reality. He seeks revenge on the man whose vehicle killed Marie, looks for relief of his pain by taking a yoga class, falls in love with the instructor Rachel, marries her, sees his daughter Hope married to Dirk and helps Rachel bury her mother. During these years, Duke's judgment deteriorates. He causes a car accident that kills Rachel, starts drinking regularly and tracks down the man who killed Marie to forgive him and thus himself. Hope and Anne eventually realize that he is no longer capable of taking care of himself and place him in a Continuing Care Retirement Community. There, when ER tests given after he breaks a leg reveal that he has a fast-acting fatal disease, they move him back to his old home. Having separated from Dirk, Hope moves in to take care of him and arranges for hospice care. Along with her now-adult children, she and Anne attend his death.
