As we close in on the 40th anniversary of Woodstock '69, Co-creator and Promoter, Artie Kornfeld has decided to finally share his story. He tells of the events that prepared him to promote Woodstock, of his experience of organizing the musicians for the concert, preparing them before they went on stage, and of course, his own take on what Woodstock meant to his generation and what it continues to mean for all those who appreciate what occurred those three magical days in August 1969

Control of Communicable Diseases Manual

Cassie Lee Faith traveled to work on a Monday morning like she had hundreds of times before only this time fate had a much longer trip in store for her. Cassie found out she was one of an elite group of four very special people that would be known as The Offspring. There was a virus killing hundreds of lives on other planets and now the ones that controlled it threatened Earth. The Offspring were the only ones that could stop it. Being abducted by aliens and asked to do the impossible was almost the undoing of these special four people. Finding love was almost as hard as finding the hidden formula for the virus cure.

FEMA's Community Emergency Response Team (CERT) Basic Training Instructor Guide is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows you and others interested from your community to prepare for and

respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. The purpose of the CERT Basic Training is to provide you and others in your community who complete this course with the basic skills that they will need to respond to their community's immediate needs in the aftermath of a disaster, when emergency services are not immediately available. This course will be beneficial to individuals who desire the skills and knowledge required to prepare for and respond to a disaster. Instructors for these community courses usually range from skilled fire and rescue instructors that have completed the CERT Train-the Trainer course and are knowledgeable about the CERT model, different types of hazards that present greatest risks for communities, local building structures that may present greatest hazard in disaster events, community's emergency operation plans, and licensed Paramedics or Emergency Medical Technicians and nurses for providing hands-on knowledge relating to disaster medical operations Related items: FEMA's companion product-- CERT Basic Training Participant Manual can be found here: <https://bookstore.gpo.gov/products/sku/027-002-00627-5> Emergency Management & First Responders publications can be found here: <https://bookstore.gpo.gov/catalog/security-defense-law-enforcement/emerg> Audience: As each CERT is organized and trained in accordance with standard operating procedures developed by the sponsoring agency, its members select an Incident Commander/Team Leader (IC/TL) and an alternate and identify a meeting location, or staging area, to be used in the event of a disaster. This publication is ideal for the chosen IC/TL, and members of the CERT may want to consult this manual to understand the responsibilities of the IC/TL.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these

new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

This book is designed to accompany the Introduction to Salesforce Analytics - Building Reports and Dashboards class offered by Stony Point. A person reading this book or a student in this class will to build reports and dashboards utilizing basic and advanced concepts . Although the book is designed as a supplement to the class, it contains valuable exercises that will be useful for someone wishing to learn on their own. This online, five hour class is delivered by a live instructor and is specifically designed to teach administrators, business analysts or report writers how to utilize the basic and advanced analytic capabilities of Salesforce. A student in this class or reading this workbook will learn the basic Salesforce object model, and how to create and secure reports and dashboards. The instructor will lead students through exercises to create tabular, summary, matrix and join reports. Students will learn advanced reporting functionality such as charting, report summary fields, bucket fields, conditional highlighting, advanced report filters and building custom report types. Finally, the student will learn how to create and run dashboards and schedule and email reports and dashboards. Each student will be given a practice learning environment to participate in hands-on exercises during the class. The student will be able to use that learning environment indefinitely after the class without any additional fee. Stony Point is a leading provider of Salesforce training for sales people, customer service personnel, marketers, system administrators, developers and consultants. Stony Point delivers public and private classes virtually and in-person at locations throughout the world. Please visit www.stonyp.com for more information on the classes and services offered.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

The DoD Information Security Program is intended to harmonize and align processes to the maximum extent possible to promote information sharing, facilitate use of scarce resources, and simplify its management and implementation. SCI will be safeguarded in accordance with policies and procedures established by the DNI. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. If you like the service we provide, please leave positive review on Amazon.com. Without positive feedback from the community, we may discontinue the service and y'all can go back to printing these books manually yourselves. For more titles, visit www.usgovpub.com

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list

of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

DoD Information Security Program

Perhaps no state is as closely associated with the American frontier as Kansas. It was the heart of the Old West, with cow towns such as Wichita, Dodge City, Ellsworth and Abilene. Bringing cattle into those cow towns was the famous Chisholm Trail, which terminated in Kansas. The Santa Fe Trail crossed completely across Kansas, and the Oregon and Pony Express trails cut through the northeastern corner. Legendary cowboys floated into and out of Kansas cattle towns after the Civil War, including Wyatt Earp, Doc Holliday, Luke Short, Buffalo Bill Cody, Wild Bill Hickok and Bat Masterson. Frank James,

Jesse James (possibly) and Cole Younger participated in the Civil War attack on Lawrence, led by William Quantrill and "Bloody Bill" Anderson. The Civil War started in Kansas in the latter half of the 1850s, when Free-State and Pro-slavery forces fought a bloody series of battles now called "Bleeding Kansas." The most famous of all abolitionists, John Brown, fought in Kansas (and a lieutenant named J.E.B. Stuart interacted with him during "Bleeding Kansas"). During the Civil War, in addition to the attack on Lawrence by Quantrill's Raiders, Quantrill also attacked Baxter Springs, Kansas. And battles were fought at Marais des Cygnes and Mine Creek when Confederate general Sterling Price invaded Kansas in late 1864. Senator James Lane and Charles Jennison conducted irregular warfare in Kansas and western Missouri for the Union during the Civil War. During the Indian Wars, a series of forts protected settlers in Kansas from Indian attacks, including Fort Dodge, Fort Harker, Fort Hays, Fort Larned, Fort Leavenworth, Fort Riley and Fort Scott. Two of those forts - Fort Riley and Fort Leavenworth - are still active military bases. Two of the most famous generals of the Civil War for the Union were stationed in Kansas during the post-Civil War period - Philip Sheridan and George Armstrong Custer. This book will examine the period in the history of Kansas when it could legitimately be referred to as the "frontier," from about 1850-1900. We'll also look at what sites are still extant in Kansas from that period. I hope you enjoy this "Guide to Frontier Kansas."

AUTHOR'S NOTE: This book was originally published by Cerridwen Press in 2012. The current edition contains minor changes. Garath Melbourne, sixth Marquess of Blackbourne, survived Waterloo only to discover that the life awaiting him back in England was anything but peaceful. In addition to dealing with properties left in disarray by his late father, he feels honor bound to locate the child of his friend who died at Waterloo. Garath is the boy's guardian, and he's determined to protect the young earl from the influences of his merchant-class mother. Amanda may have been born into the merchant class, but her father had ensured that her education was as genteel as that of any noblewoman in the kingdom. Now a widow, Amanda is determined to protect her young son from the excesses of his father's world. To her horror, she discovers her late husband has appointed a guardian for her son-the disreputable Marquess of Blackbourne who is obviously a danger to her plans and to her resolution to avoid entanglement with another nobleman.

Cert Basic Training Instructor's Guide

Part 2 of 2 Today we are releasing Version 2 of the CFPB Supervision and Examination Manual, the guide our examiners use in overseeing companies that provide consumer financial products and services. Our manual, originally released in October 2011, describes how the CFPB supervises and examines these providers and gives our examiners direction on how to determine if companies are complying with consumer financial protection laws. We updated the supervision manual to reflect the renumbering of the consumer financial protection regulations for which the CFPB is responsible. The numbering conventions in the Code of Federal Regulations (CFR) allow the reader to easily identify which regulations fall under a particular agency's responsibility. The renumbering incorporated throughout the manual reflects the Dodd-Frank Act of 2010 transfer of rulemaking responsibility for many consumer financial protection regulations from other Federal agencies to the CFPB. In December 2011, the CFPB published its renumbered regulations in the Federal Register. The renumbered regulations also included certain technical changes but no substantive changes. The CFPB's renumbering reflects the codification of its regulations in Title 12 (Banks and Banking), Chapter X (Bureau of Consumer Financial Protection) of the CFR. For example, before July 21, 2011, the Federal Reserve had rulemaking authority for the Home Mortgage Disclosure Act, which was codified in Title 12, Chapter II (Federal Reserve System), Part 203. The CFPB's implementing regulation for the Home Mortgage Disclosure Act is now codified in Title 12, Chapter X, Part 1003.
