The Fault in Our Stars

The Chicago Teachers Union strike was the most important domestic labor struggle so far this century—and perhaps for the last forty years—and the strongest challenge to the conservative agenda for restructuring education, which advocates for more charter schools and tying teacher salaries to standardized testing, among other changes. In 2012, Chicago teachers built a grassroots movement through education and engagement of an entire union membership, taking militant action in the face of enormous structural barriers and a hostile Democratic Party leadership. The teachers won massive concessions from the city and have become a new model for school reform led by teachers themselves, rather than by billionaires. Strike for America is the story of this movement, and how it has become the defining struggle for the labor movement today. From the Trade Paperback edition.

“A brisk, captivating and expertly crafted reconstruction of a community living through a time of fear. Masterful.” —Washington Post
The arsons started on a cold November midnight and didn’t stop for months. Night after night, the people of

Accomack County waited to see which building would burn down next, regarding each other at first with compassion, and later suspicion. Vigilante groups sprang up, patrolling the rural Virginia coast with cameras and camouflage. Volunteer firefighters slept at their stations. The arsonist seemed to target abandoned buildings, but local police were stretched too thin to surveil them all. Accomack was desolate—there were hundreds of abandoned buildings. And by the dozen they were burning. “One of the year’s best and most unusual true-crime books” (Christian Science Monitor), *American Fire* brings to vivid life the reeling county of Accomack. “Ace reporter” (Entertainment Weekly) Monica Hesse spent years investigating the story, emerging with breathtaking portraits of the arsonists—troubled addict Charlie Smith and his girlfriend, Tonya Bundick. Tracing the shift in their relationship from true love to crime spree, Hesse also conjures the once-thriving coastal community, decimated by a punishing economy and increasingly suspicious of their neighbors as the culprits remained at large. Weaving the story into the history of arson in the United States, the critically acclaimed *American Fire* re-creates the anguished nights this quiet county lit up in flames, evoking a microcosm of rural America—a land half-gutted before the fires began.

Engines of Change

A narrative like no other: a cultural history that explores how cars have both propelled and reflected the American experience— from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America’s history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize-winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and tales behind them: Robert McNamara’s unlikely role in Lee Iacocca’s Mustang, John Z. DeLorean’s Pontiac GTO , Henry Ford’s Model T, as well as Honda’s Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car’s unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, *Engines of Change* is an entirely edifying new way to look at the American story.

The Maldives is a small and beautiful archipelago south of India, more renowned for luxury resorts than experiments in democracy. It is a country of contradictions, where tourists sip cocktails on the beach while on nearby islands local women are flogged for extramarital sex and blackmarket vodka costs \$140 a bottle. Until 2008 the Maldives also hosted Asia's longest-serving dictator, Maumoon Abdul Gayoom. A former political prisoner, Mohamed Nasheed, an environmental activist, journalist, and politician, brought Gayoom's thirty-year autocracy to a sudden end, in the Maldives' first democratic elections. Young, progressive and charismatic, President Nasheed thrust the Maldives into the spotlight as a symbol of the fight against climate change and the struggle for democracy and human rights in one of the world's strictest Islamic societies. But dictatorships are hard to defeat, enduring in a country's institutions and the minds of people conditioned to autocracy over three decades. Democracy brought turmoil, protests, violence and intense political polarization. The ousted dictatorship overthrew Nasheed's government in February 2012, supported by Islamic radicals and mutinying security forces. Amid Byzantine intrigue, the fight for democracy was just beginning.

When Bloomberg News invited the young American journalist Alex Cuadros to report on Brazil's emerging class of billionaires at the height of the historic Brazilian boom, he was poised to cover two of the biggest business stories of our time: how the giants of the developing world were taking their place at the center of global capitalism, and how wealth inequality was changing societies everywhere. The billionaires of Brazil and their massive fortunes resided at the very top of their country's economic pyramid, and whether they quietly accumulated exceptional power or extravagantly displayed their decadence, they formed a potent microcosm of the world's richest .001 percent. They held sway over the economy, government, media, and stewardship of the environment; they determined the spiritual fates and populated the imaginations of their countrymen. In 2012, Eike Batista ranked as the eighth-richest person in the world, was famous for his marriage to a beauty queen, and was a fixture in the Brazilian press. But by 2015, Batista was bankrupt, his son Thor had been indicted for manslaughter, and Brazil--its president facing impeachment, its provinces combating an epidemic, and its business and political class torn apart by scandal--had become a cautionary tale of a country run aground by its elites. Over four years, Cuadros reported on media moguls and televangelists, energy barons and shadowy figures from the years of military dictatorship, soy barons who lived on the outskirts of the Amazon, and new-economy billionaires spinning money from speculation. His zealous reporting takes us from penthouses to courtrooms, from favelas to art fairs, from scenes of unimaginable wealth to desperate, massive street protests. Within a business narrative that deftly dramatizes the volatility of the global economy, Cuadros offers us literary journalism with a grand sweep.--Adapted from dust jacket.

Ruminations from the Minivan

Dan Zevin, master of "Seinfeld-ian nothingness" (Time), is trying his best to make the transition from couplehood to familyhood. Acclimating to the adult-oriented lifestyle has never been his strong suit, and this slice-of-midlife story chronicles the whole hilarious journey--from instituting date night to joining Costco; from touring Disneyland to recovering from knee surgery; from losing ambition to gaining perspective. Where it's all heading is anyone's guess, but, for Dan, suburbia's calling--and his minivan has GPS. -- Jacket, p. [2].

East of the West

A New York Times contributor offers a radical reexamination of a hot-button issue

of the mother and son relationship and advocates the end of the "mama's boy" taboo. New York Times contributor Kate Stone Lombardi unveils the surprisingly close relationship between mothers and sons. Mother after mother confessed to Lombardi that her husband, brothers, and even female friends and family criticize the fact that she is "too close" to her sons. Many of these women are often startled by the strong connection they feel with their sons; but rarely do they talk about it because society tells them to push their little boys away and not "baby" them with too much cuddling and comforting. It is as if there were an existing playbook-based on gender preconceptions dating back to Freud, Oedipus, and beyond-that prescribes the way mothers and their sons should interact. Lombardi's much-needed narrative is the first and only book to share truly revealing interviews with mothers who have close relationships with their sons, as well as interviews with these women's sons and husbands. Lombardi persuasively argues that the rise of the new male-one who is more emotionally intelligent and more sensitive without being less "manly"-is directly attributable to women who are rejecting the "mama's boy" taboo. Highlighting new scientific studies, *The Mama's Boy Myth* begins a fresh story-one that will be welcomed by mothers, fathers, and sons alike.

The Better Angels of Our Nature

Politicians, voters, executives, and employees all want the answer to one question: How can America compete with cheap foreign labor, and restore skilled, well-paying jobs to our economy? *American Drive* answers that question. An executive with nearly thirty years in the trenches of the hard-nosed Detroit automobile industry, Richard E. "Dick" Dauch had long dreamed of running his own manufacturing company. From his first job on the plant floor at General Motors to his crucial role in helping to rescue Chrysler from the brink of bankruptcy, Dauch focused passionately, and relentlessly, on quality, productivity, and flexibility in manufacturing. In 1993 he took on the challenge of his life, buying a lagging axle supply and parts business from GM, along with five rusting, unprofitable, union-controlled, near-decrepit plants in the heart of a crime-ridden Detroit and a deteriorating environment in Buffalo, New York. The newly created "stand-alone" company was named American Axle and Manufacturing. Dauch set out to create a world-class industrial automotive manufacturer. He bought and bulldozed the crack, liquor, and prostitution businesses that surrounded the company and rebuilt the plants. He upward educated, trained, and expanded the skill sets of the workforce, struck tough bargains with unions, and solved massive quality problems that were costing tens of millions every year and undermining customer satisfaction. Within one year of opening the doors, AAM had turned an astounding \$66 million in profit. In *American Drive*, Dauch narrates the story of AAM against the backdrop of his nearly fifty years in the auto industry, from its glory days to its decline in the face of foreign competition, government bailouts, battles with unions, and the recent Great Recession. Tough, smart, inspiring, high-energy, and opinionated, Dauch offers memorable lessons on leadership, advanced product technology, communication, negotiation, and making profits in the most difficult times. Dauch's story transcends the auto industry and draws a blueprint for job creation, manufacturing competitiveness, economic growth, and excellence in America.

The Maldives

Given the advanced state of digital technology and social media, one would think that the Democratic and Republican Parties would be reasonably well-matched in terms of their technology uptake and sophistication. But as past presidential campaigns have shown, this is not the case. So what explains this odd disparity? Political scientists have shown that Republicans effectively used the strategy of party building and networking to gain campaign and electoral advantage throughout the twentieth century. In *Prototype Politics*, Daniel Kreiss argues that contemporary campaigning has entered a new technology-intensive era that the Democratic Party has engaged to not only gain traction against the Republicans, but to shape the new electoral context and define what electoral participation means in the twenty-first century. *Prototype Politics* provides an analytical framework for understanding why and how campaigns are newly "technology-intensive," and why digital media, data, and analytics are at the forefront of contemporary electoral dynamics. The book discusses the importance of infrastructure, the contexts within which technological innovation happens, and how the collective making of prototypes shapes parties and their technological futures. Drawing on an analysis of the careers of 629 presidential campaign staffers from 2004-2012, as well as interviews with party elites on both sides of the aisle, *Prototype Politics* details how and why the Democrats invested more in technology, were able to attract staffers with specialized expertise to work in electoral politics, and founded an array of firms to diffuse technological innovations down ballot and across election cycles. Taken together, this book shows how the differences between the major party campaigns on display in 2012 were shaped by their institutional histories since 2004, as well as that of their extended network of allied organizations. In the process, this book argues that scholars need to understand how technological development around politics happens in time and how the dynamics on display during presidential cycles are the outcome of longer processes.

Dad's Guide to Twins

From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler—its products, people, and performance over time—with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto

racing to defense production to real estate. Throughout, the colorful personalities of its leaders-including Chrysler himself and Lee Iacocca-emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.

American Drive

The story of how Chrysler's minivan team created an automobile that captured the 1995 Motor Trend Car of the Year and other major awards - and reinvented a perilously entrenched corporation in the process - is as dramatic and inspiring a story as any in business today. Brock Yates, one of the most respected writers in the auto world, was given unprecedented access to Chrysler - every planning session, presentation, budget review, test drive, assembly line start-up, and marketing launch. The result is a book that unveils the mysteries of modern car-making, revealing how cars are shaped through countless interlinked decisions ranging from size and power to door configurations, color selections, and innumerable other interconnected details. It also captures the complex process by which the thousands of separate pieces that make up a car are designed, tested, manufactured, and marshaled into place at the exact moment they are needed. For any reader who cares about cars, this is the most intriguing look inside the mysteries of their creation ever written. At the same time, The Critical Path recounts an extraordinary drama of all-too-human managers attempting to make something new, in a new way, inside a corporate culture that resists them at every turn. The story of how Chrysler's minivan platform team kept their commitment to quality, schedule, and budget - with a \$3 billion investment and the company's fate palpably in the balance - is as encouraging a tale as has emerged from American

business in years. The unprecedented triumph and Chrysler's resultant comeback is a lesson in successful management that will be savored by any reader interested in how great companies make breakthrough products.

Jeep has maintained its popularity by updating and modernizing the traditional two-door, removable-top Jeep without watering down its off-road capability. Jeep owners love to personalize their vehicles and modify them for better performance on and off road. In High-Performance Jeep Wrangler TJ Builder's Guide, author Christian Lee explains how to upgrade your Wrangler's suspension, axles, differentials, engine, transfer case, wheels and tires, skid plates, and more, using aftermarket and salvage-yard upgrades. This book includes over 300 full-color images and drawings to show beginners and experienced Jeepers how to do things right. Lee even has special sections for basic driving and recovery technique, and a few built-up Jeeps to give you ideas for your own Wrangler.

Up until now, Hannah has happily devoted her entire life to ballet. But when she meets a handsome musician named Jacob, Hannah's universe begins to change, and she must decide if she wants to compete against the other "bunheads" in the company for a star soloist spot or strike out on her own in the real world. Does she dare give up the gilded confines of the ballet for the freedoms of everyday life?

Dan Gets a Minivan

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

But when a gorgeous plot twist named Augustus Waters suddenly appears at Cancer Kid Support Group, Hazel's story is about to be completely rewritten. Insightful, bold, irreverent, and raw, *The Fault in Our Stars* brilliantly explores the funny, thrilling, and tragic business of being alive and in love.

The Critical Path

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's *Car Talk* declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

INCLUDING AN EXCLUSIVE CONVERSATION BETWEEN MERYL STREEP AND ANNA QUINDLEN "[Quindlen] serves up generous portions of her wise, commonsensical, irresistibly quotable take on life. . . . What Nora Ephron does for body image and Anne Lamott for spiritual neuroses, Quindlen achieves on the home front."—NPR In this irresistible memoir, Anna Quindlen writes about a woman's life, from childhood memories to manic motherhood to middle age, using the events of her life to illuminate ours. Considering—and celebrating—everything from marriage, girlfriends, our mothers, parenting, faith, loss, to all the stuff in our closets, and more, Quindlen says for us here what we may wish we could have said ourselves. As she did in her beloved *New York Times* columns, and in *A Short Guide to a Happy Life*, Quindlen uses her past, present, and future to explore what matters most to women at different ages. Quindlen talks about Marriage: "A safety net of small white lies can be the bedrock of a successful marriage. You wouldn't believe how cheaply I can do a kitchen renovation." Girlfriends: "Ask any woman how she makes it through the day, and she may mention her calendar, her to-do lists, her

babysitter. But if you push her on how she really makes it through her day, she will mention her girlfriends. " Our bodies: "I've finally recognized my body for what it is: a personality-delivery system, designed expressly to carry my character from place to place, now and in the years to come." Parenting: "Being a parent is not transactional. We do not get what we give. It is the ultimate pay-it-forward endeavor: We are good parents not so they will be loving enough to stay with us but so they will be strong enough to leave us." Candid, funny, and moving, *Lots of Candles, Plenty of Cake* is filled with the sharp insights and revealing observations that have long confirmed Quindlen's status as America's laureate of real life. Auto Repair For Dummies

A brilliant debut from a rising talent praised by Salman Rushdie, among others. A grandson tries to buy the corpse of Lenin on eBay for his Communist grandfather. A failed wunderkind steals a golden cross from an orthodox church. A boy meets his cousin (the love of his life) once every five years in the waters of the river that divides their village into East and West. These are some of the strange, unexpectedly moving events in talented newcomer Miroslav Penkov's vision of his home country, Bulgaria, and they are the stories that make up his extraordinary debut collection. In *East of the West* Penkov writes with great empathy about 800 years of tumult in troubled Eastern Europe; his characters mourn the way things were and long for things that will never be. But even as the characters wrestle with the weight of history, the debt to family, and the pangs of exile, the stories themselves are light and deft, animated by Penkov's unmatched eye for the absurd. In 2008, Salman Rushdie chose Penkov's story "Buying Lenin" (which appears in this collection) for that year's Best American Short Stories, citing its

heart and humour. East of the West reveals the full realization of the brilliant potential that Rushdie recognized. From the Trade Paperback edition.

People I Want to Punch in the Throat

In 1989, prior to the normalization of diplomatic relations between the U.S. and Vietnam, Alison Krupnick was holed up in a seedy Ho Chi Minh City hotel, hiding from people desperate for visas to resettle in the U.S. Fifteen years later, she was holed up alone in her minivan, furiously scribbling stories on a notepad at every red traffic light. The story of Alison’s transformation from world traveling diplomat to minivan-driving mom is chronicled in *Ruminations from the Minivan: Musings from a World Grown Large, then Small*. A warm and funny story of inspiration and ambition, international intrigue, mothers and daughters, food, family, writing and travel, *Ruminations from the Minivan* will take you on the trip of a lifetime.

Brazillionaires

This is the story of six extraordinary men who each built something from nothing, redefined the automotive industry after World War II, and redirected its course for the future: Henry Ford II (visionary autocrat with an iron will), Shoichiro Honda (most successful automotive entrepreneur since Henry Ford I), Eberhard von Kuenheim (founder of the modern BMW), Lee Iacocca, Ferdinand Piech (builder of Volkswagen Group) and Robert Lutz (who left retirement at 70 and is still highly influential at General Motors). What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world. They not only re-shaped the auto business, the six made a sizable dent in the societies they lived in. To a man they were great cognitive thinkers. Their minds worked with animal speed, even instinct speed. But more than anything these were brave and cantankerous souls who rode the waves of history. Each could see the future. They could just make it out-sometimes imperfectly, but could see it nonetheless. They took a business that had begun to mature and decline by the 1930s and found ways to make it fresh and whole again.- The compelling story of the global car business over the past half-century.- A lively and engaging narrative that recounts some times collaborative, sometimes archly antagonistic interactions among the men- Full of business revelations at the highest level, written by a journalist operating at the heart of the industry- Global appeal that shows how automotive groups in the USA, Europe and Asia have influenced each other- A business story interlaced with personal details that explains why the six were determined to be successful. --Publisher.

Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis is on the street level. Storefronts, first floor apartments, and sidewalks are the most immediate and common experience of a city. These "plinths" are the ground floors that negotiate between inside and outside, the public and private spheres. The City at Eye Level qualitatively evaluates plinths by exploring specific examples from all over the world. Over twenty-five experts investigate the design, land use, and road and foot traffic in rigorously researched essays, case studies, and interviews. These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design, but also the concerns of urban communities. The editors have put together a comprehensive guide for anyone concerned with improving or building plinths, including planners, building owners, property and shop managers, designers, and architects.

Billy Lynn's Long Halftime Walk

NATIONAL BESTSELLER A debut collection of witty, biting essays laced with a surprising warmth, from Jen Mann, the writer behind the popular blog People I Want to Punch in the Throat People I want to punch in the throat: • anyone who feels the need to bling her washer and dryer • humblebraggers • people who treat their pets like children Jen Mann doesn't have a filter, which sometimes gets her in trouble with her neighbors, her fellow PTA moms, and that one woman who tried to

sell her sex toys at a home shopping party. Known for her hilariously acerbic observations on her blog, *People I Want to Punch in the Throat*, Mann now brings her sharp wit to bear on suburban life, marriage, and motherhood in this laugh-out-loud collection of essays. From the politics of joining a play group, to the thrill of mothers' night out at the gun range, to the rewards of your most meaningful relationship (the one you have with your cleaning lady), nothing is sacred or off-limits. So the next time you find yourself wearing fuzzy bunny pajamas in the school carpool line or accidentally stuck at a co-worker's swingers party, just think, What would Jen Mann do? Or better yet, buy her book. Advance praise for *People I Want to Punch in the Throat* "People I Want to Punch in the Throat is so good that it'll make you want to adopt all the cats in the world. I'm not sure about the correlation, but it's that good. It should come with a warning."—Jenny Lawson, author of *Let's Pretend This Never Happened* "Jen Mann has an amazing way of telling stories that will make you cringe and burst out laughing at the same time. From swinger parties to racist toddlers, she makes the suburbs unbelievably funny."—Karen Alpert, author of *I Heart My Little A-Holes* "Jen Mann says the things we're all too afraid to say. Her honest and hilarious writing style reminds me of David Sedaris and Tina Fey."—Robin O'Bryant, author of *Ketchup Is a Vegetable: And Other Lies Moms Tell Themselves* "Jen Mann's shrewd and unrelenting assault on the absurdity of suburban life is an honest peek into the occasional nightmare that is part of living the American dream. I love Jen. I wish she was my neighbor. It's so refreshing to know that I'm not the only one who wants to punch almost everyone in the f***ing throat."—Nicole Knepper, author of *Moms Who Drink And Swear From the Trade* Paperback edition.
