This volume explores the opportunities and challenges facing the accounting profession in an increasingly globalized business and financial reporting

environment. It looks back at past experiences of the profession in attempting to meet its public interest obligation. It examines the role and responsibilities of accounting to society including regulatory requirements, increased emphasis on corporate social responsibility, accounting fraud and whistle-blowing implications, internationalization of public interest obligations, and providing the education needed to be successful. The book incorporates an ethical dimension in making these assessments. Its focus is a conceptual, theoretical one drawing on classical philosophy, the sociology of professions, economic theory, and the public interest dimension of accountants as professionals. The authors of papers are long-time contributors to the annual symposium on Research in Accounting Ethics sponsored by the Public Interest Section of the AAA.

### **Fundamental Accounting**

Financial accounting is undergoing a period of unprecedented change. The FASB and IASB have been working together to issue converged accounting standards that will dramatically change key reporting areas, and more generally have sought to converge accounting standards over time. In late 2011, the SEC will announce its decision on whether large public companies in the U.S. will be able to choose whether to report under U.S. GAAP or IFRS or if all companies are anticipated to be reporting under IFRS in the near future. So, while there currently is considerable overlap between U.S. GAAP and IFRS, and that overlap is increasing as convergence continues, important differences remain. To help instructors deal with the challenging environment, the Spiceland team is committed to providing current, comprehensive and clear coverage of intermediate accounting. The 7th edition reflects this commitment with the following innovations.
