From Afrim Pristine, the internationally-renowned maître fromager of the Cheese Boutique, comes a cookbook and all-encompassing cheese guide featuring everyone's favorite ingredient. Afrim Pristine may possess the most distinguished professional title a cheesemonger could ask for--maître fromager--but if you ask him what business he's in, he'll tell you he sells happiness. That's because cheese is inextricably linked to wonderful memories and celebrations for so many of us. No matter the occasion, cheese and cheesy dishes are always greeted with a smile. In his first cookbook, Afrim is here to teach you the basics of more than 55 cheeses. You'll learn about the best ways to buy and store cheese, how to pair different cheeses with different beverages and how to create the cheese board of your dreams. And with his signature sense of humor and warmth, Afrim offers 60 easy and enticing recipes for every mealtime, including a bonus chapter called Low Risk, High Reward, for those moments when you're looking to simply eat cheese with the perfect accompaniment. Alongside Afrim's best dishes are 20 masterpieces from the world's top chefs--everyone from Daniel Boulud, Claudio Aprile, Anthony

Walsh, and Rob Gentile to Chuck Hughes, Anna and Michael Olson, Bob Blumer and more. With personal anecdotes and helpful information, creative and delicious recipes, and beautiful photography, For the Love of Cheese is sure to bring joy to your kitchen and your heart.

Contingencies and crises arrive with many names - natural disasters, accidents, terrorist actions, war, and military operations other than war. In colloquial English, a contingency is something that can happen, but that generally is not anticipated, while a disaster is generally defined by the outcome of a specific contingency. Hurricanes, tornados, earthquakes and successful terrorist attack are generally disastrous when they impact our installations or local community. Disasters are not measured by the chain of results, only the final impact. Who/What was hurt, damaged, destroyed or lost and how long will it take to restore full mission capabilities? Only rarely, can humans prevent them or control their intensity. However, we can minimize their effects and should always be ready to respond through the development of various contingency plans. A contingency plan is a set of procedures prepared in advance to respond to specific or multiple contingencies

the base and unit may face. Many plans fail due to restrictive thinking-" that's never happened"-and for failure to think outside the box. A good plan is tailored to the base or unit specific situation and looks at contingencies and second to third order effects. Likewise, a good plan does not look so far outside the box that it includes things that will not happen or is too unwieldy. For instance, if assigned to Ellsworth AFB, South Dakota, a plan is not required for hurricanes or tidal waves, but would include winter storms that bases in tropical areas would not consider. By anticipating problems and planning for them, the base and unit can rapidly mobilize the technical, financial, administrative, and engineering resources needed to minimize detrimental impact to the base. For CE units to respond effectively to emergencies, contingencies and disasters, procedures and plans must be in place when the incident occurs. Effective post disaster or post-attack response begins with planning and base preparations well before a crisis threatens. The chaotic environment following a disaster or an attack is not the time or place to begin thinking about how to respond. This pamphlet will help you plan for contingencies and disasters and lay out ways to minimize their impact on the mission and the personnel at your installation. This pamphlet supports AFI 10-210, Prime Base Engineer Emergency Force Program and AFI 10-211, Civil Engineer Contingency Response Planning. It discusses contingencies for which civil engineers must be prepared. It contains practical information to help unit-level civil engineers plan their responses to contingencies, disasters, war, and other military operations. It explains how to identify requirements and get resources; to organize civil engineer

response teams; and to train and exercise those teams. It concludes by presenting a brief history of Air Force Civil Engineers. It applies to all Civil Engineers, including Air National Guard (ANG) units and Air Force Reserve Command (AFRC).

The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt

The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

Over the past 20 years European theatre underwent fundamental changes in terms of aesthetic focus, institutional structure and in its position in society. The impetus for these changes was provided by a new generation in the independent theatre scene. This book brings together studies on the state of independent theatre in different European countries, focusing on the fields of dance and performance, children and youth theatre, theatre and migration and post-migrant theatre. Additionally, it includes essays on experimental musical theatre and different cultural policies for independent theatre scenes in a range of European countries.

This book provides a comprehensive review of the major barriers to HIV cure and vaccine. It covers the fundamental virology and immunology leading to HIV transmission, protection from infection and long term HIV persistence on antiretroviral therapy. In addition, strategies being tested to eliminate persistent HIV and the rational design of vaccines to induce protective immunity are covered. This book also discusses the challenges related to the design of clinical trials for testing the safety and efficacy of these innovative approaches. This book will provide a systematic overview and also discuss controversial issues for researchers

in virology and immunology, as well as practicing physicians, and scientists in the pharmaceutical industry.

Rural movements have recently emerged to become some of the most important

social forces in opposition to neoliberalism. From Brazil and Mexico to Zimbabwe and the Philippines, rural movements of diverse political character, but all sharing the same social basis of dispossessed peasants and unemployed workers, have used land occupations and other tactics to confront the neoliberal state. This volume brings together for the first time across three continents - Africa, Latin America and Asia - an intellectually consistent set of original investigations into this new generation of rural social movements. These country studies seek to identify their social composition, strategies, tactics, and ideologies; to assess their relations with other social actors, including political parties, urban social movements, and international aid agencies and other institutions; and to examine their most common tactic, the land occupation, its origins, pace and patterns, as well as the responses of governments and landowners. At a more fundamental level, this volume explores the ways in which two decades of neoliberal policy - including new land tenure arrangements intended to hasten the commodification of land, and new land uses linked to global markets -- have undermined the social reproduction of the rural labour force and created the conditions for popular resistance. The volume demonstrates the longer-term potential impact of these movements. In economic terms, they raise the possibility of tackling immiseration by means of the redistribution of land and the reorganisation of production on a more efficient and socially responsible basis. And in political terms, breaking the power of landowners and transnational capital with interests in land could ultimately open the way to an alternative pattern of capital accumulation and

development.

This edited volume maps the development of the use of political campaigning and marketing techniques in countries of the former Communist Bloc over the last thirty years. Focusing on the shift from propaganda to political marketing, and from manipulation to persuasion, the book consists of a series of case studies of countries in Central Europe, Eastern Europe, the Baltics, and the Balkans that outline the history, development and current state of political marketing in each country. The authors explore political parties and their behaviour ahead of elections, and show the changes in political culture and practices that parties have undergone in order to create more or less successful campaigns.

This report presents the recommendations of a WHO Expert Committee commissioned to coordinate activities leading to the adoption of international recommendations for the production and control of vaccines and other biological

substances, and the establishment of international biological reference materials. Following a brief introduction, the report summarizes a number of general issues brought to the attention of the Committee. The next part of the report, of particular relevance to manufacturers and national regulatory authorities, outlines the discussions held on the development and adoption of new and revised WHO Recommendations, Guidelines and guidance documents. Following these discussions, WHO Recommendations to assure the quality, safety and efficacy of recombinant hepatitis E vaccines; WHO Guidelines for the safe development and production of vaccines to human pandemic influenza viruses and influenza viruses with pandemic potential; and WHO Guidelines for the safe production and quality control of poliomyelitis vaccines were adopted on the recommendation of the Committee. In addition, a WHO questions-and-answers guidance document on the evaluation of similar biotherapeutic product (SBPs) was also adopted with the Committee recommending that it be posted on the WHO website. Subsequent sections of the report provide information on the current status, proposed development and establishment of international reference materials in the areas of: antibiotics; blood products and related substances; cellular and gene therapies; in vitro diagnostics; standards for use in public health emergencies; and vaccines and related substances. A series of annexes are then presented which include an updated list of all WHO Recommendations, Guidelines and other documents on biological substances used in medicine (Annex 1). The above three WHO documents adopted for publication on the advice of the Committee are then

presented as part of this report (Annexes 2-4). Finally, all additions and discontinuations made during the 2018 meeting to the list of International Standards, Reference Reagents and Reference Panels for biological substances maintained by WHO are summarized in Annex 5
