The Power of Habit

The United Nations Security Council has primary responsibility for maintaining international peace and security. In discharging its powers it must act in accordance with the Purposes and Principles of the UN, and observe the rules

governing voting and procedure established in the Organisation's Charter. The Council adopts mandatory resolutions that may establish obligations for members and non-members, and such obligations trump conflicting obligations originating from any other international agreement. Member States must cooperate with the Organisation and among themselves, in the implementation of any action prescribed by the Council against States whose behaviour the Council considers an act of aggression, or a threat to, or breach of, international peace and security. This book analyses resistance to Security Council resolutions and puts forward a theory of lawful resistance. Sufyan Droubi takes a positivist approach to the UN Charter regarding it as a constitution. Special emphasis is placed on the construction of the Charter's meaning through the practice of both organs and Members of the UN and on the need to enhance the effectiveness of the Organization with due respect to the rule of law. The book proposes that nonviolent resistance to a mandatory resolution of the Security Council, on grounds that the latter is incompatible with the Charter or jus cogens norms, may be considered lawful under the Charter if some elements are present. In exploring a number of case studies of individual and collective State resistance to mandatory Council resolutions, the book proposes that resistance may function as a rudimentary instrument of accountability and protection of the Charter and jus cogens, in the absence of more mature mechanisms of judicial review. The book will be of excellent use and interest to scholars and students of constitutional international law and international relations.

Private Thoughts Upon Religion, Digested Into Twelve Articles. With Practical Resolutions Formed Thereupon. By William Beveridge,

Groundbreaking new research shows that by grabbing hold of the three-step "loop" all habits form in our brains--cue, routine, reward--we can change them, giving us the power to take control over our lives. "We are what we repeatedly do," said Aristotle. "Excellence, then, is not an act, but a habit." On the most basic level, a habit is a simple neurological loop: there is a cue (my mouth feels gross), a routine (hello, Crest), and a reward (ahhh, minty fresh). Understanding this loop is the key to exercising regularly or becoming more productive at work or tapping into reserves of creativity. Marketers, too, are learning how to exploit these loops to boost sales; CEOs and coaches are using them to change how employees work and athletes compete. As this book shows, tweaking even one habit, as long as it's the right one, can have staggering effects. In *The Power of Habit*, award-winning New York Times business reporter Charles Duhigg takes readers inside labs where brain scans record habits as they flourish and die; classrooms in which students learn to

boost their willpower; and boardrooms where executives dream up products that tug on our deepest habitual urges. Full of compelling narratives that will appeal to fans of Michael Lewis, Jonah Lehrer, and Chip and Dan Heath, *The Power of Habit* contains an exhilarating argument: our most basic actions are not the product of well-considered decision making, but of habits we often do not realize exist. By harnessing this new science, we can transform our lives.
