WHO Recommendations for Augmentation of Labour

Intrapartum care has undergone profound changes over the past 50 years. This book examines these changes and their intersection in midwifery practice, in particular their impact on the role of the midwife during labour and birth. Addressing a wide range of topics surrounding normal birth, this unique and diverse book provides an up-to-date, holistic overview of current knowledge, research and practice. The contributions from experts in the field include discussion of the evolution of intrapartum care and debates about childbirth education, as well as looking at birth environments, labour rhythm.

The North Dakota State Insurance Manual

Optimizing outcomes for women in labor at the global level requires evidence-based guidance of health workers to improve care through appropriate patient selection and use of effective interventions. In this regard, the World Health Organization (WHO) published recommendations for induction of labor in 2011. The goal of the present guideline is to consolidate the guidance for effective interventions that are needed to reduce the global burden of prolonged labor and its consequences. The primary target audience includes health professionals responsible for developing national and local health protocols and policies, as well as obstetricians, midwives, nurses, general medical practitioners, managers of maternal and child health programs, and public health policy-makers in all settings.

The American Labor Legislation Review

The Student's Guide to Becoming a Midwife is essential reading for all student midwives. Now updated to include the latest 2012 NMC Midwifery Rules and Standards and a brand new chapter on the midwife and public health, this comprehensive resource provides a wide range of need-to-know information for student midwives, including: Effective communication and documentation Confidentiality Interdisciplinary working The fundamentals of antenatal, intrapartum, and postnatal care Assessment and examination of the new-born baby Medicines Public health Clinical decision-making Evidence-based practice With case studies, words of wisdom from current midwives and a range of activities and self-test questions throughout - making it easy to learn and understand key concepts - The Student's Guide to Becoming a Midwife is the ideal companion for students throughout their course.

Disease Control Priorities, Third Edition (Volume 2)

Proceedings

The Student's Guide to Becoming a Midwife

Provides a concise discussion of all aspects of labor ward management. It is an evidence based book with full analysis of those areas where opinion is divided. An evidenced-based survey of labor ward practice Each chapter concludes with 'Points for Best Practice' International team of contributors including both obstetricians and midwives

Bookkeeping, Accounting and Auditing

Advancing Skills in Midwifery Practice provides a guide to continuing professional development needs and meeting the latest Post-Registration and Practice (PREP) requirements. Building on Skills for Midwifery Practice by Ruth Johnson and Wendy Taylor, this book follows a similar format already familiar to many midwives. Whilst aimed primarily at registered midwives, the principles and philosophy apply across interprofessional boundaries. Grounded in safe practice and on contemporary evidence, this book also ensures that the health and wellbeing of the mother, baby and family remain at the forefront of care. Lists underpinning practices and guidelines Rationale, including indications and contraindications of when the skill should be undertaken Procedure: how the skill is performed, evaluated and documented Professional responsibilities Key practice points References and further reading

What Mothers Say

Praise for the previous edition: "...An outstanding handbook. It will be a familiar volume on most midwifery bookshelves, providing an excellent guide to midwifery focused care of both woman and child in the birthing setting." - Nursing Times Online Providing a practical and comprehensive guide to midwifery care, The Midwife's Labour and Birth Handbook continues to promote best practice and a

safe, satisfying birthing experience with a focus on women-centred care. Covering all aspects of care during labour and birth, from obstetric emergencies to the practicalities of perineal repair (including left-hand suturing), the fourth edition has been fully revised and updated to include: Full colour photographs of kneeling extended breech and footling breech births New water birth and breech water birth photographs Female genital mutilation Sepsis Group B streptococcus Care of the woman with diabetes /Neonatal hypoglycaemia Mental health Seeding/microbirthing It also addresses important issues such as: Why are the numbers of UK women giving birth in stirrups RISING rather than falling? Why are so few preterm babies given bedside resuscitation with the cord intact? Would the creation of midwife breech practitioners/specialists enable more women to choose vaginal breech birth and is breech water birth safe? What is the legal position for women who choose to free birth – and their birth partners? Why are midwives challenging the OASI care bundle? Incorporating research, evidence and anecdotal observations, The Midwife's Labour and Birth Handbook remains an essential resource for both student midwives and experienced practising midwives.

The Organization of Maternity Care

Vols. 9-17 include decisions of the War Labor Board.

Labor Relations Reference Manual

This title is directed primarily towards health care professionals outside of the United States. Liu's Labour Ward Manual has for many years been the standard work for all personnel working on the labour ward. It gives instruction on the best application of technical procedures employed in the labour ward whilst promoting the ethos that the labouring mother and the unborn child must be the prime focus of attention. Offers a one-stop guide to all aspects of labour and birth in a hospital environment Covers everything from admittance procedures through to emergency drills and multiple births User-friendly layout with clear diagrams provide easy access to information Panel of international specialists ensure contemporary and representative content Incorporation of latest NICE and RCOG Guidelines as well as those of CNST New section on Emergency Drills Expanded segment on mental health

DCAA Contract Audit Manual

Myles Textbook for Midwives

The Spectator

Labour Ward Manual

This well-known and highly respected textbook has been rigorously revised and updated to reflect the changes in both midwifery education and practice.

Advancing Skills in Midwifery Practice E-Book

Maye's Midwifery

Mayes' Midwifery, an established key textbook for students and qualified midwives, contains essential knowledge for professional practice. For this 14th edition, each section and chapter has been fully updated and enhanced by leading authors to ensure the text complies with contemporary practice and current guidelines. Added benefits are the availability of a variety of additional online resources for each chapter, including case studies, video and website links, and a bank of multiple-choice questions to test knowledge. With a strong emphasis on normal birth, the book covers the spectrum of midwifery-related topics applied to practice, providing a foundation of knowledge, and encouraging independent thought through the use of reflective exercises in each chapter and online. The book provides midwives with material that meets individual ways of learning and supports current modes of midwifery education. Mayes' Midwifery is the text for initial preparation and for ongoing midwifery practice. New chapters on essential contemporary issues: Vulnerable women Perspectives on the future of midwifery, in a global context Evidence-based information to guide best practice Learning outcomes and Key Points in all chapters Reflective activities Now with an integrated website offering additional resources and material including: Multiple-choice questions for self-testing Case studies Reflective activities to consolidate your professional development Useful additional reading, resources and weblinks Expanded topics Downloadable materials including illustrations

Best Practice in Labor Ward Management

Accurate evaluation is an essential tool for the continuous improvement of midwifery services. This unique book provides comprehensive guidance on planning and carrying out research to generate valuable results. The difficult processes of economic evaluation and audit are explained in detail, with supporting case histories.

WHO Recommendations for Prevention and Treatment of Maternal Peripartum Infections

The goal of the present guideline is to consolidate guidance for effective interventions that are needed to reduce the global burden of maternal infections and its complications around the time of childbirth. This forms part of WHO's efforts towards improving the quality of care for leading causes of maternal death especially those clustered around the time of childbirth in the post-MDG era. Specifically it presents evidence-based recommendations on interventions for preventing and treating genital tract infections during labour childbirth or puerperium with the aim of improving outcomes for both mothers and newborns. The primary audience for this guideline is health professionals who are responsible

for developing national and local health protocols and policies as well as managers of maternal and child health programmes and policy-makers in all settings. The guideline will also be useful to those directly providing care to pregnant women including obstetricians midwives nurses and general practitioners. The information in this guideline will be useful for developing job aids and tools for both pre- and inservice training of health workers to enhance their delivery of care to prevent and treat maternal peripartum infections.

Mayes' Midwifery E-Book

This up-to-date, comprehensive and consolidated guideline on essential intrapartum care brings together new and existing WHO recommendations that, when delivered as a package, will ensure good-quality and evidence-based care irrespective of the setting or level of health care. The recommendations presented in this guideline are neither country nor region specific and acknowledge the variations that exist globally as to the level of available health services within and between countries. The guideline highlights the importance of woman-centered care to optimize the experience of labor and childbirth for women and their babies through a holistic, human rights-based approach. It introduces a global model of intrapartum care, which takes into account the complexity and diverse nature of prevailing models of care and contemporary practice. The recommendations in this guideline are intended to inform the development of relevant national- and local-level health policies and clinical protocols. Therefore, the target audience includes national and local public health policy-makers, implementers and managers of maternal and child health programs, health care facility managers, nongovernmental organizations (NGOs), professional societies involved in the planning and management of maternal and child health services, health care professionals (including nurses, midwives, general medical practitioners and obstetricians) and academic staff involved in training health care professionals.

WHO Recommendations on Intrapartum Care for a Positive Childbirth Experience

Bulletin of the United States Bureau of Labor Statistics. no. 75, 1908

This handbook describes indicators that can be used to assess, monitor and evaluate the availability, use and quality of Emergency Obstetric Care. These emergency obstetric care indicators can be used to measure progress in a programmatic continuum: from the availability of and access to emergency obstetric care to the use and quality of those services.

Reproductive Health in Developing Countries

Includes proceedings and papers of the American Association for Labor Legislation previously published in the two series: Proceedings and legislative review.

The Midwife's Labour and Birth Handbook

This new edition continues the outstanding tradition of excellence for which Myles Textbook for Midwives is internationally recognised. Thoroughly updated to reflect the concerns, needs and realities of modern midwifery, the book covers a complete spectrum of theoretical and practical topics - from basic to advanced - with which a midwife today must be familiar. Written by an exceptional and authoritative team of both practising and teaching midwives, and organised for clear and easy access to information, changes for this edition include the following. New chapters on - Risk management. Complementary therapies. Recognising the ill baby. The range

of midwife's clients. International midwifery. Substantially revised chapters on - Research in midwifery. Quality assurance. The midwife and independent midwifery. Statutory control of the practice of midwifery. As a comprehensive textbook, this 13th Edition will be invaluable for students of midwifery at all levels and practicing midwives looking for an up-to-date resource.

Catalog of Copyright Entries

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Sexually transmitted diseases, unintended pregnancies, infertility, and other reproductive problems are a growing concern around the world, especially in developing countries. *Reproductive Health in Developing Countries* describes the magnitude of these problems and what is known about the effectiveness of interventions in the following areas: Infection-free sex. Immediate priorities for combating sexually transmitted and reproductive tract diseases are identified. Intended pregnancies and births. The panel reports on the state of family planning and ways to provide services. Healthy pregnancy and delivery. The book explores the myths and substantive socio-economic problems that underlie maternal deaths. Healthy sexuality. Such issues as sexual violence and the practice of female genital mutilation are discussed in terms of the cultural contexts in which they occur. Addressing the design and delivery of reproductive health services, this volume presents lessons learned from past programs and offers principles for deciding how to spend limited available funds. *Reproductive Health in Developing Countries* will be of special interest to policymakers, health care professionals, and researchers working on reproductive issues in the developing world.
