From civil rights to Ferguson, *Franchise* reveals the untold history of how fast food became one of the greatest generators of black wealth in America. Often blamed for the rising rates of obesity and diabetes among black Americans, fast food restaurants like McDonald's have long symbolized capitalism's villainous effects on our nation's most vulnerable communities. But how did fast food restaurants so thoroughly saturate black neighborhoods in the first place? In *Franchise*, acclaimed historian Marcia Chatelain uncovers a surprising history of cooperation among fast food companies, black capitalists, and civil rights leaders, who—in the troubled years after King's assassination—believed they found an economic answer to the problem of racial inequality. With the discourse of social welfare all but evaporated, federal programs under presidents Johnson and Nixon promoted a new vision for racial justice: that the franchising of fast food restaurants, by black citizens in their own neighborhoods, could finally improve the quality of black life. Synthesizing years of research, *Franchise* tells a troubling success

In this groundbreaking book Phil Barden reveals what decision science explains about people's purchase behaviour, and specifically demonstrates its value to marketing. He shares the latest research on the motivations behind consumers' choices and what happens in the human brain as buyers make their decisions. He deciphers the 'secret codes' of products, services and brands to explain why people buy them. And finally he shows how to apply this knowledge in day to day marketing to great effect by dramatically improving key factors such as relevance, differentiation and credibility. Shows how the latest insights from the fields of Behavioural Economics, psychology and neuro-economics explain why we buy what we buy Offers a pragmatic framework and guidelines for day-to-day marketing practice on how to employ this knowledge for more effective brand management - from strategy to implementation and NPD. The first book to apply Daniel Kahneman's Nobel Prize-winning work to marketing and advertising Packed with case studies, this is a must-read for marketers, advertising professionals, web designers, R&D managers, industrial designers, graphic designers in fact anyone whose role or interest focuses on the 'why' behind consumer behaviour.

The Rights of Firefighters

The frequency of lawsuits in the private and public sectors is proliferating, and the fire service is not immune. The protections afforded by Sovereign Immunity have eroded, and fire departments are rightfully being held to quality standards. They face an increasing number of responsibilities that expose them to litigation. Given his legal background and ongoing active role in the fire service, the author is in a unique position to provide expertise on how to avoid legal problems by learning from the experiences of others. The second edition of Fire Service Law continues to provide much-needed coverage of the key areas in which a firefighter or fire department is likely to encounter litigation. The fundamental legal principles presented will serve as an excellent foundation for proper decision making and protocol in a fire service organization. The real-life case studies and relevant examples taken from today's headlines are valuable tools in the study of fire and EMS law. End-of-chapter review questions correspond to the case studies, and Expand Your Learning exercises are included for student and group assignments. Readers of this authoritative guide can stay abreast of the latest court decisions affecting fire department operations by accessing the author's Fire, EMS, & Safety Law Newsletter website.

Applications of Contemporary Management Approaches in Supply Chains

"Essential reading." —New York Review of Books In the spirit of *Evicted*, *Bait and Switch*, and *The Big Short*, a shocking, heart-wrenching investigation into America's housing crisis and the modern-day robber barons who are making a fortune off the backs of the disenfranchised working and middle class—among them, Donald Trump and his inner circle. Two years before the housing market collapsed in 2008, Donald Trump looked forward to a crash: "I sort of hope that happens because then people like me would go in and buy," he said. But our future president wasn't alone. While millions of Americans suffered financial loss, tycoons pounced to heartlessly seize thousands of homes—their profiteering made even easier because, as prize-winning investigative reporter Aaron Glantz reveals in *Homewreckers*, they often used taxpayer money—and the Obama administration's promise to cover their losses. In *Homewreckers*, Glantz recounts the transformation of straightforward lending into a morass of slivered and combined mortgage "products" that could be bought and sold, accompanied by a shift in priorities and a loosening of regulations and laws that made it good business to lend money to those who wouldn't be able to repay.

Homewreckers also brilliantly weaves together the stories of those most ravaged by the housing crisis. The result is an eye-opening expose of the greed that decimated millions and enriched a gluttonous few.

Best-Practice EVA tells the new EVA story from the ground up. Stewart covers EVA essentials—the classic economic profit version of EVA—in the first three chapters of the book. He shows readers how simple and intuitive EVA really is, how it is defined, and why it is better than all other measures of corporate profit. You discover how it naturally guides managers into making all the right decisions—the ones that will truly maximize value. You see how to use it in profit-sharing bonus plans that create the powerful incentives of an owner. Later, Stewart introduces new ratios that make EVA much more powerful and much easier to use than ever before. The pinnacle of the new ratio framework is EVA Momentum, calculated by taking the change in EVA versus the prior period, and dividing by the revenues in the prior period. It measures the growth rate in EVA, scaled to the sales size of the business. It is the only corporate performance ratio where bigger always is better, because it gets bigger when EVA does, which means it should be every company's most important financial goal, the one ratio metric that everyone aims to maximize as the key measure of corporate success. Stewart then walks through the nuts and bolts of Best-Practice EVA, kicking off with an in-depth look at EVA

Margin, or EVA as a percent of sales. It's a key productivity metric, and Stewart's candidate to replace ROI. The last link in the Best-Practice program is PRViT—the EVA market score report. Stewart shows how to read and interpret the report, how the score is determined, and why investors are turning to it to screen and rate stocks. He also shows why it is finding a home with CFOs and IR directors who want insights into how the market is pricing their stock. The book concludes with battle-tested tips from the firing line, practical suggestions for how you can test drive and adopt Best-Practice EVA at your company.

into a mysterious death at the Belvedere—a once-grand hotel—and a poignant, gripping meditation on suicide and voyeurism “The poster is new. I notice it right away, taped to a utility pole. Beneath the word ‘Missing,’ printed in a bold, high-impact font, are two sepia-toned photographs of a man dressed in a bow tie and tux.” Most people would keep walking. Maybe they’d pay a bit closer attention to the local news that evening. Mikita Brottman spent ten years sifting through the details of the missing man’s life and disappearance, and his purported suicide by jumping from the roof of her own apartment building, the Belvedere. As Brottman delves into the murky circumstances surrounding Rey Rivera’s death—which begins to look more and more like a murder—she contemplates the nature of and motives behind suicide, and uncovers a haunting pattern of guests at the Belvedere, when it was still a historic hotel, taking their own lives on the premises. Finally, she fearlessly takes us to the edge of her own morbid curiosity and asks us to consider our own darker impulses and obsessions.
