When sixteen-year old Jacey Adison's parents tell her they must move again, she has never questioned their life style. Until now When Jacey was two, her parents fled the protection of their birthplace, the mystical dimension of Nemele. Leaving was the only solution her parents believed might allow them to keep their family together and alive. The Adisons have been running from a sect of iniquitous beings from Nemele who covet Jacey. Her parents have repressed their adversaries' relentless tracking efforts by not utilizing their own mystical powers. They have chosen to conceal themselves within the only realm they knew they'd be able to survive. They are living under their self-imposed powerless sanctions on Earth, which constitutes the nineteenth nation of Nemele. Her parents have never revealed their true identities to Jacey, consequently keeping her true lineage and unique birthright from her. Jacey's family has pretended to be non-magical humans as a ploy to prevent an ancient omnipotent entity from killing more innocent beings in its relentless quest to possess Jacey. Nemele's inhabitants have been the elemental architectural guides of a number of nations throughout the cosmos. As Elemental Governors, they've influenced the evolution of eighteen other realms throughout the galaxy. Air, earth, wind, fire and water are gifted to each member within the Nemelite Society. It is during their Awakening, or

adolescent stage of development, that their talents emerge. Every legend, myth and folklore human beings have believed in and have worshiped since the beginning of time originate within Nemele.

Representatives from each of the nineteen nations form the Guild of Elders, a federation to oversee and rule Nemele. From Greek Gods to shape-shifting dragons, all exist. Born as an anomaly, Jacey possesses rare abilities that both virtuous and corrupt entities seek to use as their own. Should either side prevail, Jacey may be the saviour or downfall of every world within Nemele's domains. Blindly thrust into life and death situations, Jacey learns of her true powers within her dreaming and conscious states.

"This collection of essays marking the twenty-fifth anniversary of the publication of Michael Omi and Howard Winant's *Racial Formation in the United States* demonstrates the importance and influence of the concept of racial formation. The range of disciplines, discourses, ideas, and ideologies makes for fascinating reading, demonstrating the utility and applicability of racial formation theory to diverse contexts, while at the same time presenting persuasively original extensions and elaborations of it. This is an important book, one that sums up, analyzes, and builds on some of the most important work in racial studies during the past three decades."—George Lipsitz, author of *How Racism Takes Place* "*Racial Formation in the Twenty-First Century* is truly a state-of-the-field anthology, fully worthy of the classic volume it honors—timely, committed, sophisticated, accessible, engaging. The collection will be a boon to anyone wishing to understand the workings of race in the contemporary United States." —Matthew Frye Jacobson, Professor of American Studies, Yale University "This stimulating and lively collection demonstrates the wide-ranging influence and generative power of Omi and Winant's racial formation framework. The contributors are leading scholars in fields ranging from the humanities and social sciences to legal and policy studies. They extend the framework into new terrain, including non-U.S. settings, gender and sexual relations, and the

contemporary warfare state. While acknowledging the pathbreaking nature of Omi and Winant's intervention, the contributors do not hesitate to critique what they see as limitations and omissions. This is a must-read for anyone striving to make sense of tensions and contradictions in racial politics in the U.S. and transnationally."—Evelyn Nakano Glenn, editor of *Shades of Difference: Why Skin Color Matters*

### **Just a Spoonful of Laughter Helps the Medicine Go Down**

Nathaniel Wakeman is the only child and son of a modest vicar, who lives in the quiet and idyllic confines of the Isle of Wight. When his maternal

grandfather dies, Natty's mother reconnects with her estranged and wealthy brother and his family in hopes of raising Natty up in the world, to urge him to go beyond the humble life he's always known. Though his cousins show no particular regard for him, one of them, at least, lures him away from his retired life and introduces him to the world—and to the son of a baron from Somerset, Miles Lovell. Natty gradually finds himself drawn toward the older and worldlier gentleman and returns to his father's vicarage a changed young man. He also seems to have attracted the attention of a ghost, one that has followed him back to the island. Haunted by a woman in white, who seems to appear when he's at his weakest, Natty struggles with his own nature and with his family's increasing difficulties. His mother is distant, hiding things from him as she never has, and his father is aging before his eyes. Quarrels between his parents grow more and more frequent, and Natty's increasing terror of familiar and beloved footpaths add to the spiraling tension at home. While Natty tries to find his place in the world, his childhood is crumbling around him, and he becomes more and more convinced that his persistent ghost is a harbinger of doom.

We all have unconscious reactive programs that determine many of our thoughts and decisions. Quick rationalizations provide obvious but untrue "reasons" for our beliefs and actions, biases prevent us from examining new ideas, and desires push us to win arguments rather than to search for truth. We are led around by these parts of our minds that we're only vaguely aware of. But just how obedient are we to those hidden masters? Perhaps more than we know. *Beyond Mental Slavery* examines the many ways in which we become trapped in mental processes that limit the clarity and effectiveness of our thinking and decision-making. Using examples from science, business, the arts, and life in general, the basic problems - and solutions - are spelled out in simple language. Stories and research are used to show how the mind works - or doesn't work. More than just a look at the flaws of our minds, this book is also a how-to guide for clearer, more powerful, and more useful thinking.
