The venture capital and private equity industries are among the most characteristic and visible segments of today's global economy. As we approach the midpoint of the first decade of the 21st century, these industries have clearly matured and left behind the much-publicized excesses of the 1990s. It is now incumbent upon practitioners to thoroughly understand the legal structure of venture capital transactions, not only in their own country but also due to the typically cross-border nature of such transactions in numerous jurisdictions worldwide. This very useful book has been prepared under the auspices of the International Association of Young Lawyers (AIJA) following a working session held in Edinburgh in August 2003. It provides practitioners with the first overview of the legal requirements attached to venture capital transactions in a variety of jurisdictions, encompassing both developed and developing nations. An introductory chapter presents a global view, addressing venture capital issues that tend to arise under any legal circumstances. Then, for each of twelve countries, an experienced practitioner in the venture capital field offers detailed discussions of his or her country's legal system as it pertains to the protection of investors' rights and company's investments, regulatory issues, and enforcement. Specific topics discussed where applicable for each country include: documentation; due diligence; valuation standards; representations and warranties; intellectual property; compensation of key personnel; disclosure; exit strategy; corporate governance roles; tax issues; securities law requirements; restrictions on foreign direct investment; and availability of court orders. Global Venture Capital Transactions goes a long way to fulfilling the need of practitioners and entrepreneurs to structure cross-border venture capital transactions that are not only initially successful but enjoy continued profitability with the strength to overcome inevitable obstacles. It will be warmly welcomed by the venture capital and private equity community throughout the world.

Controversy over the Iranian nuclear policy has been mounting in both legal and political circles since the early 2000s. Most recently, the IAEA, tasked with verifying compliance of Member States with the NPT, has been expressing concern that Iran's nuclear efforts are directed not solely at peaceful uses but also at military purposes. In response, various States have tried, individually and collectively, to engage Iran in agreed frameworks of action that would include an Iranian self-imposed restraint regarding its nuclear development. This volume documents the Iranian nuclear issue, tracing the evolution of international interest and concern with Iran's nuclear policy since the 1970s, when Iran began earnest efforts to acquire nuclear capabilities. Emphasis is placed on events since 2002-2003, when it was established that Iran had concealed certain aspects of its nuclear activities from IAEA. Alongside reports of the IAEA and Security Council documents, the volume covers diverse sources rather than relying solely on UN organs and agencies, international organisations or dedicated ad hoc bodies.

Priests of Our Democracy tells of the teachers and professors who battled the anti-

communist witch hunt of the 1950s. It traces the political fortunes of academic freedom beginning in the late 19th century, both on campus and in the courts. Combining political and legal history with wrenching personal stories, the book details how the anti-communist excesses of the 1950s inspired the Supreme Court to recognize the vital role of teachers and professors in American democracy. The crushing of dissent in the 1950s impoverished political discourse in ways that are still being felt, and First Amendment academic freedom, a product of that period, is in peril today. In compelling terms, this book shows why the issue should matter to everyone.

The Companies Act, 2013 has enforced sweeping changes to the mind-set of corporate and their managers alike. Codified roles and responsibilities, higher penalties, disclosures have made the position of directors more demanding. As one moves along with complying with the letter and spirit of law, there may be many questions which are not answered by the relevant section itself. A plethora of rules, notifications, case laws and standards of the ICAI and ICs also need to be looked into. With this background, the book takes a comprehensive approach to understand the requirements of the Office of a director, his roles, responsibilities, liabilities in the light of the relevant sections, decided cases and the applicable Secretarial standards, when it comes to procedural aspects like Board and Committee meetings. For ready reference updated rules for appointment and management of directors, key managerial personnel, meeting of Board and its powers, the Companies (Amendment) Bill, 2016, Exemption notification for government and private companies, SEBI (LODs) and SS-1 have been provided as appendices. To further help our readers navigate their way in the daily performance of corporate actions a separate br>Chapter on resolutions has also been carved out. The most cutting-edge read on CDO and credit market structures Collateralized Debt Obligations and Structured Finance provides a state-of-the-art look at the exploding CDO and structured credit products market. Financial expert Janet Tavakoli examines securitization topics never before seen in print, including the huge increase in the CDO arbitrage created by synthetics; the tranches most at risk from this new technology; dumping securitizations on bank balance sheets; the

abuse of offshore vehicles by companies such as Enron; and securitizations made possible by new securitization techniques and the introduction of the Euro. This valuable guide comprehensively covers one of the fastest growing markets on Wall Street, predicting where new bank regulations and other developments may lead to product growth or product extinction. While providing an overview of the market and its dynamic growth, Collateralized Debt Obligations and Structured Finance explores the types of products offered, hedging techniques, and valuation and risk/return issues associated with investment in CDOs and synthetic CDOs. Janet M. Tavakoli, MBA (Chicago, IL), has over eighteen years of experience trading, structuring, and marketing derivatives and structured products with major financial institutions in New York and London. She is also the author of Credit Derivatives and Synthetic Structures, now in its Second Edition (0-471-41266-X).

Is today's language at an all-time low? Are pronunciations like cawfee and chawklit bad English? Is slang like my bad or hook up improper? Is it incorrect to mix English and Spanish, as in Yo quiero Taco Bell? Can you write Who do you trust? rather than Whom do you trust? Linguist Edwin Battistella takes a hard look at traditional notions of bad language, arguing that they are often based in sterile conventionality. Examining grammar and style, cursing, slang, and political correctness, regional and ethnic dialects, and foreign accents and language mixing, Battistella discusses the strong feelings evoked by language variation, from objections to the pronunciation NU-cu-lar to complaints about bilingual education. He explains the natural desire for uniformity in writing and speaking and traces the association of mainstream norms to ideas about refinement, intelligence, education, character, national unity and political values. Battistella argues that none of these qualities is inherently connected to language. It is tempting but wrong, Battistella argues, to think of slang, dialects and nonstandard grammar as simply breaking the rules of good English. Instead, we should view language as made up of alternative forms of orderliness adopted by speakers depending on their purpose. Thus we can study the structure and context of nonstandard language in order to illuminate and enrich traditional forms of language, and make policy decisions based on an informed engagement. Re-examining longstanding and heated debates, Bad Language will appeal to a wide spectrum of readers engaged and interested in the debate over what constitutes proper language.

Labor Guide to Labor Law is a comprehensive survey of labor law in the private sector, written from the labor perspective for labor relations students and for unions and their members. The text emphasizes issues of greatest importance to unions and employees. Where the law permits a union to make certain tactical choices, those choices are pointed out. Material is included on internal union matters that tend to be ignored in management texts. Bruce S. Feldacker and Michael J. Hayes cover applicable labor law principles from a union's initial organizing campaign to the mature bargaining relationship, including such subjects as the employee right to engage in protected concerted activity, the duty to bargain, labor arbitration, the use of strikes, picketing and other economic weapons in resolving a labor dispute, the duty of fair representation, internal union regulation, and employment discrimination. This book is also a useful reference and review for full-time union officers and representatives who have a working knowledge of labor law but wish to brush up on certain points as needed in their work. Both authors have extensive experience in the construction field, and they have been careful to include material on those aspects of labor law that are unique to that field. Labor Guide to Labor Law is structured to present an unbiased and comprehensive explanation of labor law principles for anyone interested in the field. Thus, labor relations educators, as well as practitioners in the field representing labor, management, or individual employees, should also find the text suitable for their use. Each chapter includes a summary, review questions and answers, a restatement of "Basic Legal principles" with citations to key cases, and a bibliography for additional research. The comprehensively revised and updated fifth edition covers new statutes, current issues, and the latest developments in labor and employment law.
