Sex, God, politics and other trivia, like science and business, get skewered in this selection of Gary Suttons published rants. But somehow this curmudgeon dotes on relatives. One column helped a judge decide to overturn a jury verdict. Another caused a CIA operative to show up on his doorstep. Death threats and nasty letters to editors followed several pieces. Whether in the NY Times or Math World, The Wall Street Journal or the La Jolla Light, Suttons thoughts always seem to provoke. Funny, Outrageous. Never even close to conventional.

From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955–1957 Chevrolets, the “Forward Look” Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company’s models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace. From the Hardcover edition.

Auto Repair For Dummies

The Color of Water

For many people, a well-maintained automobile is a source of pride and peace of mind. But for others, the idea of routine maintenance is daunting. How to Make Your Car Last Forever will guide you through the minefield of preventative maintenance, repair, extended warranties, and magic elixirs that claim to cure everything from oil consumption to male-pattern baldness! Author, car repair expert, and host of satellite radio show America's Car Show with Tom Torbjornsen, Tom Torbjornsen has seen it all in his 40 years in the automobile industry. Let him show you how to extend the life of your car indefinitely. In How to Make Your Car Last Forever, he explains the what, when, and why's of automotive maintenance and repairs in easy-to-understand terms. Simple how-to projects supplement the learning with step-by-step instructions that will save you time and money. While you may not want your car to last forever, Torbjornsen's advice will help you preserve it indefinitely while maximizing resale value down the road. Preventative maintenance is the key to the automotive fountain of youth. Let Tom Torbjornsen show you the way!

PARENT S: DO NOT TRY THIS AT HOME Greg Fitzsimmons has made a lot of what appear to be bad decisions. It's what he was raised to do. Most parents would hide or destroy any evidence so clearly demonstrating their child's failures, but—lucky for us—Greg Fitzsimmons's family has preserved each mistake in its original envelope like a trophy in a case, lest he ever forget where he came from. Dear Mrs. Fitzsimmons is Greg's life, told through this cavalcade of disciplinary letters, incident reports, and newspaper clippings that his parents received from teachers and school officials. Greg picks up where his parents left off with his own collection of letters received during college and throughout his successful career as a writer, producer, and stand-up comic. Revealing the larger story of how Greg's distinctly dysfunctional Irish-American family bred him to blindly challenge anyone, anytime, anywhere, over anything, Dear Mrs. Fitzsimmons comes full circle to show that the Fitzsimmons torch has been passed on proudly to a new generation.

One Bubble off Plumb

This is American history told through the stories of an atypical, for Utah, region. Castle Valley is roughly conterminous with two counties, Carbon and Emery, which together formed a rural, industrial enclave in a mostly desert environment behind the mountain range that borders Utah's principal corridor of settlement. In Castle Valley, coal mining and the railroad attracted diverse, multiethnic communities and a fair share of historic characters, from Butch Cassidy, who stole its largest payroll,

to Mother Jones, who helped organize its workers against its mining companies. Among the last major segments of the state to be settled, it was also a generally poor region that stretched the capabilities of people to scratch a living from a harsh landscape. The people of Castle Valley experienced complex, unusual combinations of both social cohesion and conflict, but they struggled through poverty, labor disputes, major mining disasters, and other challenges to build communities whose stories reflected the historical course of the nation as a whole. In order to convey her subject's both unique and representative qualities, Nancy Taniguchi has written an epic history that is not just local history, but American history written locally. Nancy J. Taniguchi, who lived for thirteen years in Castle Valley and was previously on the faculty of the College of Eastern Utah in Price, is professor of history at California State University, Stanislaus. She is the author of numerous published articles in mining, legal, women's, western, and Utah history and of one book, *Necessary Fraud: Progressive Reform and Utah Coal*.

Information and Organizations

An ambitious new work by a well-respected sociologist, *Information and Organizations* provides a bold perspective of the dynamics of organizations. Stinchcombe contends that the "information problem" and the concept of "uncertainty" provide the key to understanding how organizations function. In a delightful mix of large theoretical insights and vivid anecdotal material, Stinchcombe explores the ins and outs of organizations from both a macro and micro perspective. He reinterprets the work of the renowned scholars of business, Alfred Chandler, James March and Oliver Williamson, and looks in depth at corporations like DuPont and General Motors. Along the way, Stinchcombe explores subjects as varied as class consciousness, innovation, contracts and university administration. All of these analyses are distinguished by incisive thinking and creative new approaches to issues that have long confronted business people and those interested in organizational theory. A tour de force, *Information and Organizations* is a must-read for business people and scholars of many stripes. It promises to be a widely discussed and debated work.

Hormones and Atherosclerosis covers the proceedings of the conference held in Brighton, Utah on March 11-14, 1958. The book focuses on the role of hormones in atherosclerosis, as well as cholesterol metabolism and biosynthesis, lipogenesis, and lipid transport. The selection first discusses the biosynthesis of cholesterol and aspects of the biosynthesis of cholesterol from mevalonic acid. Discussions focus on components of liver homogenates and coenzymes required for squalene and sterol synthesis from mevalonic acid and preservation of enzymes and microsomes. The text also ponders on the formation and metabolism of bile acids under different conditions and thyroid function, thyroxine analogs, and cholesterol metabolism in rats and rabbits. The book elaborates on the comparison of the participations of fibroblasts and reticuloendothelial cells in the synthesis and metabolism of cortisol and cholesterol and control of aortal lipid metabolism and lipid movement by hormones and vitamins. The manuscript also examines the influence of estrogens on lipids and atherosclerosis in experimental animals and the effect of adrenals, pituitary, liver, and mucopolysaccharides on blood lipids. The selection is a dependable reference for readers interested in the relationship of hormones and atherosclerosis.

Lemon-Aid New and Used Cars and Trucks 2007-2017

The 1973 oil crisis forced the American automotive industry into a period of

dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive “need-for-speed” engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various “captive imports” (e.g. Dodge’s Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer’s significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

An Exceptional Year

As a boy in Brooklyn's Red Hook projects, James McBride knew his mother was different. But when he asked about it, she'd simply say 'I'm light-skinned.' Later he wondered if he was different too, and asked his mother if he was black or white. 'You're a human being,' she snapped. 'Educate yourself or you'll be a nobody!' And when James asked what colour God was, she said 'God is the colour of water.' As an adult, McBride finally persuaded his mother to tell her story - the story of a rabbi's daughter, born in Poland and raised in the South, who fled to Harlem, married a black man, founded a Baptist church, and put twelve children through college.

Volkswagen Beetles and their variants are some of the most iconic and easily recognizable cars on the road! The classic air-cooled Volkswagen Beetle, officially the Volkswagen Type 1, is regarded as one of the most important and well-

engineered vehicles of the twentieth century. It was the most popular imported car in America in the 1960s, and before that it enjoyed a humble beginning as "the people's car" in its native Germany. The Complete Book of Classic Volkswagens encompasses the evolution of the popular Beetle as well as other variations of Volkswagen's air-cooled cars, vans, and trucks. Thoroughly illustrated, this is an invaluable reference to Volkswagen's collectible and iconic cars. The history of VW automobiles is just as colorful as the hues they were manufactured in, and this book illustrates the full story. German automakers originally sought to supply their countrymen with an automobile that was easy to mass produce. By 1938, they finalized the design for the VW "Bug"--the first rear-engined, rear-wheel-drive configured car. In its heyday, the little rounded Beetle was produced at a rate of more than one million per year. Today, with more than 23 million cars built, the Beetle holds the record as the most-produced passenger car of all time. But the Beetle is only one part of the air-cooled Volkswagen story. The rest--from Type 2 vans, pick-ups, and campers to the Type 113 "Super Beetle"--is included here. If you're the owner of a Volkswagen or if you just love their iconic look and you're interested in their evolution, this book deserves a place on your bookshelf.

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
