Modern Robotics

Cambridge Primary English is a flexible, endorsed course written specifically to support Cambridge International Examinations' curriculum framework (Stages 1-6). The resources are aimed at first language English learners, encouraging them to actively explore, use and apply their core listening, speaking, reading and writing skills through individual, pair and group work. Engaging activities provide opportunities for differentiated learning and promote creativity and critical thinking. Lively international fiction, non-fiction and poetry texts are the basis for teaching reading and writing skills, including comprehension, grammar, punctuation, phonics, spelling and handwriting. Learners also practise their spoken English to build vocabulary and confidence through class and group discussion. Each stage contains three core components (Learner's Book, Activity Book, and Teacher's Resource Book with accompanying CD-ROM) which are fully integrated and offer a complete solution to teaching Cambridge Primary English. Also available are Phonics Workbooks A and B, providing an essential foundation in phonics skills.

Cambridge Checkpoints VCE Accounting Unit 4 2009

Cambridge Checkpoints study guides, provide the most up-to-date exam preparation and revision available for VCE students.

Cambridge VCE Accounting Units 3 and 4

Providing an unrivalled approach to teaching VCE Accounting within a real-world context, Cambridge VCE Accounting has been extensively updated to fully cover the new VCE study design to be implemented in 2019. Written by a highly-regarded author team with experience in curriculum development, teaching and developing resources, Cambridge VCE Accounting helps students develop a thorough understanding of the real-world role of accounting as well as the key knowledge and skills required to achieve success in assessment tasks and examinations.

Discrete Choice Methods with Simulation

Providing an unrivalled approach to teaching VCE Accounting within a real-world context, Cambridge VCE Accounting has been extensively updated to fully cover the new VCE study design to be implemented in 2019. Written by a highly-regarded author team with experience in curriculum development, teaching and developing resources, Cambridge VCE Accounting helps students develop a thorough understanding of the real-world role of accounting as well as the key knowledge and skills required to achieve success in assessment tasks and examinations. What's new or updated in these editions: Cambridge VCE Accounting has been updated explicitly for the 2019 VCE Accounting Study Design to comprehensively cover all course content, including an increased focus on developing critical thinking and ICT skills, as well as an emphasis on the ethical considerations of financial decision making. Clearly defined ICT activities challenge students to use spreadsheets to organise financial data or perform calculations, present information in the form of graphs, charts and tables, and model the impact of accounting decisions. Glossary definitions have been updated to reflect the new study design's use of the International Accounting Standards Board's (IASB) Conceptual Framework, and are presented in the page margins and collated at the back of each book. Study tips in the page margin have been updated to help students identify common errors or better understand course content, to aid with comprehension, revision and exam preparation. What we've kept that you love: Effective use of colour-coded examples throughout the textbook allows students to follow particular transactions through the accounting process. Accounting concepts are introduced using student-friendly language and developed using regular review questions and exercises. Accounting knowledge and skills are scaffolded, allowing students to eventually tackle complex exam scenarios. Icons in both the textbook and workbook helps students effectively and efficiently navigate between exercises, examples and activities. The Interactive Textbook brings the study of

accounting to life, and includes videos and additional digital activities. The workbook, available for purchase separately in print format, includes exam-style pro-formas for every exercise in the student text, fully preparing students for VCE exams. It is fully integrated with the student textbook. The Interactive Textbook includes access to downloadable exercise pro-formas in Word and Excel format.

Cambridge IGCSE First Language English Coursebook with Free Digital Content

Convex optimization problems arise frequently in many different fields. This book provides a comprehensive introduction to the subject, and shows in detail how such problems can be solved numerically with great efficiency. The book begins with the basic elements of convex sets and functions, and then describes various classes of convex optimization problems. Duality and approximation techniques are then covered, as are statistical estimation techniques. Various geometrical problems are then presented, and there is detailed discussion of unconstrained and constrained minimization problems, and interior-point methods. The focus of the book is on recognizing convex optimization problems and then finding the most appropriate technique for solving them. It contains many worked examples and homework exercises and will appeal to students, researchers and practitioners in fields such as engineering, computer science, mathematics, statistics, finance and economics.

Food Solutions

Structure and Interpretation of Computer Programs by Harold Abelson and Gerald Jay Sussman is licensed under a Creative Commons Attribution-NonCommercial 3.0 License.

Cambridge Primary English Stage 1 Learner's Book

Cambridge Checkpoints study guides, provide the most up-to-date exam preparation and revision available for VCE students.

Cambridge Global English Stage 2 Activity Book

Cambridge Checkpoints study guides, provide the most up-to-date exam preparation and revision available for VCE students.

Managerial Accounting for Undergraduates

Making and Breaking the Law

This book describes the new generation of discrete choice methods, focusing on the many advances that are made possible by simulation. Researchers use these statistical methods to examine the choices that consumers, households, firms, and other agents make. Each of the major models is covered: logit, generalized extreme value, or GEV (including nested and cross-nested logits), probit, and mixed logit, plus a variety of specifications that build on these basics. Simulation-assisted estimation procedures are investigated and compared, including maximum simulated likelihood, method of simulated moments, and method of simulated scores. Procedures for drawing from densities are described, including variance reduction techniques such as antithetics and Halton draws. Recent advances in Bayesian procedures are explored, including the use of the Metropolis-Hastings algorithm and its variant Gibbs sampling. The second edition adds chapters on endogeneity and expectation-maximization (EM) algorithms. No other book incorporates all these fields, which have arisen in the past 25 years. The procedures are applicable in many fields, including energy, transportation, environmental studies, health, labor, and marketing.

Cost Accounting: Foundations and Evolutions

Key foods - Functions of natural food components - Cooking and food preservation - Food safety - Developing and implementing a design plan - Food product development - Marketing and packaging - Environmental issues.

Convex Optimization

Macmillan Accounting VCE Units 3&4 6e WB

Optimization models play an increasingly important role in financial decisions. This is the first textbook devoted to explaining how recent advances in optimization models, methods and software can be applied to solve problems in computational finance more efficiently and accurately. Chapters discussing the theory and efficient solution methods for all major classes of optimization problems alternate with chapters illustrating their use in modeling problems of mathematical finance. The reader is guided through topics such as volatility estimation, portfolio optimization problems and constructing an index fund, using techniques such as nonlinear optimization models, quadratic programming formulations and integer programming models respectively. The book is based on Master's courses in financial engineering and comes with worked examples, exercises and case studies. It will be welcomed by applied mathematicians, operational researchers and others

who work in mathematical and computational finance and who are seeking a text for self-learning or for use with courses.

Carbon Dioxide Capture and Storage

For students studying the new Language A Language and Literature syllabus for the IB Diploma. Written by an experienced, practising IB English teacher, this new title is an in-depth and accessible guide for Standard and Higher Level students of the new Language A Language and Literature syllabus for the IB Diploma. This lively, well structured coursebook is available in both print and e-book formats and includes: key concepts in studying language and literature; text extracts from World literature (in English and in translation); international media and language sources; a wide variety of activities to build skills; materials for exam preparation; guidance on assessment; Theory of Knowledge links; and Extended essay opportunities.

Introduction to English as a Second Language Workbook

Cambridge Checkpoints study guides, provide the most up-to-date exam preparation and revision available for VCE students.

Cambridge International AS and A Level Business Revision Guide

Inflationary cosmology has been developed over the last twenty years to remedy serious shortcomings in the standard hot big bang model of the universe. This textbook, first published in 2005, explains the basis of modern cosmology and shows where the theoretical results come from. The book is divided into two parts; the first deals with the homogeneous and isotropic model of the Universe, the second part discusses how inhomogeneities can explain its structure. Established material such as the inflation and quantum cosmological perturbation are presented in great detail, however the reader is brought to the frontiers of current cosmological research by the discussion of more speculative ideas. An ideal textbook for both advanced students of physics and astrophysics, all of the necessary background material is included in every chapter and no prior knowledge of general relativity and quantum field theory is assumed.

Financial & Managerial Accounting for MBAs

A modern and unified treatment of the mechanics, planning, and control of robots, suitable for a first course in robotics.

Cambridge Checkpoints VCE Health and Human Development Units 3 and 4 2009

VCE Accounting

Cambridge Global English (7-8) is a lower Secondary course following the Cambridge Secondary English as a Second Language Curriculum Framework developed by Cambridge English Language Assessment. The course is also aligned with the Common European Framework of Reference.

Cambridge Global English Stage 8 Workbook

Cambridge Global English (1-6) is a six-level Primary course following the Cambridge Primary English as a Second Language Curriculum Framework developed by Cambridge English Language Assessment. Activity Book 2 provides additional practice activities to consolidate language skills and content material introduced in Learner's Book 2. Nine units correspond with the topics, texts and language input of Learner's Book 2 with each lesson of the Learner's Book supported by two pages in the Activity Book. Learning is reinforced through activities clearly framed within the 'I can' objectives of the course, opportunities for personalisation and creative work and a higher level of challenge to support differentiation. Each unit in the Activity Book ends with a quiz, offering more in depth assessment for learners. CEFR Level: A1.

English A: Language and Literature for the IB Diploma Coursebook

Fully revised for first examination in 2021 with an emphasis on 21st century skills. This activity-based coursebook for classroom use is clearly organised into three parts: text types, global issues and assessment. The first section defines and analyses a range of literary and non-literary text types. The global issues section integrates all three areas of exploration from the revised syllabus, into meaningful units. The coursebook includes curated video links and samples of Paper 1, Paper 2, the individual oral and the higher level essay. Higher level extension activities are included in each unit, with key concepts and guiding questions integrated throughout. Answers are in the teacher's resource.

Cambridge Global English Stage 7 Workbook

Cambridge VCE Accounting Units 1&2 Workbook

Optimization Methods in Finance

Cambridge International AS and A Level Business Revision Guide helps students apply their knowledge, understanding and skills to succeed in their course. This endorsed Cambridge International AS and A Level Business Revision Guide has been designed to further develop students' skills for the Cambridge International AS and A Level Business course. Revised to meet the latest syllabus (9609) this book is packed full of guidance to reinforce students' understanding and skills to succeed in their course. Written by experienced examiners this Revision Guide is perfect for international learners and accompanies the Cambridge International AS and A Level Business Coursebook (third edition).

Cambridge Global English Stage 4 Activity Book

This practical coursebook introduces all the basics of semantics in a simple, step-by-step fashion. Each unit includes short sections of explanation with examples, followed by stimulating practice exercises to complete in the book. Feedback and comment sections follow each exercise to enable students to monitor their progress. No previous background in semantics is assumed, as students begin by discovering the value and fascination of the subject and then move through all key topics in the field, including sense and reference, simple logic, word meaning and interpersonal meaning. New study guides and exercises have been added to the end of each unit to help reinforce and test learning. A completely new unit on non-literal language and metaphor, plus updates throughout the text significantly expand the scope of the original edition to bring it up-to-date with modern teaching of semantics for introductory courses in linguistics as well as intermediate students.

Managerial Accounting

Cambridge Global English (1-6) is a six-level Primary course following the Cambridge Primary English as a Second Language Curriculum Framework developed by Cambridge English Language Assessment. Activity Book 4 provides additional practice activities to consolidate language skills and content material introduced in Learner's Book 4. Nine units correspond with the topics, texts and language input of Learner's Book 4 with each lesson of the Learner's Book supported by two pages in the Activity Book. Learning is reinforced through activities clearly framed within the 'I can' objectives of the course, opportunities for personalisation and creative work and a higher level of challenge to support differentiation. Each unit in the Activity Book ends with revision and opportunity for self-assessment. CEFR Level: towards A2.

Physical Foundations of Cosmology

Artificial intelligence (AI) is a field within computer science that is attempting to build enhanced intelligence into computer systems. This book traces the history of the subject, from the early dreams of eighteenth-century (and earlier) pioneers to the more successful work of today's AI engineers. AI is becoming more and more a part of everyone's life. The technology is

already embedded in face-recognizing cameras, speech-recognition software, Internet search engines, and health-care robots, among other applications. The book's many diagrams and easy-to-understand descriptions of AI programs will help the casual reader gain an understanding of how these and other AI systems actually work. Its thorough (but unobtrusive) end-of-chapter notes containing citations to important source materials will be of great use to AI scholars and researchers. This book promises to be the definitive history of a field that has captivated the imaginations of scientists, philosophers, and writers for centuries.

The Quest for Artificial Intelligence

Up-to-date resources providing full coverage of Cambridge IGCSE First Language English (0500 and 0522) for first examination in 2015. This Fourth edition Coursebook is designed to support the Cambridge IGCSE First Language English (0500) and Cambridge International Level 1/Level 2 Certificate First Language English (0522). A student-friendly resource that teaches the reading and writing techniques required for the Cambridge IGCSE, as well as providing two bespoke units on speaking and listening techniques, plus embedded activities on these skills throughout. It includes carefully designed activities on a variety of engaging topics, set out in 14 lively, full-colour units. A dedicated microsite for Cambridge First Language English provides free online resources to support the course, including answers to the Coursebook activities.

Cambridge VCE Accounting Units 3 and 4 Workbook

Cambridge VCE Accounting introduces basic concepts then builds on these until students are able to apply their skills to complex exam scenarios. The highly regarded author team of VCE teachers and examiners familiarise students with key accounting terminology, exam language and exam-style exercises, and help students follow specific transactions in the accounting process through colour-coded examples.

Structure and Interpretation of Computer Programs - 2nd Edition

"Worked solutions for all activities in the student book are provided in both a printed manual and on CD together in one package, allowing flexibility of use.

Cambridge VCE Accounting Units 1 and 2 Workbook

CAMBRIDGE VCE ACCOUNTING WORKBOOK UNITS 1&2 Second Edition includes exam-style pro-formas for every exercise in the student text, fully preparing students for VCE exams. The workbooks are available for purchase separately in print

format. The Interactive Textbook includes automatic access to the integrated electronic workbook, which allows students to complete the exercises using the exam-style pro-formas in Word or Excel spreadsheets. The series: Fully updated to meet the requirements of the new Study Design to be implemented in 2012, CAMBRIDGE VCE ACCOUNTING introduces basic concepts then builds on these until students are able to apply their skills to complex exam scenarios.

Governmental and Not-For-Profit Accounting and Auditing

Introduction to English as a Second Language Workbook accompanies the Coursebook (sold separately) in this Fourth edition series, and is presented in an accessible updated design. Each Workbook unit reinforces the topic and theme from the corresponding Coursebook unit, and provides additional practice in reading, writing and listening. Furthermore, each Workbook unit starts with a review of key vocabulary from the corresponding Coursebook unit, and contains a specific language focus.

Semantics

Cambridge Global English (7-8) is a lower Secondary course following the Cambridge Secondary English as a Second Language Curriculum Framework developed by Cambridge English Language Assessment. The course is also aligned with the Common European Framework of Reference. Workbook 7 is organised into eighteen thematic units of study based on the Cambridge International English Scheme of Work for Stage 7. The units are carefully structured to reinforce the language learning of the Coursebook, at the same time as extending students' knowledge via a range of exercise types. CEFR Level towards B1.

Accounting for Governmental and Nonprofit Organizations

Introduction to Information Retrieval

Macmillan VCE Accounting 6E updates and reimagines Victoria's most trusted and authoritative Accounting textbook series for the 2019 VCE study design. This new series matches Neville Box's unparalleled subject matter expertise and study design knowledge with a modern design and revised chapter structure to make the content accessible and effective for all students. Macmillan VCE Accounting 6E moves beyond numbers and tables to provide real-world problems, contexts and questions from the world of financial management. With more focus on exam success than any other resource, Macmillan VCE Accounting 6E gives all students the content, support and clarity they need to meet the demands of the VCE

Accounting subject and exams.

Cambridge VCE Accounting Units 1 and 2 Workbook

Cambridge VCE Accounting Units 1 and 2

Fully updated to meet the requirements of the revised Study Design, Cambridge VCE Accounting Units 1 & 2 (Second Edition) supports students as they develop the skills necessary to succeed. This market-leading series scaffolds students through the course introducing basic concepts and building on these until students are able to apply their skills to complex exam scenarios. The highly-regarded author team of VCE Accounting examiners provide an authoritative and easy-to-understand narrative on the Units 1 & 2 course. This is supported by Review Questions for each section to consolidate learning, and carefully graded exercises at the end of each chapter that closely resemble the style found in the external exams. Key features include:

- Comprehensive colour coding of specific transactions in the accounting process provides extra visual support for students
- Selected answers provided at the back of the text encourage students to work independently.

Cambridge Checkpoints VCE Physical Education Units 3 and 4 2009

Keep cost accounting understandable and practical for your students with the eighth edition of Kinney/Raiborn's **COST ACCOUNTING: FOUNDATIONS AND EVOLUTIONS**, which provides in-depth coverage of up-to-date cost management concepts and procedures in a straightforward and student-friendly framework. The clean, concise presentation of materials and fresh, new exhibits reinforce and clarify the topics that students struggle with most. In addition, real-world examples and ethical coverage are woven into the text so that students immediately see the relevance of the cost accountant's role in managerial decisions and learn to go beyond the numbers and think critically. Ensure that your students master the procedural and decision-making skills needed for future success with the Comprehensive Review Module, an array of end of chapter assignments, and the powerful CengageNOW online learning and teaching system. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Cambridge Checkpoints VCE Accounting Unit 3 2009

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of

the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.
