The top secrets to getting into the best MBA programs, from a leading industry expert
Top MBA programs reject more than 80 percent of their applicants, but author Chioma Isiadinso's admissions consulting firm has successfully guided 90 percent of her students into the best business schools around the world. As a former Admissions Board Member, Isiadinso offers insider tips and strategies to help applicants get into the school of their choice by building and promoting their personal brand. This revised and updated edition now offers:

- the do's and don'ts of social media networking
- sample admissions essays that worked
- an international perspective for global admissions appeal

Evaluation of the Lovell Federal Health Care Center Merger

Are you ... hoping your next networking event will be “the one”? ... collecting mountains of business cards? ... having countless breakfasts and lunches? ... thinking about what you give and get? Then your way of networking is ... dead. With social networks, teleconferencing, and webinars, you are able to meet more people in more ways than ever before. But that doesn't mean you're creating new possibilities through valuable connections. Networking Is Dead offers a new approach to fundamental networking misconceptions. Authors Melissa G Wilson and Larry Mohl show it's the quality rather than the quantity of connections that counts. Their fable tells the story of connection expert Dan guiding Meredith, an outgoing social media expert, and Lance, a shy accountant, to build relationships that matter to them and their businesses. It shows an effective process that lets you:

- Deepen existing relationships and make meaningful new ones
- Connect across your own company to strengthen your business
- Find people with similar values to embark on mutually beneficial opportunities
- Leverage your connections instead of being overwhelmed by them

Networking Is Dead is an engaging story

that provides easy-to-implement tips at the end of each chapter. This powerful combination of story and time-tested action steps provides a comprehensive roadmap to achieve even your toughest goals. Networking is dead, but making connections that matter will bring new possibilities to life for you and your organization.

What's Your Digital Business Model?

Providing a novel approach to business policy and strategic management, this book focuses on the implementation of a firm's competitive strategy throughout all levels of the organization.

Networlding

The 2010 opening of the Captain James A. Lovell Federal Health Care Center (FHCC) created a joint entity between the Department of Defense (DoD) and the Department of Veterans Affairs (VA) that replaced two separate centers in North Chicago. VA and DoD leaders envisioned a state-of-the-art facility that would deliver health care to both DoD and VA beneficiaries from northern Illinois to southern Wisconsin, providing service members and veterans seamless access to an expanded array of medical services. Unprecedented for the military and the VA, the Lovell FHCC would integrate clinical and administrative services under a single line of authority. The DoD asked the IOM to evaluate whether the Lovell FHCC has improved health care access, quality, and cost for the DoD and the VA, compared with operating separate facilities, and to examine whether patients and health care providers are satisfied with joint VA/DoD delivery of health care. Evaluation of the Lovell Federal Health Care Center Merger: Findings, conclusions, and Recommendations finds that initial implementation of the Lovell FHCC has provided important lessons about how to integrate VA and DoD health care services and has identified remaining obstacles that the departments could overcome to make such mergers more effective and less costly to implement. The IOM recommends that the VA and the DoD develop a comprehensive evaluation plan to objectively judge its success or failure, with measurable criteria, that would provide essential knowledge for both the Lovell FHCC and future endeavors.

Emergency Management in Health Care

Instructor Resources: PowerPoint slides, discussion questions, and mini-cases for breakout group analysis. Through a series of timely and relevant cases based on real-life experiences, this book explores the kinds of management dilemmas and moral challenges that confront healthcare managers on a day-to-day basis. Good management requires making morally sound decisions and understanding the ethical implications for your organization, community, patients, and your career. In

this updated edition, readers will explore the interrelatedness of ethics and management and common barriers to ethical decisions. In-depth analyses of cases and strategic discussions bring to life these complex issues: Diversity management Information technology Disaster planning Medical errors Physician impairment Conflict of interest Sexual harassment and gender discrimination Workforce reduction Mergers Conflicting moral demands This practical guide gives direction and guidance to help healthcare managers at all levels of the organization build an ethical culture, advocate a business case for ethics that addresses structural issues, and adopt an ethical decision-making model for the organization.

Building Microservices

A career safety net for the new economy, *Networkling* shows you how to build the mutually beneficial relationships that are the real keys to job satisfaction, career advancement, and personal fulfillment in the 21st century. The authors, both renowned networking experts, offer a transformational, seven-step networking process built on their unique support exchange model. They explain how you can use networking to generate a constant flow of exciting opportunities for expanding your career, starting a new business, or launching a community project. A wealth of practical tools, including quizzes, exercises, and risk-free simulations, help you create the kind of connections that are today's best catalysts for career success.

Urban Environmental Education Review

With perceptive insight, Erin Goseer Mitchell continues to define race, class and family struggle. Informal, yet passionate, her writing remains thought provoking and inspiring. From her Introduction: "One Saturday in July 2014, I attended a writers' workshop at National Louis University. One of the requirements for attending the workshop was to submit and present a page of work in progress. Rick Kogan, a senior editor at the Chicago Tribune, was the facilitator of the session. When my turn came, I read a page from an account about my first year in Chicago after I left Fitzgerald, Georgia. The group found it compelling. Kogan was very encouraging and told me that he wanted more, that this was a part of Chicago history that he had never heard. "With his comments and the prodding I had gotten from my readers, I began the arduous and often painful process of writing about my life in Chicago. The reminiscences that comprise this book are a result of that effort." Erin Goseer Mitchell

Digital transformation is not about technology--it's about change. In the rapidly changing digital economy, you can't succeed by merely tweaking management practices that led to past success. And yet, while many leaders and managers recognize the threat from digital--and the potential opportunity--they lack a common language and compelling framework to help them assess it and guide

them in responding. They don't know how to think about their digital business model. In this concise, practical book, MIT digital research leaders Peter Weill and Stephanie Woerner provide a powerful yet straightforward framework that has been field-tested globally with dozens of senior management teams. Based on years of study at the MIT Center for Information Systems Research (CISR), the authors find that digitization is moving companies' business models on two dimensions: from value chains to digital ecosystems, and from a fuzzy understanding of the needs of end customers to a sharper one. Looking at these dimensions in combination results in four distinct business models, each with different capabilities. The book then sets out six driving questions, in separate chapters, that help managers and executives clarify where they are currently in an increasingly digital business landscape and highlight what's needed to move toward a higher-value digital business model. Filled with straightforward self-assessments, motivating examples, and sharp financial analyses of where profits are made, this smart book will help you tackle the threats, leverage the opportunities, and create winning digital strategies.

The Tracks We Leave

"Lord, teach us to pray" (Luke 11:1). During Jesus' earthly ministry, the disciples made this request of Him. He answered them with what has become known as the Lord's Prayer. Today, nearly 2,000 years later, do we as followers of Jesus Christ have a passion for prayer? Do we desire to speak with our heavenly Father? And are the prayers we utter effective? In this handy pamphlet, perfectly sized to slide into your Bible or notebook, Mark Bubeck offers twenty prayers, rich in doctrine, to

help Christians triumph in their spiritual battles. Model prayers include those for revival, repentance, intercession, protection from the Enemy, unity in the Body, and wearing the Armor of God. Learn to pray like the disciples did—by example.

How to Succeed in College (While Really Trying)

This book provides a framework to hone and polish any person's creative problem-solving skills.

Principles of Accounting Volume 2 - Managerial Accounting

Intro to Business: a Primer

After years of preparation and anticipation, many students arrive at college without any real knowledge of the ins and outs of college life. They've been focused on finding the right school and have been carefully guided through the nuances of the admissions process, but too often they have little knowledge about how college will be different from high school or what will be expected of them during that crucial first year and beyond. Written by an award-winning teacher, *How to Succeed in College (While Really Trying)* provides much-needed help to students, offering practical tips and specific study strategies that will equip them to excel in their new environment. Drawing on years of experience teaching at a variety of campuses, from large research universities to small liberal arts colleges, Jon B. Gould gives readers the lay of the land and demystifies the college experience. In the course of the book, students will learn how to identify the best instructors, how to choose classes and settle on a major, how to develop effective strategies for reading and note taking, and how to write good papers and successfully complete exams. Because much of the college experience takes place outside of the classroom, Gould also advises students on how to effectively manage their cocurricular activities, work obligations, and free time, as well as how to take advantage of the typically untapped resources on every campus. With candid advice and insights from a seasoned insider, this guide will leave students better prepared not only to succeed in college but to enjoy it as well.

Intended for a one-semester junior or senior level undergraduate course, this book provides a modern and self-contained introduction to digital signal processing (DSP). It is supplemented by a vast number of end-of-chapter problems such as worked examples, drill exercises, and application oriented problems that require the use of computational resources such as MATLAB. Also, many figures have been included to help the student grasp and visualize critical concepts. Results are tabulated and summarized for easy reference and access. It also attempts to provide a broader perspective by introducing useful applications and additional special topics in each chapter. These form the background for more advanced graduate courses, and also allow the book to be used as a source of basic reference for professionals across various disciplines interested in DSP.

Finalist for the National Book Award for Fiction “[These stories] vibrate with originality, queerness, sensuality and the strange.”—Roxane Gay “In these formally brilliant and emotionally charged tales, Machado gives literal shape to women’s memories and hunger and desire. I couldn’t put it down.”—Karen Russell In *Her Body and Other Parties*, Carmen Maria Machado blithely demolishes the arbitrary borders between psychological realism and science fiction, comedy and horror, fantasy and fabulism. While her work has earned her comparisons to Karen Russell and Kelly Link, she has a voice that is all her own. In this electric and provocative debut, Machado bends genre to shape startling narratives that map the realities of women’s lives and the violence visited upon their bodies. A wife refuses her husband’s entreaties to remove the green ribbon from around her neck. A woman recounts her sexual encounters as a plague slowly consumes humanity. A salesclerk in a mall makes a horrifying discovery within the seams of the store’s prom dresses. One woman’s surgery-induced weight loss results in an unwanted houseguest. And in the bravura novella “Especially Heinous,” Machado reimagines every episode of *Law & Order: Special Victims Unit*, a show we naïvely assumed had shown it all, generating a phantasmagoric police procedural full of doppelgängers, ghosts, and girls with bells for eyes. Earthy and otherworldly, antic and sexy, queer and caustic, comic and deadly serious, *Her Body and Other Parties* swings from horrific violence to the most exquisite sentiment. In their explosive originality, these stories enlarge the possibilities of contemporary fiction.

The Parliament of the World's Religions opened on 11 September 1893 at the Art Institute of Chicago as part of the World's Columbian Exposition. On this day, Vivekananda gave a brief speech representing India and Hinduism. He was initially

nervous, bowed to Saraswati (the Hindu goddess of learning) and began his speech with "Sisters and brothers of America!". At these words, Vivekananda received a two-minute standing ovation from the crowd of seven thousand. According to Sailendra Nath Dhar, when silence was restored he began his address, greeting the youngest of the nations on behalf of "the most ancient order of monks in the world, the Vedic order of sannyasins, a religion which has taught the world both tolerance, of and universal acceptance". Vivekananda quoted two illustrative passages from the "Shiva mahimna stotram": "As the different streams having their sources in different places all mingle their water in the sea, so, O Lord, the different paths which men take, through different tendencies, various though they appear, crooked or straight, all lead to Thee!" and "Whosoever comes to Me, through whatsoever form, I reach him; all men are struggling through paths that in the end lead to Me." According to Sailendra Nath Dhar, "It was only a short speech, but it voiced the spirit of the Parliament." Parliament President John Henry Barrows said, "India, the Mother of religions was represented by Swami Vivekananda, the Orange-monk who exercised the most wonderful influence over his auditors". Vivekananda attracted widespread attention in the press, which called him the "cyclonic monk from India". The New York Critique wrote, "He is an orator by divine right, and his strong, intelligent face in its picturesque setting of yellow and orange was hardly less interesting than those earnest words, and the rich, rhythmical utterance he gave them". The New York Herald noted, "Vivekananda is undoubtedly the greatest figure in the Parliament of Religions. After hearing him we feel how foolish it is to send missionaries to this learned nation". American newspapers reported Vivekananda as "the greatest figure in the parliament of religions" and "the most popular and influential man in the parliament". The Boston Evening Transcript reported that Vivekananda was "a great favourite at the parliament if he merely crosses the platform, he is applauded". He spoke several more times "at receptions, the scientific section, and private homes" on topics related to Hinduism, Buddhism and harmony among religions until the parliament ended on 27 September 1893. Vivekananda's speeches at the Parliament had the common theme of universality, emphasising religious tolerance. He soon became known as a "handsome oriental" and made a huge impression as an orator.

The Unwinding of the Miracle

NEW YORK TIMES BESTSELLER • As a young mother facing a terminal diagnosis, Julie Yip-Williams began to write her story, a story like no other. What began as the chronicle of an imminent and early death became something much more—a powerful exhortation to the living. "An exquisitely moving portrait of the daily stuff of life."—The New York Times Book Review (Editors' Choice) NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Time • Real Simple • Good Housekeeping That Julie Yip-Williams survived infancy was a miracle. Born blind in Vietnam, she narrowly escaped euthanasia at the hands of her grandmother, only to flee with her family the political upheaval of her country in the late 1970s. Loaded into a rickety boat with three hundred other refugees, Julie made it to Hong Kong and, ultimately, America, where a surgeon at UCLA gave her partial sight. She would go on to become a Harvard-educated lawyer,

with a husband, a family, and a life she had once assumed would be impossible. Then, at age thirty-seven, with two little girls at home, Julie was diagnosed with terminal metastatic colon cancer, and a different journey began. *The Unwinding of the Miracle* is the story of a vigorous life refracted through the prism of imminent death. When she was first diagnosed, Julie Yip-Williams sought clarity and guidance through the experience and, finding none, began to write her way through it—a chronicle that grew beyond her imagining. Motherhood, marriage, the immigrant experience, ambition, love, wanderlust, tennis, fortune-tellers, grief, reincarnation, jealousy, comfort, pain, the marvel of the body in full rebellion—this book is as sprawling and majestic as the life it records. It is inspiring and instructive, delightful and shattering. It is a book of indelible moments, seared deep—an incomparable guide to living vividly by facing hard truths consciously. With humor, bracing honesty, and the cleansing power of well-deployed anger, Julie Yip-Williams set the stage for her lasting legacy and one final miracle: the story of her life. Praise for *The Unwinding of the Miracle* “Everything worth understanding and holding on to is in this book. . . . A miracle indeed.”—Kelly Corrigan, New York Times bestselling author “A beautifully written, moving, and compassionate chronicle that deserves to be read and absorbed widely.”—Siddhartha Mukherjee, Pulitzer Prize-winning author of *The Emperor of All Maladies*

The bestselling author of *UnSelfie* explains why the old markers of accomplishment (grades, test scores) are no longer reliable predictors of success in the 21st century -- and offers 7 teachable traits that will safeguard our kids for the future. Michele Borba has been a teacher, educational consultant, and parent for 40 years -- and she's never been more worried than she is about this current generation of kids. The high-achieving students she talks with every day are more accomplished, better educated, and more privileged than ever before. They're also more stressed, unhappier, and struggling with anxiety, depression, and burnout at younger and younger ages -- "we're like pretty packages with nothing inside," said one young teen. Thrivers are different: they flourish in our fast-paced, digital-driven, often uncertain world. Why? Dr. Borba interviewed more than 100 young people from all walks of life, and she found something surprising: the difference between those who struggle and those who succeed comes down not to grades or test scores, but to seven character traits that set Thrivers apart (and set them up for happiness

and greater accomplishment later in life). These traits--confidence, empathy, self-control, integrity, curiosity, perseverance, and optimism--will allow kids to roll with the punches and succeed in life. And the even better news: these traits can be taught to children at any age in fact, parents and educators must do so. In *Thrivers*, Dr. Borba offers practical, actionable ways to develop these traits in children from preschool through high school, showing how to teach kids how to cope today so they can thrive tomorrow.

Annotation Over the past 10 years, distributed systems have become more fine-grained. From the large multi-million line long monolithic applications, we are now seeing the benefits of smaller self-contained services. Rather than heavy-weight, hard to change Service Oriented Architectures, we are now seeing systems consisting of collaborating microservices. Easier to change, deploy, and if required retire, organizations which are in the right position to take advantage of them are yielding significant benefits. This book takes an holistic view of the things you need to be cognizant of in order to pull this off. It covers just enough understanding of technology, architecture, operations and organization to show you how to move towards finer-grained systems.

Urban Environmental Education Review explores how environmental education can contribute to urban sustainability. Urban environmental education includes any practices that create learning opportunities to foster individual and community well-being and environmental quality in cities. It fosters novel educational approaches and helps debunk common assumptions that cities are ecologically barren and that city people don't care for, or need, urban nature or a healthy environment. Topics in Urban Environmental Education Review range from the urban context to theoretical underpinnings, educational settings, participants, and educational approaches in urban environmental education. Chapters integrate research and practice to help aspiring and practicing environmental educators, urban planners, and other environmental leaders achieve their goals in terms of education, youth and community development, and environmental quality in cities. The ten-essay series Urban EE Essays, excerpted from Urban Environmental Education Review, may be found here: naaee.org/eepr/resources/urban-ee-essays. These essays explore various perspectives on urban environmental education and may be reprinted/reproduced only with permission from Cornell University Press.
