South-Western Federal Taxation 2018: Individual Income Taxes (Book Only)

The increasingly digitalized global economy is undermining the usefulness of many traditional tax concepts. In addition to issues of double taxation and double non-taxation, important questions arise concerning the allocation of taxing rights in respect of income from cross-border digital transactions. This is the first book to analyse what changes are possible, necessary and feasible in order to forestall the unravelling of the existing international tax framework. Focusing in turn on the legal framework, specific proposals for adapting tax concepts for the digital economy, types of transactions and administrative issues such as those around data protection and digital currencies, the expert contributors discuss such challenges to taxation as the following: the pervasiveness of intangible assets; new value creation models; the ascendance of the sharing economy and digital services; virtual currencies; the importance of user participation for digital platforms; cloud computing; the impact of Big Data on tax enforcement; virtual business presence; and the influence of robotization. Throughout, the authors describe and analyse proposals made by the Organisation for Economic Co-operation and Development (OECD), the European Union (EU) and individual countries and their likely impact going forward. They also attend to the limits imposed on reform possibilities by public international law, EU law and constitutional law. It is generally acknowledged that there is a need to monitor how the digital transformation may be impacting value creation. This book is a key milestone toward developing a durable, long-term solution to the tax challenges posed by the digitalization of the economy. With its thorough scrutiny of proposals for digital services tax and virtual permanent establishments, insightful analysis of digital services and detailed description of the impact of big data on tax administration and taxpayer protection, it will quickly prove indispensable for tax practitioners and the international tax community more generally.

Two significant complications affect the taxation of property transactions. The first

complication is the special treatment of capital gains and losses. The second complication arises from the time value of money. This book aims to provide students with an appreciation for these two significant complexities through the descriptive materials and problems presented. Chapter 1 introduces the concepts of basis and realization that are fundamental to the taxation of all transactions involving property. Chapter 2 follows with the effects of taxing gains and losses from capital assets differently from ordinary gains and losses. Chapter 3 deals with liabilities, which are essentially the opposite of assets or property, so that they can be considered negative property. Chapter 4 covers the rules applicable to the capitalization of costs incurred in the creation or acquisition of property and the recovery of those costs through a variety of expensing, amortization, and depreciation provisions. Chapter 5 covers non-recognition transactions (other than transfers involving partnerships, corporations or trusts) in which gain or loss is not recognized on disposition but is deferred through the mechanism of substituted basis. Chapter 6 deals with deferred compensation issues and other special problems arising in executive compensation arrangement using employer stock or stock options that reflect the lure of capital gain treatment. Chapter 7 covers the complexities that arise from the cliché that property is a bundle of rights, particularly when the ownership and long-term right to possession is divided under a lease or similar arrangement. Finally, Chapter 8 covers a number of special provisions that affect the deductibility of losses, including the wash sales rules, limitations on related party transactions, the at-risk and passive loss rules, and losses arising in certain leasing transactions. South-Western Federal Taxation 2017: Individual Income Taxes

This publication addresses both federal and state tax guidance on the taxation of marijuana, cannabis, or related products. The publication provides an overview of federal taxation policies related to cannabis, specifically Code Sec. 280E, the interplay between Code Sec. 280E and other code sections, and any legal issues therein related. The bulk of the publication is a state-by-state survey of how marijuana or cannabis is taxed and how manufacturers, distributors and retailers of

cannabis are taxed differently. On the federal level, the issues tend to be fairly broad. There is no direct taxation of cannabis at the federal level, so the issues turn on how cannabis is treated differently from any other business. Effectively, the federal government has wavered in how it treats cannabis, from respecting states rights to determine legality to treating it as an illegal narcotics trade. On the state level, over the past few years, a large and growing number of states have expanded the legality of marijuana or cannabis, some continuing to keep it as an illegal narcotic, some allowing it for medicinal purposes and some allowing it for recreational use. As with a broad spectrum of legal treatment, there comes a broad spectrum of tax treatment, with each state that allows some limited or unlimited use of cannabis enacting tax provisions that are all different. Cannabis Taxation: Federal and State Tax Guidebook serves as a comprehensive source of coverage to the disparate treatments of cannabis taxation across federal and state jurisdictions.

Essentials of Federal Income Taxation

Federal Tax Accounting advises tax preparers, accountants, attorneys, and other professionals about timing issues, i.e. when an item, such as income, deduction, or credit may be reported on a tax return. Tax accounting rules govern the tax

incidents of when tax events must be taken into account for federal income tax purposes. The when question is the subject of this book. In general, tax accounting is not concerned with whether an item is includable in income or deductible or even with the character of the item but when it may be reported. One may ask "how can a book's sole subject be when? Consider the following issues which relate to timing: . Under the annual accounting doctrine, should tax accounting be transactional or periodic? . Should an item of income be considered income upon receipt even though the taxpayer might be obligated to return the item? What if the item is in dispute; should it be picked up as income or be deferred? . If a taxpayer takes a deduction in a previous year but recovers the item in a subsequent year, should the item recovered be income? . If the taxpayer dissolves his corporation and recognizes capital gain and is obligated to pay a liability of the corporation, is the deduction ordinary or capital? . What tax year should a partnership, S corporation, personal holding company or regular corporation use? What are the alternatives for the taxpayer? Can taxpayers make elections to use tax years other than those that are required? . If the taxpayer is using an erroneous tax year, how is the error corrected? . What are the requirements for choosing methods of accounting? . How does a taxpayer adopt a method of accounting? . Should the taxpayer be using the cash method of accounting; if so how should the taxpayer maintain his books? How should the books clearly reflect income? . When a taxpayer receives a promissory note, does the taxpayer have income? Can the taxpayer defer income? . If a taxpayer is involved in a commercial transaction and deposits the money in escrow until the following year, when does the taxpayer have income? . If a taxpayer decides to prepay some year-end expenses, can the taxpayer take a deduction before the expenses are utilized? . What are the rules for the taxpayer who is required to use the accrual method of accounting? . Is title important to an accrual method taxpayer? . What if the income is recognized but may not be collected; can the accrual taxpayer not report income? . If an accrual method taxpayer receives prepaid income, must it always recognize income? . How does prepaid income relate to generally accepted accounting principles and financial accounting? . If a taxpayer is using an erroneous method of accounting, can it change to a proper method or must it seek permission from the Commissioner? . What if the Commissioner determines that a taxpayer is using an improper method of accounting; what are the consequences? . What are the rules for the sale of containers, routable spare parts, COD sales, consignment etc.? . Can small businesses which sell merchandise use the cash method under certain circumstances? . If a taxpayer is required to use the uniform capitalization rules under IRC §263A what exceptions are there? . What is the small reseller exception? . What is the small producer exception? . How does a taxpayer determine ending inventory including additional uniform capitalization costs? . If a taxpayer is a reseller, what items will be purchasing cost, labor costs, and handling cost? . What are the simplified methods for determining additional IRC §263A cost to ending inventory? . How are these methods implemented? . What are the tax accounting rules for multiple businesses? Can a business maintain two separate methods of accounting? . What are the interest capitalization rules required under IRC §263A? . If the taxpayer is engaged in an installment sale, will the installment sale be qualified under IRC §453? . What are the exceptions to IRC §453? . How is installment gain determined? . If the taxpayer engages in a contingent payment sale, how is the sale reported? . Can dealers engage in installment sales? . What are the related party rules that impact tax accounting (including installment

sales)? . What are the rules required for non-dealers who sell property for more than \$5 million? . What are the rules for long-term contracts, manufacturing contracts, and construction contracts? . How is the completed contract method implemented? . How is the percentage of completion method implemented? . Which taxpayers who are producing goods are permitted a domestic production deduction? How is the domestic production deduction computed and applied? . How does time value of money transaction impact tax accounting transactions? . What is the AFR? . Are private annuities available? . How are self-canceling notes determined and utilized? . How is personal interest handled for tax accounting purposes? . How is investment interest determined and handled for tax accounting purposes? . What are the original issue discount rules applicable to tax accounting? . What are below-market loans and what are the issues related thereto? This and much more is the subject of Federal Tax Accounting. Tax accounting rules are found in all areas of federal income tax. These rules often involve many issues that are visible and, in some cases, invisible, governing items that are includable in income, deductible or creditable. Many of the issues that arise in an audit depend on resolution of tax accounting issues. As a result tax accounting issues have become more and more important and receive more scrutiny in determining tax policy. Tax practitioners need to have a thorough understanding of tax accounting to be able to analyze and solve tax problems. Over the years tax accounting has become more and more complex as the need for revenue has increased. The tax accounting rules do not always match up with generally accepted accounting principles and, in fact, often deviate from them. The goal of tax accounting is to produce income and to protect government revenue as opposed to informing the public of information necessary for a financial decision. Tax accounting is not transactional but periodic which means that on an annual basis taxpayers must determine whether they have income or losses. There are several ameliorative provisions such as net operating losses, the tax benefit rule, etc.. which may balance out certain tax accounting principles. Indeed, a substantial portion of every tax problem that practitioners face inevitably involves a tax accounting issue.
