With both regimes, the most abundant and ubiquitous ships in their respective fleets were the notoriously lethal TIE fighters. The TIE Fighter Owners' Workshop Manual presents a thorough history of Sienar Fleet Systems' twin ion engine space superiority fighter, from early concepts and prototypes to the mass-produced starfighters that fought countless battles against insurgent groups. The history of TIE fighters—including bombers, boarding craft, and shuttles—is fully illustrated with numerous photographs, schematics, exploded diagrams, and computer-generated artwork by Star Wars™ vehicle experts Chris Reiff and Chris Trevas. Text is by Ryder Windham, author and co-author of more than 70 Star Wars books. "In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the

question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints and to draw out implications for theory, policy and practice." --from back cover.
