In *Cultivating Genius*, Dr. Ghody E. Muhammad presents a four-layered equity framework--one that is grounded in history and restores excellence in literacy education. This framework, which she names, *Historically Responsive Literacy*, was derived from the study of literacy development within 19th-century Black literacy societies. The framework is essential and universal for all students, especially youth of color, who traditionally have been marginalized in learning standards, school policies, and classroom practices. The equity framework will help educators teach and lead toward the following learning goals or pursuits: *Identity Development*--Helping youth to make sense of themselves and others *Skill Development*--Developing proficiencies across the academic disciplines *Intellectual Development*--Gaining knowledge and becoming smarter *Criticality*--Learning and developing the ability to read texts (including print and social contexts) to understand power, equity, and anti-oppression When these four learning pursuits are taught together--through the *Historically Responsive Literacy Framework*, all students receive profound opportunities for personal, intellectual, and academic success. Muhammad provides probing, self-reflective questions for teachers, leaders, and teacher educators as well as sample culturally and historically responsive sample plans and text sets across grades and content areas. In this book, Muhammad presents practical approaches to cultivate the genius in students and within teachers.

One of the integral parts of determining business success directly correlates to how well a company interacts with their customers. This increased demand for direct communication has evolved how companies cooperate with their patrons and examines how essential ethics is related to these communications. Ethical Consumerism and Comparative Studies Across Different Cultures: Emerging Research and Opportunities provides emerging research exploring the theoretical and practical aspects of the fundamental issues related to ethical consumerism and applications within business, science, engineering, and technology and examines the impact Arab and global cultures have on consumerism. Featuring coverage on a broad range of topics such as business ethics, data management, and global business, this book is ideally designed for managers, executives, advertisers, marketers, sales directors, practitioners, researchers, academicians, and students.

Action research, explored in this book, is a seven-step process for improving teaching and learning in classrooms at all levels. Through practical examples, research tools, and easy-to-follow "implementation strategies," Richard Sagor guides readers through the process from start to finish. Learn how to uncover and use the data that already exist in your classrooms and schools to answer significant questions about your individual or collective concerns and interests. Sagor covers each step in the action research process in detail: selecting a focus, clarifying theories, identifying research questions, collecting data, analyzing data, reporting results, and taking informed action. Drawing from the experience of individual teachers, faculties, and school districts, Sagor describes how action research can enhance teachers' professional standing and efficacy while helping them succeed in settings characterized by increasingly diverse student populations and an emphasis on standards-based reform. The book also demonstrates how administrators and policymakers can use action research to bolster efforts related to accreditation, teacher supervision, and job-embedded staff development. Part how-to guide, part inspirational treatise, Guiding School Improvement with Action Research provides advice, information, and encouragement to anyone interested in reinventing schools as learning communities and restructuring teaching as the true profession it was meant to be.

Teaching Civic Engagement provides an exploration of key theoretical discussions, innovative ideas, and best practices in educating citizens in the 21st century. The book addresses theoretical debates over the place of civic engagement education in Political Science. It offers pedagogical examples in several sub-fields, including evidence of their effectiveness and models of appropriate assessment. Written by political scientists from a range of institutions and subfields, Teaching Civic Engagement makes the case that civic and political engagement should be a central part of our mission as a discipline.

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Civic education plays an essential role in strengthening the democratic society, preparing informed citizens, and promoting their participation in the civic life of their communities. This project explores state K-12 civic education policies and related requirements nationwide, as well as factors that shape K-12 civic education policies and practices in school districts and schools. The first two chapters of this report provide the national and state contexts for content standards in core subject areas, including civics; review state constitutional provisions and statutes that promote civic education; and examine how social studies standards, assessment, teacher certification, and other state policies build on these provisions and statutes. Recognizing the centrality of state standards, chapters 3 through 5 examine the extent to which the civics content in state standards promotes civic dispositions, civic intellectual skills, and civic knowledge, respectively. Chapters 6 through 11 examine several influences on civic education at the district level: standards; instructional materials; assessment; professional development; extracurricular and co-curricular activities; and individuals, organizations, and funding. Chapter 12 provides recommendations for developing sustainable state and school district civics commitments that ensure systematic attention to civic education in grades K-12. Key findings from the project report are included, as are extensive chapter notes, and 47 tables of data. Seven appendices contain additional information. (BT)

Many learning options are possible in education, from traditional to blended/hybrid to fully online. Of the three delivery formats, the blended mode, which involves the fusion of online and traditional face-to-face instruction and learning activities, is considered to have the greatest potential to provide the best learning environment. As blended learning continues to evolve and expand, it is important that information regarding what constitutes the ideal combination of online and traditional pedagogical strategies in blended education and at all levels is illuminated and shared. *Emerging Techniques and Applications for Blended Learning in K-20 Classrooms* is an academic publication that focuses on pedagogical strategies and technologies that have been successfully employed by educators in blended instruction. In addition, the student outcomes from the use of these techniques are presented. Covering a wide range of topics such as gamification, civic education, and critical thinking, this book is essential for academicians, administrators, educators, instructors, researchers, instructional designers, curriculum developers, principals, early childhood educators, higher education faculty, and students.

Can social studies classrooms be effective "makers" of citizens if much of what occurs in these classrooms does little to prepare young people to participate in the civic and political life of our democracy? Making Citizens illustrates how social studies can recapture its civic purpose through an approach that incorporates meaningful civic learning into middle and high school classrooms. The book explains why social studies teachers, particularly those working in diverse and urban areas, should infuse civic education into their teaching, and outlines how this can be done effectively. Directed at both pre-service and in-service social studies teachers and designed for easy integration into social studies methods courses, this

book follows students and teachers in social studies classrooms as they experience a new approach to the traditional, history-oriented social studies curriculum, using themes, essential questions, discussion, writing, current events and action research to explore enduring civic questions. Following the experiences of three teachers working at three diverse high schools, Beth C. Rubin considers how social studies classrooms might become places where young people study, ponder, discuss and write about relevant civic questions while they learn history. She draws upon the latest sociocultural theories on youth civic identity development to describe a field-tested approach to civic education that takes into consideration the classroom and curricular constraints faced by new teachers.
