Altoon and Porter Architects

Surface/Subsurface

Core Competencies for Federal Facilities Asset Management Through 2020

Covers: overview of international alliances (benefits, challenges and risk assessment, characteristics of a well-structured alliance); a synopsis of the 30 interviews with senior level internat'l. construction executives that covers 70 hours of interview tapes and represent over 1,000 years of experience in international construction; analysis of interview and survey data; comparison of U.S. firms and their European and Asian competitors; and an implementation model. Appendices: definitions of terms, gov't. agencies that provide assistance, and bibliography.

Engineering & contracting

With Gladden and Olitt's Marketing and Selling A/E and Other Engineering Services, architects/engineers, project managers, and consultants in small-, medium-, or large-size firms will be able to develop a marketing plan to fit their company's needs.

Herbert S. Newman and Partners

Now you can keep construction design exposure to a minimum! Prepared for design and construction professionals and their attorneys, this comprehensive, up-to-date resource is written by eminent authorities in the field. It details all relevant topics: risk management, alternative dispute resolution, trial conduct, handling shop drawings, insurance and surety, and more. You'll get straightforward answers to all your legal questions, as well as examples of the valuable lessons learned by leading design and construction experts.

Ronald A. Altoon is an internationally recognised authority on this history, development and architecture of the retail centre. This fascinating book places the modern retail centre in its context of the development of culture and trade, informing our understanding of the retail centre of today. Future prototypes are suggested, with an exploration of sustainable design in retail and the development of the 21st-century retail centre. Superbly illustrated, the book presents a host of projects from around the world, in a variety of contexts, including main street, urban, resort, transit-related, mixed-use and retail precincts. This book is a remarkable insight into the global, polymorphous and multi-cultural experience that is retail.

Sponsored by the Committee on Expert Systems and Artificial Intelligence of the Technical Council on Computer Practices of ASCE. This report illustrates advanced methods and new developments in the application of artificial neural networks to solve problems in civil engineering. Topics include: evaluating new construction technologies; using multi-layered artificial neural network architecture to

overcome problems with conventional traffic signal control systems; Øincreasing the computational efficiency of an optimization model; Øpredicting carbonation depth in concrete structures; Ødetecting defects in concrete piles; Øanalyzing pavement systems; Øusing neural network hybrids to select the most appropriate bidders for a construction project; and Øpredicting the Energy Performance Index of residential buildings. ØMany of the ideas and techniques discussed in this book cross across disciplinary boundaries and, therefore, should be of interest to all civil engineers.

Civil engineering guidelines for planning and designing hydroelectric developments

Technology Century

Canadian Journal of Civil Engineering

This resource is written for civil engineers who must take the "Engineering Surveying Exam as part of the "CE/PE Exam.Its chapters cover: * Horizontal Curve * Vertical Curve * Traverse * Area * Topographic Survey * Photogrammetry * Construction Survey * Leveling * Engineering Practice More than 70 example and sample problems are offered, each with a detailed solution.

Civil Engineering Guidelines for Planning and Designing Hydroelectric Developments

Founded in 1984 by Ronald Altoon and James Porter, Altoon + Porter has sustained

its growth through all economic cycles with a clear adherence to its core values. Commitment to respond to context, to create community and to serve its client's investment o

Civil Engineering ASCE.

Journal of the Boston Society of Civil Engineers Section, American Society of Civil Engineers

The U.S. government is faced with growing challenges to managing its facilities and infrastructure. A number of factors such as shrinking budgets, an aging workforce, and increasing costs demand new approaches to federal facilities management. The Federal Facilities Council of the NRC has sponsored a number of studies looking at ways to meet these challenges. This fourth study focuses on the people and skills that will needed to manage federal facilities in the next decade and beyond. The book presents a discussion of the current context of facilities management; an analysis of the forces affecting federal facilities asset management; an assessment of core competencies for federal facilities management; a comprehensive strategy for workforce development; and recommendations for implementing that strategy.

Engineering, Science, and Computer Jobs 1987

The Herbert S. Newman and Partners' monograph spans 35 years of the firm's humanistic approach to architectural design, featuring a variety of private and public projects completed throughout the United States. The firm has established a national reputat

For nearly two decades the architecture firm Weiss/Manfredi has practiced outside the traditional boundaries of architecture. Their work with complex sites and programs benefits from an interdisciplinary approach and a dynamic integration of architecture, art, infrastructure, and landscape design. *Surface/Subsurface* presents nine major projects that have been completed since their first monograph *Site Specific*, published in 2000. Their design process exemplary of the best contemporary architectural practices reveals potential in subsurface conditions with the goal of generating an entirely new language for the surface. Projects include the Olympic Sculpture Park in Seattle, which wanders over a highway and train lines; the Museum of the Earth in Ithaca, New York, which manipulates the movement of water, cars, and visitors; and the Smith College Campus Center in Northampton, Massachusetts, which transforms the brick campus into a luminous terracotta surface. Each project is fully documented through project photographs, drawings, details, and texts.

'Urban Spaces 5' offers an illustrated tour of a diversity of projects. John Morris Dixon explains the chief design challenges and the solutions developed by the outstanding firms profiled in this volume.

Engineering and Contracting

The U.S. Capitol Complex in Washington, D.C., comprises some of the most historic and symbolic buildings in the nation. The steam and chilled water required to heat and cool these buildings and related equipment is generated and distributed by the Capitol Power Plant (CPP) district energy system. Portions of the CPP system are now 50 to 100 years old and require renewal so that reliable utility services can be provided to the U.S. Capitol Complex for the foreseeable future. Evaluation of Future Strategic and Energy Efficient Options for the U.S. Capitol Power Plant provides comments on an interim set of publicly available consultant-generated options for the delivery of utility services to the U.S. Capitol Complex. The report provides recommendations to bring the interim options to completion, including suggestions for additional analyses, so that the CPP can be best positioned to meet the future strategic and energy efficiency requirements of the U.S. Capitol Complex.
