Broken Blade

“The next thing that happened to us was very interesting. It was as real as the half-crowns—not just pretending. I shall try to write it as like a real book as I can. Of course we have read Mr Sherlock Holmes, as well as the yellow-covered books with pictures outside that are so badly printed; and you get them for fourpence-halfpenny at the bookstall when the corners of them are beginning to curl up and get dirty, with people looking to see how the story ends when they are waiting for trains. I think this is most unfair to the boy at the bookstall. The books are written by a gentleman named Gaboriau, and Albert's uncle says they are the worst translations in the world—and written in vile English. Of course they're not like Kipling, but they're jolly good stories. And we had just been reading a book by Dick Diddlington—that's not his right name, but I know all about libel actions, so I shall not say what his name is really, because his books are rot.”

21st Century Education: A Reference Handbook

This volume represents an early attempt at assessing the Long War, now in its 14th year. Forged in the fires of the 9/11 attacks, the war includes campaigns against al Qaeda, major conflicts in Iraq and Afghanistan, and operations in the Horn of Africa, the Republic of the Philippines, and globally, in the air and on the sea. The authors herein treat only the campaigns in Afghanistan and Iraq, the largest U.S. efforts. It is intended for future senior officers, their advisors, and other national security decisionmakers. By derivation, it is also a book for students in joint professional military education courses, which will qualify them to work in the field of strategy. While the book tends to focus on strategic decisions and developments of land wars among the people, it acknowledges that the status of the United States as a great power and the strength of its ground forces depend in large measure on the dominance of the U.S. Navy and U.S. Air Force in their respective domains.

Anthem

Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. *Autonomous Horizons: The Way*

Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.

The HyperDoc Handbook

Liesl Shurtliff, New York Times bestselling author of *Rump: The True Story of Rumpelstiltskin*, continues the action-packed *Time Castaways* trilogy with book two, in which the Hudsons sail across time and history as they embark on a daring rescue mission. With magic, mystery, and adventure, this is perfect for fans of *Escape from Mr. Lemoncello's Library* and *Percy Jackson. Mateo, Ruby, and Corey Hudson* have lost their friend Jia to the villainous Captain Vincent's clutches, and now they're determined to bring her back to safety. But the Hudson kids don't have a way to time-travel without the Obsidian Compass, until Mateo figures out the secret component to get his own homemade compass working. Soon the whole family—plus their wacky neighbor, Chuck, and his rusty orange bus, Blossom—are swept up in another epic journey. With their own time-traveling vehicle and some help from history's most famous young markswoman, Annie Oakley, the Hudsons think they're prepared to sneak onto the Vermillion. Unbeknownst to them, Captain Vincent already knows they're coming. In fact, he's counting on it...

The Quest for a Moral Compass

This classroom resource provides clear, concise scientific information in an understandable and enjoyable way about water and aquatic life. Spanning the hydrologic cycle from rain to watersheds, aquifers to springs, rivers to estuaries, ample illustrations promote understanding of important concepts and clarify major ideas. Aquatic science is covered comprehensively, with relevant principles of chemistry, physics, geology, geography, ecology, and biology included throughout the text. Emphasizing water sustainability and conservation, the book tells us what we can do personally to conserve for the future and presents job and volunteer opportunities in the hope that some students will pursue careers in aquatic science. Texas Aquatic Science, originally developed as part of a multi-faceted education project for middle and high school students, can also be used at the college level for non-science majors, in the home-school environment, and by anyone who educates kids about nature and water. The project's home on the web can be found at

Dragon Mated

The story of the global search for moral truths In this remarkable and groundbreaking book, Kenan Malik explores the history of moral thought as it has developed over three millennia, from Homer's Greece to Mao's China, from ancient India to modern America. It tells the stories of the great philosophers, and breathes life into their ideas, while also challenging many of our most cherished moral beliefs. Engaging and provocative, *The Quest for a Moral Compass* confronts some of humanity's deepest questions. Where do values come from? Is God necessary for moral guidance? Are there absolute moral truths? It also brings morality down to earth, showing how, throughout history, social needs and political desires have shaped moral thinking. It is a history of the world told through the history of moral thought, and a history of moral thought that casts new light on global history.

Strange Case of Dr Jekyll and Mr Hyde

Feeling discouraged by the circumstances of your day-to-day life? Unsure whether praying about seemingly trivial needs is the right thing to do? Pick up Rosalind Goforth's *How I Know God Answers Prayer*. A missionary in China at the turn of the twentieth century, Goforth's family was mired in unimaginably dire straits and beset by numerous tragedies -- until she began reaching out in prayer. This inspiring book is sure to rejuvenate your faith in times of need.

William Golding's unforgettable classic of boyhood adventure and the savagery of humanity comes to Penguin Classics in a stunning Graphic Deluxe Edition with a new foreword by Lois Lowry As provocative today as when it was first published in 1954, *Lord of the Flies* continues to ignite passionate debate with its startling, brutal portrait of human nature. William Golding's compelling story about a group of very ordinary boys marooned on a coral island has been labeled a parable, an allegory, a myth, a morality tale, a parody, a political treatise, and even a vision of the apocalypse. But above all, it has earned its place as one of the indisputable classics of the twentieth century for readers of any age. This Penguin Classics Graphic Deluxe Edition features an array of special features to supplement the novel, including a foreword by Lois Lowry, an introduction by Stephen King, an essay by E. M. Forster, an essay on teaching and reading the novel and suggestions for further exploration by scholar Jennifer Buehler, and an extended note by E. L. Epstein, the publisher of the first American paperback edition of *Lord of the Flies*. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the

best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Into Thin Air

This is a powerful dramatisation of Daniel Keyes's perceptive and sad novel. Charlie is a retarded adult who desperately wants to be able to read and write. He undergoes a brain operation which increases his intelligence. Yet such an operation begs many questions--can Charlie's emotional development keep pace with the intellectual? How do the psychiatrists and psychologists view Charlie--as a man or as the subject of an experiment like the mouse, Algernon? And the biggest question of all--will the operation be successful?

Clementine and the Spring Trip

In the stunning conclusion to the Supernatural Prison trilogy, Jessa Lebron finds herself deep in the world of Larkspur, the dragon king. She will have to play it smart and fight with everything to stay one step ahead of him and while at times it's tough to keep her focus, she will do anything to escape and reunite with her boys, the Compass quads. Of course, it's impossible to be where she is and not dig deeper into the curse of the dragon mark. As more information is uncovered, she starts to understand why she, of all supernaturals, was the one to be singled out. And this changes everything she thought she knew. Turns out she doesn't know a damn thing. There will be decisions to make. Tough decisions. Jessa has to be strong enough for the sake of the supernatural races, but sometimes that's easier said than done.

Autonomous Horizons

Although more and more students have the test scores and transcripts to get into college, far too many are struggling once they get there. These students are surprised to find that college coursework demands so much more of them than high school. For the first time, they are asked to think deeply, write extensively, document assertions, solve non-routine problems, apply concepts, and accept unvarnished critiques of their work. College Knowledge confronts this problem by looking at the disconnect between what high schools do and what colleges expect and proposes a solution by identifying what students need to know and be able to do in order to succeed. The book is based on an extensive three-year project sponsored by the Association of American Universities in partnership with The Pew Charitable Trusts. This landmark research identified what it takes to succeed in entry-level university courses. Based on the project's findings - and interviews with students, faculty, and staff - this groundbreaking book delineates the cognitive skills and subject area

knowledge that college-bound students need to master in order to succeed in today's colleges and universities. These Standards for Success cover the major subject areas of English, mathematics, natural sciences, social sciences, second languages, and the arts.

Children's Writer's Word Book

A series of sidesplitting adventures from the iconic American writer. Originally published over one hundred years ago, *Roughing It* tells the (almost) true story of Mark Twain's rollicking adventures across the United States. A hilarious account of how the author tried finding wealth in the rocks of Nevada, it was published before his most famous works and shows why he would grow to become one of the most beloved American writers of all time. The story follows many of Twain's early adventures, including a visit to Salt Lake City, gold and silver prospecting, real estate speculation, a journey to the Kingdom of Hawaii, and his beginnings as a writer. Through his attempts to strike it rich, he meets a motley crew of colorful people, while weaving through humorous mishaps and standing through it all with the endearingly good humor for which he's famous. The memoir showcases Twain's razor-sharp wit (as well as a healthy imagination), which would later become his trademark style in *The Adventures of Huckleberry Finn*, *The Adventures of Tom Sawyer*, and *A Connecticut Yankee in King Arthur's Court*. From stagecoach travel to the etiquette of gold hunting, *Roughing It* makes a classic addition to your Mark Twain library and is a perfect example of how funny the world can be when you're traveling with the right person.

Time Castaways #2: The Obsidian Compass

In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. His name was Christopher Johnson McCandless. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a

certain cast of mind; the complex, charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page. From the Trade Paperback edition.

Designing Your Life

Siddhartha

#1 New York Times Bestseller At last, a book that shows you how to build—design—a life you can thrive in, at any age or stage Designers create worlds and solve problems using design thinking. Look around your office or home—at the tablet or smartphone you may be holding or the chair you are sitting in. Everything in our lives was designed by someone. And every design starts with a problem that a designer or team of designers seeks to solve. In this book, Bill Burnett and Dave Evans show us how design thinking can help us create a life that is both meaningful and fulfilling, regardless of who or where we are, what we do or have done for a living, or how young or old we are. The same design thinking responsible for amazing technology, products, and spaces can be used to design and build your career and your life, a life of fulfillment and joy, constantly creative and productive, one that always holds the possibility of surprise. "Designing Your Life walks readers through the process of building a satisfying, meaningful life by approaching the challenge the way a designer would. Experimentation. Wayfinding. Prototyping. Constant iteration. You should read the book. Everyone else will." —Daniel Pink, bestselling author of *Drive* "This [is] the career book of the next decade and . . . the go-to book that is read as a rite of passage whenever someone is ready to create a life they love." —David Kelley, Founder of IDEO "An empowering book based on their popular class of the same name at Stanford University . . . Perhaps the book's most important lesson is that the only failure is settling for a life that makes one unhappy. With useful fact-finding exercises, an empathetic tone, and sensible advice, this book will easily earn a place among career-finding classics." —Publishers Weekly From the Hardcover edition.

The Miraculous Journey of Edward Tulane

For Clementine, spring is a really big deal. It's the time for seeing her apple tree start to grow, for watching her friend Margaret go crazy with spring cleaning, and for going on the school trip to Plimoth Plantation. Clementine is ready for Ye Olden Times, but she isn't so sure about surviving lunch there—the fourth graders have strict rules about no eating sounds. (What is snicking, anyway?) If that wasn't enough, Clementine also faces the challenges of learning Olive-language and surviving The Cloud on Bus 7. Hearing the pilgrim lady talk about why she made the long journey from England makes Clementine think about rules. Who makes them, and what do they mean to the people who have to live with them? Today Clementine has to decide which rules are made to be broken.

Unbroken

Strange Case of Dr Jekyll and Mr Hyde is a novella written by the Scottish author Robert Louis Stevenson and first published in 1886. It is about a London lawyer who investigates strange occurrences between his old friend, Dr Henry Jekyll, and the misanthropic Edward Hyde. The work is known for its vivid portrayal of a split personality, split in the sense that within the same person there is both an apparently good and an evil personality each being quite distinct from each other; in mainstream culture the very phrase "Jekyll and Hyde" has come to mean a person who is vastly different in moral character from one situation to the next. This is different from multiple personality disorder where the different personalities do not necessarily differ in any moral sense. Strange Case of Dr Jekyll and Mr Hyde was an immediate success and one of

Stevenson's best-selling works. Stage adaptations began in Boston and London within a year of its publication and it has gone on to inspire scores of major film and stage performances.

College Knowledge

When Jon Krakauer reached the summit of Mt. Everest in the early afternoon of May 10, 1996, he hadn't slept in fifty-seven hours and was reeling from the brain-altering effects of oxygen depletion. As he turned to begin the perilous descent from 29,028 feet (roughly the cruising altitude of an Airbus jetliner), twenty other climbers were still pushing doggedly to the top, unaware that the sky had begun to roil with clouds. *Into Thin Air* is the definitive account of the deadliest season in the history of Everest by the acclaimed *Outside* journalist and author of the bestselling *Into the Wild*. Taking the reader step by step from Katmandu to the mountain's deadly pinnacle, Krakauer has his readers shaking on the edge of their seat. Beyond the terrors of this account, however, he also peers deeply into the myth of the world's tallest mountain. What is it about Everest that has compelled so many people—including himself—to throw caution to the wind, ignore the concerns of loved ones, and willingly subject themselves to such risk, hardship, and expense? Written with emotional clarity and supported by his unimpeachable reporting, Krakauer's eyewitness account of what happened on the roof of the world is a singular achievement. From the Paperback edition.

The Play of Daniel Keyes' Flowers for Algernon

To save a stranger's life, she put her own in the hands of a man who represented everything she loathed. Young CEO Marie Archer was shocked when her brother, Joseph, returned from the Middle East with a contract for a new office in the Kingdom of Alfidya, a royal fiancée, and a wedding four days away. Despite her concern over his rush to get married, there was nothing Marie wouldn't do for Joseph. She silenced the alarm bells echoing in her head and traveled halfway across the world with him to attend the wedding. The language barrier in Alfidya disoriented Marie, and she was bewildered when traditions demanded her involvement in the ceremony as the groom's sister. The bride's brother, Crown Prince Mazen Alfidy, fascinated Marie; a breathtakingly handsome man with mysterious eyes, his silent attentions to her only increased her confusion. The last thing she expected was the brutal betrayal by her beloved brother, forcing her into an arranged marriage with Prince Mazen to seal a Sisters Trading deal. Confined in the palace with a perfect stranger - a husband she doesn't know or trust - Marie's life is riddled with lies and secrets. Royal intrigue, traditions, and rules have put her in danger. Now, the new princess has a lot to learn, and many black keys to find. Can she open her heart to a world so unlike her own, or will her prejudices prevent her from finding happiness? Because when it comes to love, rules blur and traditions fade.

Popular Science

Siddhartha is a 1922 novel by Hermann Hesse that deals with the spiritual journey of self-discovery of a man named Siddhartha during the time of the Gautama Buddha. The book, Hesse's ninth novel, was written in German, in a simple, lyrical style. It was published in the U.S. in 1951 and became influential during the 1960s. Hesse dedicated the first part of it to Romain Rolland and the second to Wilhelm Gundert, his cousin. The word Siddhartha is made up of two words in the Sanskrit language, siddha (achieved) + artha (what was searched for), which together means "he who has found meaning (of existence)" or "he who has attained his goals". In fact, the Buddha's own name, before his renunciation, was Siddhartha Gautama, Prince of Kapilvastu. In this book, the Buddha is referred to as "Gotama".

Lord of the Flies

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

A Little History of the World

Kit Colbana: assassin, thief, investigator extraordinaire. Now broken. She always expected her past to catch up with her but never like this. Haunted by nightmares and stripped of her identity, she's retreated to Wolf Haven, the no-man's land where she found refuge years before. But while she might want to hide away from the rest of the world, the rest of the world isn't taking the hint. Dragged kicking and screaming back into life, Kit is thrust head-first into an investigation surrounding the theft of an ancient relicone that she wants nothing to do with. Her instincts tell her it's a bad idea to just leave the relic lying about, but finding it might be just as bad. Forced to face her nightmares, she uncovers hidden strength and comes face to face with one of the world's original monsters. If she survives the job, she won't be the same and neither will those

closest to her.

Compass Math Test Success

This comprehensive text reviews all areas related to technology, especially computer-based technology in K-12 schools. The objective is to help pre-service and in-service teachers reflect upon and discover the range of issues that need to be addressed in order to achieve successful integration of computer-based technology for teaching and learning into the K-12 curriculum. Particular emphasis is on practical applications and hands-on learning. The second edition has stronger coverage of the Internet and distance learning. Three of the four new case studies focus on the Internet, the World Wide Web, and multimedia, and new "Surf the Web" suggestions end every chapter. The revision has been extensively restructured in order to begin immediately with discussion of K-12 computer-based teaching and learning with societal computing issues now covered much later in the text. Chapter 1, What the Research Has to Say about Technology Use in Teaching and Learning, is new to the 2/e. A new Appendix covers the History of Computers in Schools.

Into the Wild

Why has an economy that has done so many things right failed to grow fast? Under-Rewarded Efforts traces Mexico's disappointing growth to flawed microeconomic policies that have suppressed productivity growth and nullified the expected benefits of the country's reform efforts. Fast growth will not occur doing more of the same or focusing on issues that may be key bottlenecks to productivity growth elsewhere, but not in Mexico. It will only result from inclusive institutions that effectively protect workers against risks, redistribute towards those in need, and simultaneously align entrepreneurs' and workers' incentives to raise productivity.

Life on an Ocean Planet

During World War II a community called Manzanar was hastily created in the high mountain desert country of California, east of the Sierras. Its purpose was to house thousands of Japanese American internees. One of the first families to arrive was the Wakatsukis, who were ordered to leave their fishing business in Long Beach and take with them only the belongings they could carry. For Jeanne Wakatsuki, a seven-year-old child, Manzanar became a way of life in which she struggled and adapted, observed and grew. For her father it was essentially the end of his life. At age thirty-seven, Jeanne Wakatsuki Houston recalls life at Manzanar through the eyes of the child she was. She tells of her fear, confusion, and bewilderment as well as the dignity and great resourcefulness of people in oppressive and demeaning circumstances. Written with her husband, Jeanne delivers a powerful first-person account that reveals her search for the meaning of Manzanar. Farewell to Manzanar has become a staple of curriculum in schools and on campuses across the country. Last year the San Francisco Chronicle named it one of the twentieth century's 100 best nonfiction books from west of the Rockies. First published in 1973, this new edition of the classic memoir of a devastating Japanese American experience includes an inspiring afterword by the authors.

Equality 7-2521 finds himself out of step with the collectivist society of the future, and discovers a means to freedom in Ayn Rand's fable of the individual in conflict with society. First published in 1938, Anthem takes place in a dystopian future world in which humanity is enduring a new dark age, human life is regimented in every respect and personal identity has been all but snuffed out by a totalitarian government. The narrator, writing his story in secret, realizes he is a criminal simply for having thoughts of his own. Exploring the ruins of a previous civilization he discovers relics, conducts forbidden experiments and learns enough to question the very structure of his society. Can he share this knowledge with his fellow citizens? The author strips the relationship of humanity to civilization down to its bare essence in this modern parable that starkly illuminates the challenge an oppressive government presents to individuality. With an eye-catching new cover, and professionally typeset manuscript, this edition of Anthem is both modern and readable.
