Why Write?

How to Write a Good Scientific Paper

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

The American Magazine

The definitive research paper guide, Lester combines a traditional and practical approach to the research process with the latest information on researching and writing online. Comprehensive, but not overwhelming, Lester provides students

with step-by-step guidance through the research writing process from selecting and narrowing a topic, to formatting the finished document. And it backs up the instruction with the most complete array of samples of any research writing guide on the market. Another of the text's ongoing strengths is its extremely thorough and accurate coverage of citation styles for a wide variety of disciplines. This edition maintains Lester's successful approach while detailing the uses of new computer technologies that are changing the face of research. In addition, an all-new Interactive Edition CD-ROM offers the entire text in an electronic format for easy reference while writing and researching on a computer. Numerous multimedia features include: interactive research activities, weblinks, and resources. The CD is FREE when bundled with the text. Available at an unbelievably low price in two formats perfect and spiral-bound with tabs Lester's text is one that students will keep throughout their college careers.

Photographer's Market

The authors in this book ask us to consider whether the perception of beauty has been defined by our genetics and culture over the years - has it grown and changed? Do certain neural connections define our emotional reactions to beauty? Does beauty follow any rules or laws? Can the aspiration toward beauty be detrimental? Can we divorce ourselves from dictates and sink into a mindful connection with our internal beauty? Can we move from the superficial where "beauty is only skin deep" to an intense appreciation of beauty in all of its variations. The Perception of Beauty will lead to a deeper understanding and contemplation of nature, art, and the world around us.
