Where do your ideas about marriage come from? Do you expect too much--or too little--from your marriage? Dan B. Allender and Tremper Longman III have together written this inductive Bible study guide to help couples build healthy and happy marriages. Through six study sessions for individuals, couples or groups, they guide you in uncovering and addressing unmet expectations that you or your spouse may have about marriage. Intimate Marriage Bible studies bring spouses into deeper communion with God and with each other. In marriage a man and a woman are called to leave their families of origin, to weave their individual lives into a unity and to cleave to each other. How can fallen human beings even begin to contemplate this ideal--God's ideal? These studies will help you take small but real steps toward honoring the image of God in each other and living out God's goal for marriage. As you explore and respond to Scripture together, you will discover strength and beauty in your marriage and become even more intimate companions.

In this remarkable new photographic history, local historian and photographer Dennis LeBeau presents a heartwarming tale of life in the Brookfields at the turn of the century. The photographs in this collection are those of William Bullard, an itinerant photographer in the 1890s and early 1900s from North Brookfield, whose work has never before been published in book form. The story of Bill Bullard's life and photographic legacy are dramatically revealed in this fascinating glimpse into the past. After the photographer's untimely and tragic demise, the rich photographic archives of Bill Bullard were carefully preserved by his brother, Charlie Bullard, and three generations of the neighboring Gaudette family. Dennis LeBeau has individually reprinted each image in this collection from its original glass plate negative. Mr. LeBeau's researched and well-informed captions accompany the photographs in Bullard's collection, creating a comprehensive historic portrait of both the Brookfields and the Bullard family.

Powerful Occupational Therapists examines the life and times of a small group of occupational therapy leaders and scholars in a post-1950s America, to market their profession as one of increasing importance. Participating in the 1950s rehabilitation, the 1960s equal rights, and the 1970s women's movements, these innovators, being primarily women, aimed to define themselves as having professional and scientific authority that was distinct from the male-dominated medical model. The community of therapists faced challenges such as that of retaining the appearance of being "ladylike" whilst doing "unladylike" tasks. This book describes the personal experiences of 12 differing occupational therapists and it

identifies how a group of them strengthened and developed the profession in the face of diverse challenges. This volume would be of interest to those studying occupational therapy, women and medicine and the history of medicine. This book was originally published as a special issue of Occupational Therapy in Mental Health.

Currently people deal with various entities (such as hardware, software, buildings, spaces, communities and other people), to meet specific goals while going about their everyday activities in work and leisure environments. These entities have become more and more complex and incorporate functions that hitherto had never been allocated such as automation, use

Divided into thematic sections, part one covers the history and natural course of the care, policies and laws that have been developed over the years for persons with disabilities, as well as the biomechanics and technology of wheelchair sports and adaptive sports prostheses. The medical considerations of the adaptive athlete comprise part two, including injury epidemiology, emergent care, and surgical and rehabilitative considerations. Part three, by far the most extensive section, discusses specific wheelchair and adaptive sports, including adaptive running, cycling, water sports and throwing sports, wheelchair basketball, softball and rugby, as well as adaptive combative and extreme sports. Historically, the United States has been viewed by generations of immigrants as the land of opportunity, where through hard work one can prosper and make a better life. The American Dream is perhaps the United States' most common export. For many Americans, though, questions remain about whether the American Dream can be achieved in the twenty-first century. Americans, faced with global competition and increased social complexity, wonder whether their dwindling natural resources, polarized national and local politics, and often unregulated capitalism can support the American Dream today. This book examines the ideas and experiences that have formed the American Dream, assesses its meaning for Americans, and evaluates its prospects for the future.

Excerpt from Penny Capitalism: A Guatemalan Indian Economy Panajachel, more than other lake towns, occupies a place of importance on an east-west trading axis as well. There is considerable commerce between communities such as Quezaltenango and Totonicapan in the western highlands and Guatemala City to the east. One of the two main highways passes through Panajachel, and Indians afoot with their freight, or in trucks, and no little Ladino passenger travel in busses and private cars, keep the road busy. Most of the traffic simply passes through, but some of the travelers make Panajachel an overnight stop and of course a portion of the freight has its origin or its terminus here. Panajachel is the only lake town that is thus on a major cross roads. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. "This biography traces the output of jazz master Charles Mingus--his recordings, his compositions, and his writings--highlighting key moments in his life and musicians who influenced him and were influenced by him. As a young man, Mingus played with Louis Armstrong as well as with Kid Ory. Mingus also played in bands led by Duke Ellington, Charlie Parker, Lionel Hampton, Red Norvo, Art Tatum, and many others. He began leading his own bands in New York City in 1955. Eric Dolphy, Rahsaan Roland Kirk, Jimmy Knepper, Jackie McLean, Toshiko Akiyoshi, Cat Anderson, and Jaki Byard are among the many distinguished jazz artists who made music with Mingus during the 1950s, 1960s, and 1970s. In

addition to leaving behind a large collection of compelling recordings by large and small units, Mingus was also a talented writer. His autobiography, *Beneath the Underdog: His World Composed by Mingus*, is unlike any other book by a major jazz artist. Mingus creates vivid portraits of the many people who passed through his life and tells his story with compelling prose. Mingus also wrote a good deal of poetry and prose, all of it reflecting his unique vision. In 1977 he was diagnosed with amyotrophic lateral sclerosis. After several months of steady deterioration, he died in 1979 in Mexico"--Provided by publisher.

Macrosociology--the study of large-scale social structures and the fundamental principles of social organization--was the style of sociology practiced by the founders of the discipline. Today, the social theories of Karl Marx, Max Weber, Émile Durkheim, and Herbert Spencer (among others) are commonly studied as part of the history of the field, but, although the macrosociological approach that these thinkers advocated is still employed, it no longer dominates the discipline. Instead, sociologists typically adopt a narrower focus, specializing in areas such as social psychology, medicine, religion, or the study of social stratification. Examining the bigger picture is a task often left to public intellectuals. Sociocultural Systems aims to reinstate macrosociology as the heart of the discipline by demonstrating that both classical and contemporary macrosociologists stand upon common ground. Focusing on the broad issues that concerned the founders, Elwell addresses questions such as: Historically, what factors accounted for the origin, survival, and evolution of sociocultural systems? Why were some societies more technologically advanced than others? What is the origin of capitalism? What factors determine the allocation of goods and services within and among societies? What effects do changes in government and economic institutions have on communities? Elwell argues that, as evolution does for biology, the macrosociological paradigm offers an analytical strategy that can be used both to guide and prioritize research in all of the myriad specialties within sociology

and to lay forth an orderly body of knowledge for students. Clearly articulating important sociological principles, Sociocultural Systems provides a critical understanding of social institutions and issues, while also furnishing a framework for possible solutions to the perennial social crises that are part and parcel of the development of human societies.
