### King: The Epilogue Collection

Finally meet the enigma that is King. Our love wasn't like everyone else's. There wasn't a first date or flowers and gifts. We didn't have a song or cute nicknames for each other. There were no calls during the day to check in with me, no coming home to cook me dinner, and no foot massages at the end of a long day. That wasn't how he loved. But love me he did. Madly, deeply, passionately, completely. King loved with everything he had. He just loved a little differently to most. This is King's story. From the beginning. All the ugly and all the beautiful, by the end of this duet you will come to understand the man behind the club. King's story will be told over two books - King's Wrath & King's Reign. ## **Relent**

Nature is fragile, environmentalists often tell us. But the lesson of this book is that it is not so. The truth is far more worrying. Nature is strong and packs a serious counterpunch . . . Global warming will very probably unleash unstoppable planetary forces. And they will not be gradual. The history of our planet's climate shows that it does not do gradual change. Under pressure, whether from sunspots or orbital wobbles or the depredations of humans, it lurches-virtually overnight. —from the Introduction Fred Pearce has been writing about climate change for eighteen years, and the more he learns, the worse things look. Where once scientists were concerned about gradual climate change, now more and more of them fear we will soon be dealing with abrupt change resulting from triggering hidden tipping points. Even President Bush's top climate modeler, Jim Hansen, warned in 2005 that "we are on the precipice of climate system tipping points beyond which there is no redemption." As Pearce began working on this book, normally cautious scientists beat a path to his door to tell him about their fears and their latest findings. With *Speed and Violence* tells the stories of these scientists and their work—from the implications of melting permafrost in Siberia and the huge river systems of meltwater beneath the icecaps of Greenland and Antarctica to the effects of the "ocean conveyor" and a rare molecule that runs virtually the entire cleanup system for the planet. Above all, the scientists told him what they're now learning about the speed and violence of past natural climate change—and what it portends for our future. *With Speed and Violence* is the most up-to-date and readable book yet about the growing evidence for global warming and the large climatic effects it may unleash.

### **Homo Deus**

"A candid look at the cultural factors that lend themselves to tolerance of abuse and violence against women."—Booklist Revised and updated to include current studies, politics, and discussions, *The Macho Paradox* is the first book to show how violence against women is a male issue as well as a female one — and how we can come together to stop it. Written by pioneering anti-violence educator Jackson Katz, *The Macho Paradox* incorporates the voices and experiences of women and men who have confronted the problem from all angles, the discussions surrounding current events in politics and pop-culture, and where the violence is ignored or encouraged in our upbringing. Katz also offers cogent explanations for why so many men harass and hurt women, and he shows what can be done to stop the violence. By working together as allies, Katz shows how all genders can end the abuse and mistreatment of women. Additional Praise for *The Macho Paradox*: "If only men would read Katz's book, it could serve as a potent form of male consciousness-raising."—Publishers Weekly "These pages will empower both men and women to end the scourge of male violence and abuse. Katz knows how to cut to the core of the issues, demonstrating undeniably that stopping the degradation of women should be every man's priority."—Lundy Bancroft, author of *Why Does He Do That?: Inside the Minds of Angry and Controlling Men*

### **Nitro's Torment**

In this ground-breaking study of the complex relationship between war, gender, and citizenship in Great Britain during World War I, Nicoletta Gullace shows how the assault on civilian masculinity led directly to women's suffrage. Through recruiting activities such as handing out white feathers to reputed 'cowards' and offering petticoats to unenlisted 'shirkers', female war enthusiasts drew national attention to the fact that manhood alone was an inadequate marker of civic responsibility. Proclaiming women's exemplary service to the nation, feminist

organizations tapped into a public culture that celebrated military service while denigrating those who opposed the war. Drawing on the vast range of popular and official sources, Gullace reveals that the war had revolutionary implications for women who wished to vote and for men who were expected to fight.

## **Space in America**

In the 1960's marked changes occurred throughout the world in philosophies and policies related to man's role in life. These changes, prompted predominantly by extensive increases in knowledge and population density, have produced increased pleasures as well as problems. The rising number of people and improved methods of communication and transportation have caused more relationships among people, with their pleasures, competitions, jealousies, conflicts of interest, oppressions, and crimes. Large assortments of drugs have been developed and are easily obtained. There are drugs to speed us up, slow us down, make us sleep, change our perspectives on life, promote propagation of life or prevent it, prolong life or terminate it, and modify the course of life in many ways. Also, numerous mechanical devices have been developed that influence the propagation of life, the termination of life, and the manner in which we live. Many people have changed their overall goals in life, and in particular have experienced major changes in attitudes and policies applying to sexual activity, marriage, birth control, abortion, welfare, children, old people, criminals, economics, social status, careers, education, euthanasia, and suicide. There also has been marked enlightenment concerning the effect of the chemical and physical status of the brain upon normal and abnormal thinking and behavior.

The Mass Ornament today remains a refreshing tribute to popular culture, and its impressively interdisciplinary writings continue to shed light not only on Kracauer's

later work but also on the ideas of the Frankfurt School, the genealogy of film theory and cultural studies, Weimar cultural politics, and, not least, the exigencies of intellectual exile.

### **Revive (Storm MC #4)**

The starting point for this compilation is the wish to rethink the concept of antisemitism, race and gender in light of Sartre's pioneering *Réflexions sur la Question Juive* seventy years after its publication. The book gathers texts by prestigious scholars from different disciplines in the Humanities and the Social Sciences, with the objective of revisiting this work locating it within the setting of two other pioneering – and we argue, related – publications, namely Simone De Beauvoir's *Le deuxième sexe* of 1949 and Franz Fanon's *Peau noire et masques blancs* of 1952. This particular and original standpoint sheds new light on the different meanings and political functions of the concept of antisemitism in a political and historical context marked by the post-modern concepts of multi-ethnicity and multiculturalism.

### **To Live and To Die: When, Why, and How**

This study reinterprets a crucial period (1870s-1920s) in the history of women's rights, focusing attention on a core contradiction at the heart of early feminist theory. At a time when white elites were concerned with imperialist projects and civilizing missions, progressive white women developed an explicit racial ideology to promote their cause, defending patriarchy for "primitives" while calling for its elimination among the "civilized." By exploring how progressive white women at the turn of the century laid the intellectual groundwork for the feminist social movements that followed, Louise Michele Newman speaks directly to contemporary debates about the effect of race on current feminist scholarship. "White Women's Rights is an important book. It is a fascinating and informative account of the numerous and complex ties which bound feminist thought to the practices and ideas which shaped and gave meaning to America as a racialized society. A compelling read, it moves very gracefully between the general history of the feminist movement and the particular histories of individual women."--Hazel Carby, Yale University

### **The Macho Paradox**

Even as "network" has become a contemporary keyword, its overuse has limited its analytic usefulness. In the enthusiasm that orbits the concept, the network is too easily taken up as a term that we should already know. Patrick Jagoda claims that we do not, in fact, know networks, in part because of their very ubiquity and variety. His book shows how a range of popular aesthetic forms mediate our experience of networks and yield up greater insight into this critical concept. Each chapter of "Network Aesthetics" considers how a different contemporary genre makes sense of decentralized network structure, from fiction, film, and television to popular videogames such as Introversion's "Uplink," experimental games such as Jason Rohrer's "Between," and emergent transmedia storytelling forms such as "Alternate Reality Games." Jagoda wants to show that network aesthetics, in all of

these cases, are not simply the quality of a genre; more substantively, they are a critical corollary to an era in which interconnection has become a key cultural framework. "Network Aesthetics" cuts through the cliches of sublime interconnection and illuminates the ordinary, lived aspects of networked life.

"A truly exceptional book."—Washington Post There's bad news and good news about the Cutter High School swim team. The bad news is that they don't have a pool. The good news is that only one of them can swim anyway. Bestselling author Chris Crutcher's controversial and acclaimed novel follows a group of outcasts as they take on inequality and injustice in their high school. "Crutcher's superior gifts as a storyteller and his background as a working therapist combine to make magic in Whale Talk. The thread of truth in his fiction reminds us that heroes can come in any shape, color, ability or size, and friendship can bridge nearly any divide."—Washington Post T.J. Jones hates the blatant preferential treatment jocks receive at his high school, and the reverence paid to the varsity lettermen. When he sees a member of the wrestling team threatening an underclassman, T.J. decides he's had enough. He recruits some of the biggest misfits at Cutter High to form a swim team. They may not have very much talent, but the All-Night Mermen prove to be way more than T.J. anticipated. As the unlikely athletes move closer to their goal, these new friends might learn that the journey is worth more than the reward. For fans of Andrew Smith and Marieke Nijkamp. "Crutcher offers an unusual yet resonant mixture of black comedy and tragedy that lays bare the superficiality of the high-school scene. ### **Multimedia**

America's sense of space has always been tied to what Hayden White called the narrativization of real events. If the awe-inspiring manifestations of nature in America (Niagara Falls, Virginia's Natural Bridge, the Grand Canyon, etc.) were often used as a foil for projecting utopian visions and idealizations of the nation's exceptional place among the nations of the world, the rapid technological progress

and its concomitant appropriation of natural spaces served equally well, as David Nye argues, to promote the dominant cultural idiom of exploration and conquest. From the beginning, American attitudes towards space were thus utterly contradictory if not paradoxical; a paradox that scholars tried to capture in such hybrid concepts as the middle landscape (Leo Marx), an engineered New Earth (Cecelia Tichi), or the technological sublime (David Nye). Not only was America's concept of space paradoxical, it has always also been a contested terrain, a site of continuous social and cultural conflict. Many foundational issues in American history (the dislocation of Native and African Americans, the geo-political implications of nation-building, immigration and transmigration, the increasing division and clustering of contemporary American society, etc.) involve differing ideals and notions of space. Quite literally, space and its various ideological appropriations formed the arena where America's search for identity (national, political, cultural) has been staged. If American democracy, as Frederick Jackson Turner claimed, is born of free land, then its history may well be defined as the history of the fierce struggles to gain and maintain power over both the geographical, social and political spaces of America and its concomitant narratives. The number and range of topics, interests, and critical approaches of the essays gathered here open up exciting new avenues of inquiry into the tangled, contentious relations of space in America. Topics include: Theories of Space - Landscape / Nature - Technoscape / Architecture / Urban Utopia - Literature - Performance / Film / Visual Arts.

### **It IS About Islam**

" Everyone has an animal story--the pet they loved or hated, the wild animal that captured their childhood imagination, the nasty dog at the end of the street, the deer your uncle shot or your neighbor hit while driving. Telling stories about animals is part of how we tell the story of being human, but recent scientific breakthroughs in animal cognition, the exploding interdisciplinary field of animal studies, and global climate change have all complicated these stories. *Animal Acts* collects some of the most exciting, provocative, and moving solo performances on animals, grounded by commentaries that help put these engaging works in a larger context. *Animal Acts* includes the work of leading theater artists Holly Hughes, Rachel Rosenthal, Deke Weaver, Carmelita Tropicana, and others, along with commentary by major scholars including Donna Haraway, Jane Desmond, Jill Dolan, and Nigel Rothfels. A masterful introduction by Una Chaudhuri provides readers a useful foundation for understanding and appreciating the intersection of animal studies and performance. The anthology makes an important contribution to several fields as it foregrounds questions of race, gender, sexuality, class, nation, and other issues central to the human project within the discourse of the "post human." The collection will be of interest to those interested in solo performance, animal studies, gender studies, performance studies, and environmental studies"--

How does technology alter thinking and action without our awareness? How can instantaneous information access impede understanding and wisdom? How does technology alter conceptions of education, schooling, teaching and what learning entails? What are the implications of these and other technology issues for society? Meaningful technology education is far more than learning how to use technology. It entails an understanding of the nature of technology — what technology is, how and why technology is developed, how individuals and society direct, react to, and are sometimes unwittingly changed by technology. This book places these and other issues regarding the nature of technology in the context of learning, teaching and schooling. The nature of technology and its impact on education must become a significant object of inquiry among educators. Students must come to understand the nature of technology so that they can make informed decisions regarding how technology may influence thinking, values and action, and when and how technology should be used in their personal lives and in society. Prudent choices regarding technology cannot be made without understanding the issues that this book raises. This book is intended to raise such issues and stimulate thinking and action among teachers, teacher educators, and education researchers. The contributions to this book raise historical and philosophical issues regarding the nature of technology and their implications for education; challenge teacher educators and teachers to promote understanding of the nature of technology; and provide practical considerations for teaching the nature of technology.

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

#1 bestselling author and radio host Glenn Beck exposes the real truth behind the roots of Islamic extremism in Muslim teachings in this sharply insightful handbook that debunks commonly held assumptions about Islam and the dream of a renewed caliphate. From the barbarians of ISIS to the terror tactics of Al-Qaeda and its offshoots, to the impending threat of a nuclear Iran, those motivated by extreme fundamentalist Islamic faith have the power to endanger and kill millions. The conflict with them will not end until we face the truth about those who find their inspiration and justification in the religion itself. Drawing on quotes from the Koran and the hadith, as well as from leaders of ISIS, Al Qaeda, and the Muslim Brotherhood, Glenn Beck seeks to expose the true origins of Islamic extremism as well as the deadly theological motivations behind these agencies of destruction. Using the same unique no-holds-barred style from his bestselling books *Control* and *Conform*, Glenn Beck offers straight facts and history about the fundamental beliefs that inspire so many to kill.
