The healthy diet plan that's become a million-copy word-of-mouth bestseller -- now completely revised and updated. Hailed a "medical breakthrough" by Dr. Mehmet Oz, Eat to Live offers a highly effective, scientifically proven way to lose weight quickly. The key to Dr. Joel Fuhrman's revolutionary six-week plan is simple: health = nutrients / calories. When the ratio of nutrients to calories in the food you eat is high, you lose weight. The more nutrient-dense food you eat, the less you crave fat, sweets, and high-caloric foods. Eat to Live has been revised to include inspiring success stories from people who have used the program to lose shocking amounts of weight and recover from life-threatening illnesses; Dr. Fuhrman's nutrient density index; up-to-date scientific research supporting the principles behind Dr. Fuhrman's plan; new recipes and meal ideas; and much more. This easy-to-follow, nutritionally sound diet can help anyone shed pounds quickly-and keep them off.

Programmed Visions

Years after her death, Princess Diana remains a mystery. Was she “the people’s princess,” who electrified the world with her beauty and humanitarian missions? Or was she a manipulative, media-savvy neurotic who nearly brought down the monarchy? Only Tina Brown, former Editor-in-Chief of Tatler, England’s glossiest gossip magazine; Vanity Fair; and The New Yorker could possibly give us the truth. Tina knew Diana personally and has far-reaching insight into the royals and the Queen herself. In *The Diana Chronicles*, you will meet a formidable female cast and understand as never before the society that shaped them: Diana's sexually charged mother, her scheming grandmother, the stepmother she hated but finally came to terms with, and bad-girl Fergie, her sister-in-law, who concealed wounds of her own. Most formidable of them all was her mother-in-law, the Queen, whose admiration Diana sought till the day she died. Add Camilla Parker-Bowles, the ultimate "other woman" into this combustible mix, and it's no wonder that Diana broke out of her royal cage into celebrity culture, where she found her own power and used it to devastating effect.

Street Art London

Street Art London is focused on the best of London's many street artists. The

ephemeral pieces that infuse the street scene with new meaning are preserved in this book, which also sets them in a broader context. Full of unique quotes from the artists, Street Art London is an eminent opportunity to find the cream of the crop and to become inspired by, and acquainted with, the street artists of London. Introduction by Davis Stuart aka Nolionsinengland.

Architecture Depends

Education for Sustainability is a key priority in today's schools, as our society seeks to find a balance between environmental, social, cultural, political and economic imperatives that affect our future. As young children will become the next generation of adults, it is vital that they are educated about sustainability issues, so that they can learn to make informed decisions and take positive action for a sustainable world. Teachers are ideally placed to educate for sustainability issues, and indeed have a responsibility to do so. However, they often lack support and experience in this area, and constraints of current curriculum priorities can inhibit Education for Sustainability being taught effectively in many classrooms. Educating for Sustainability in Primary Schools: Teaching for the Future addresses this problem by showing how Education for Sustainability can be developed within and across all areas of the primary curriculum in the Australian and New Zealand contexts. The book provides a range of educational approaches and examples of activities to support teachers in addressing national requirements for teaching the

major primary curriculum learning areas, while simultaneously educating for sustainability. This integrative approach to primary education can promote knowledge of, positive attitudes towards and suitable action for sustainability in relevant, meaningful, enjoyable and creative ways. This book is a valuable resource for all primary teachers who wish to make a real difference to educating children for the future.

Safeguarding Traditional Cultures

Winner of the 2010 Bancroft Prize and finalist for the 2009 Los Angeles Times Book Prize in Biography: The definitive biography of a heroic chronicler of America's Depression and one of the twentieth century's greatest photographers. We all know Dorothea Lange's iconic photos—the Migrant Mother holding her child, the shoeless children of the Dust Bowl—but now renowned American historian Linda Gordon brings them to three-dimensional life in this groundbreaking exploration of Lange's transformation into a documentarist. Using Lange's life to anchor a moving social history of twentieth-century America, Gordon masterfully re-creates bohemian San Francisco, the Depression, and the Japanese-American internment camps. Accompanied by more than one hundred images—many of them previously unseen and some formerly suppressed—Gordon has written a sparkling, fast-moving story that testifies to her status as one of the most gifted historians of our time. Finalist for the Los Angeles Times Book Prize; a New York Times Notable

Book; New Yorker's A Year's Reading; and San Francisco Chronicle Best Book.

Educating for Sustainability in Primary Schools

The first comprehensive overview of an influential American photographer and filmmaker whose work is known for its intimacy and social engagement. Coming of age in the 1960s, the photographer Danny Lyon (b. 1942) distinguished himself with work that emphasized intimate social engagement. In 1962 Lyon traveled to the segregated South to photograph the civil rights movement. Subsequent projects on biker culture, the demolition and redevelopment of lower Manhattan, and the Texas prison system, and more recently on the Occupy movement and the vanishing culture in China's booming Shanxi Province, share Lyon's signature immersive approach and his commitment to social and political issues that concern those on the margins of society. Lyon's photography is paralleled by his work as a filmmaker and a writer. *Danny Lyon: Message to the Future* is the first in-depth examination of this leading figure in American photography and film, and the first publication to present his influential bodies of work in all media in their full context. Lead essayists Julian Cox and Elisabeth Sussman provide an account of Lyon's five-decade career. Alexander Nemerov writes about Lyon's work in Knoxville, Tennessee; Ed Halter assesses the artist's films; Danica Willard Sachs evaluates his photomontages; and Julian Cox interviews Alan Rinzler about his role in publishing Lyon's earliest works. With extensive back matter and illustrations, this publication

will be the most comprehensive account of this influential artist's work.

'Provoke' is the title of the magazine founded in 1968 by a group of Japanese photographers, graphic designers, poets, critics, and political activists. Moriyama's photography is indeed provocative, both for the form it takes (dirty, blurry, overexposed, or scratched) and for its content.

A Journey in Other Worlds

A theoretical examination of the surprising emergence of software as a guiding metaphor for our neoliberal world. New media thrives on cycles of obsolescence and renewal: from celebrations of cyber-everything to Y2K, from the dot-com bust to the next big things—mobile mobs, Web 3.0, cloud computing. In Programmed

Visions, Wendy Hui Kyong Chun argues that these cycles result in part from the ways in which new media encapsulates a logic of programmability. New media proliferates “programmed visions,” which seek to shape and predict—even embody—a future based on past data. These programmed visions have also made computers, based on metaphor, metaphors for metaphor itself, for a general logic of substitutability. Chun argues that the clarity offered by software as metaphor should make us pause, because software also engenders a profound sense of ignorance: who knows what lurks behind our smiling interfaces, behind the objects we click and manipulate? The combination of what can be seen and not seen, known (knowable) and not known—its separation of interface from algorithm and software from hardware—makes it a powerful metaphor for everything we believe is invisible yet generates visible, logical effects, from genetics to the invisible hand of the market, from ideology to culture.

The Portrait in Photography

In recent years, peace psychology has grown from a utopian idea to a means of transforming societies worldwide. Yet at the same time peacebuilding enjoys global appeal, the diversity of nations and regions demands interventions reflecting local cultures and realities. Peace Psychology in Asia shows this process in action, emphasizing concepts and methods diverging from those common to the US and Europe. Using examples from China, India, Indonesia, the Philippines, and

elsewhere in the region, chapter authors illuminate the complex social, political, and religious conditions that have fostered war, colonialism, dictatorships, and ethnic strife, and the equally intricate personal and collective psychologies that need to be developed to encourage reconciliation, forgiveness, justice, and community. *Peace Psychology in Asia: Integrates psychology, history, political science, and local culture into concepts of peace and reconciliation. Highlights the indigenous aspects of peace psychology. Explains the critical relevance of local culture and history in peace work. Blends innovative theoretical material with empirical evidence supporting peace interventions. Balances its coverage among local, national, regional, and global contexts. Analyzes the potential of Asia as a model for world peace. As practice-driven as it is intellectually stimulating, Peace Psychology in Asia is vital reading for social and community psychologists, policy analysts, and researchers in psychology and sociology and international studies, including those looking to the region for ideas on peace work in non-Western countries.*

The Case for Spirit Photography

David Toop has become one of our most significant touchstones of contemporary music writing and reportage. Employing intensified studies into World Music in relation to popular (as well as marginalized) contemporary trends, Toop has created one of the most distinctive publishing histories of modern music thinking

for our times. Flutter Echo is his memoir of a life enchanted with all aspects of music both composed and abstract. Toop's personal growth as a practicing musician, visual artist, and witness to some of the most significant events in modern music history is a completely fascinating view into a world of considered thought and random access. From recording for Brian Eno's Obscure Records imprint in 1975 to co-publishing the radical music magazines *Musics* and *Collusion* to developing music programming for the BBC, to releasing recordings he personally made of Yanomami Shaman rituals to working with artists such as creative pop icon Bjork and Jamaican dub pioneer Prince Far-I, Toop has experienced one of the most interesting and dynamic timelines in the dynamic world of our contemporary sound world. Player, listener, scholar, reporter, communitarian, parent, iconoclast - David Toop brings his own life in music to focus in a remarkable, wonder-filled, engaging read.

The purpose of the conference was to assess the implementation of the Recommendation (an international normative instrument adopted by UNESCO in 1989), to bring together points of view and perspectives on the Recommendation from around the world, and suggest ways in which the Recommendation might develop in the future so that its purpose, the safeguarding of traditional culture and folklore, might be achieved.

As climate change adaptation rises up the international policy agenda, matched by increasing funds and frameworks for action, there are mounting questions over how to ensure the needs of vulnerable people on the ground are met. Community-based adaptation (CBA) is one growing proposal that argues for tailored support at the local level to enable vulnerable people to identify and implement appropriate community-based responses to climate change themselves. Community Based Adaptation to Climate Change: Scaling it up explores the challenges for meeting the scale of the adaptation challenge through CBA. It asks the fundamental questions: How can we draw replicable lessons to move from place-based projects towards more programmatic adaptation planning? How does CBA fit with larger scale adaptation policy and programmes? How are CBA interventions situated within the institutions that enable or undermine adaptive capacity? Combining the research and experience of prominent adaptation and development theorists and practitioners, this book presents cutting edge knowledge that moves the debate on CBA forward towards effective, appropriate, and 'scaled-up' adaptive action.

A Century of Artists Books

Polemics and reflections on how to bridge the gap between what architecture

actually is and what architects want it to be. Architecture depends--on what? On people, time, politics, ethics, mess: the real world. Architecture, Jeremy Till argues with conviction in this engaging, sometimes pugnacious book, cannot help itself; it is dependent for its very existence on things outside itself. Despite the claims of autonomy, purity, and control that architects like to make about their practice, architecture is buffeted by uncertainty and contingency. Circumstances invariably intervene to upset the architect's best-laid plans--at every stage in the process, from design through construction to occupancy. Architects, however, tend to deny this, fearing contingency and preferring to pursue perfection. With *Architecture Depends*, architect and critic Jeremy Till offers a proposal for rescuing architects from themselves: a way to bridge the gap between what architecture actually is and what architects want it to be. Mixing anecdote, design, social theory, and personal experience, Till's writing is always accessible, moving freely between high and low registers, much like his suggestions for architecture itself.

In this book, the authors explore and discuss the development of one of the most interesting and dynamic of photographic genres. Hailed as a landmark work when it was first published in 1994, *Bystander* is widely regarded by street photographers as the "bible" of street photography. It covers an incredible array of talent, from the unknowns of the late 19th century to the acknowledged masters of the 20th, such as Atget, Stieglitz, Strand, Cartier-Bresson, Brassai, Kertesz, Frank, Arbus, Winogrand, and Levitt to name just a few. In this new and fully revised edition, the story of street photography is brought up to date with a re-evaluation of some historical material, the inclusion of more contemporary photographers, and a discussion of the ongoing rise of digital photography.

In this volume, Kathleen Nader has compiled an articulate and comprehensive guide to the complex process of assessment in youth and adolescent trauma. There are many issues that are important to evaluating children and adolescents, and it is increasingly clear that reliance on just one type of assessment does not provide the most accurate results. From history to recent advances, this book covers a wide range of methods and measures for assessing trauma, including case examples to illustrate the integration of these different facets. Altogether, the broad scope and inclusive depth of this work make it an essential addition to the field of trauma assessment.

NEW YORK TIMES BESTSELLER "Reilly pokes more holes in Trump's claims than there are sand traps on all of his courses combined. It is by turns amusing and alarming." -- The New Yorker "Golf is the spine of this shocking, wildly humorous book, but humanity is its flesh and spirit." -- Chicago Sun-Times "Every one of Trump's most disgusting qualities surfaces in golf." -- The Ringer An outrageous indictment of Donald Trump's appalling behavior when it comes to golf -- on and off the green -- and what it reveals about his character. Donald Trump loves golf. He loves to play it, buy it, build it, and operate it. He owns 14 courses around the world and runs another five, all of which he insists are the best on the planet. He also claims he's a 3 handicap, almost never loses, and has won an astonishing 18 club championships. How much of all that is true? Almost none of it, acclaimed sportswriter Rick Reilly reveals in this unsparing look at Trump in the world of golf. Based on Reilly's own experiences with Trump as well as interviews with over 100 golf pros, amateurs, developers, and caddies, *Commander in Cheat* is a startling and at times hilarious indictment of Trump and his golf game. You'll learn how

Trump cheats (sometimes with the help of his caddies and Secret Service agents), lies about his scores (the "Trump Bump"), tells whoppers about the rank of his courses and their worth (declaring that every one of them is worth \$50 million), and tramples the etiquette of the game (driving on greens doesn't help). Trump doesn't brag so much, though, about the golf contractors he stiffes, the course neighbors he intimidates, or the way his golf decisions wind up infecting his political ones. For Trump, it's always about winning. To do it, he uses the tricks he picked up from the hustlers at the public course where he learned the game as a college kid, and then polished as one of the most bombastic businessmen of our time. As Reilly writes, "Golf is like bicycle shorts. It reveals a lot about a man." Commander in Cheat "paints a side-splitting portrait of a congenital cheater" (Esquire), revealing all kinds of unsightly truths Trump has been hiding.

Diane Arbus (1923–1971) is one of the most distinctive and provocative artists of the twentieth century. Her photographs of children and eccentrics, couples and circus performers, female impersonators and nudists, are among the most recognizable images of our time. This book is the definitive study of the artist's first seven years of work, from 1956 to 1962. Drawn primarily from the rich holdings of the Metropolitan Museum's Diane Arbus Archive—a remarkable treasury of photographs, negatives, appointment books, notebooks, and correspondence—it is an essential contribution to our understanding of Arbus and her oeuvre. *diane arbus: in the beginning* showcases over 100 of the artist's early

photographs, more than half of which are published here for the first time. The book provides a crucial, in-depth presentation of the artist's genesis, showing Arbus as she developed her evocative and often haunting imagery. The photographs featured in this handsome volume reveal an artist defining her style, honing her subject matter, and in full possession of the many gifts for which she is now recognized the world over.

We have built a world that no longer fits our bodies. Our genes - selected through our evolution - and the many processes by which our development is tuned within the womb, limit our capacity to adapt to the modern urban lifestyle. There is a mismatch. We are seeing the impact of this mismatch in the explosion of diabetes, heart disease and obesity. But it also has consequences in earlier puberty and old age. Bringing together the latest scientific research in evolutionary biology, development, medicine, anthropology and ecology, Peter Gluckman and Mark Hanson, both leading medical scientists, argue that many of our problems as modern-day humans can be understood in terms of this fundamental and growing mismatch. It is an insight that we ignore at our peril.

Architecture Competitions and the Production of Culture, Quality and Knowledge

Although it has influenced the field of Human-Computer Interaction (HCI) since its origins, humanistic HCI has come into its own since the early 2000s. In that time, it has made substantial contributions to HCI theory and methodologies and also had major influence in user experience (UX) design, aesthetic interaction, and emancipatory/social change-oriented approaches to HCI. This book reintroduces the humanities to a general HCI readership; characterizes its major epistemological and methodological commitments as well as forms of rigor; compares the scientific report vs. the humanistic essay as research products, while offering some practical advice for peer review; and focuses on two major topics where humanistic HCI has had particular influence in the field—user experience and aesthetics and emancipatory approaches to computing. This book argues for a more inclusive and broad reach for humanistic thought within the interdisciplinary field of HCI, and its

lively and engaging style will invite readers into that project.

Community-Based Adaptation to Climate Change

This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research. In 2015, it constitutes the most comprehensive survey of the dynamics behind the definition, organization, judging, archiving and publishing of architectural, landscape and urban design competitions in the world. These richly documented contributions revolve around a few questions that can be summarized in a two-fold critical interrogation: How can design competitions - these historical democratic devices, both praised and dreaded by designers - be considered laboratories for the production of environmental design quality, and, ultimately, for the renewing of culture and knowledge? Includes 340 illustrations, bibliographical references and index of over 200 cited competitions. Keywords: Architecture / International competitions / Architectural judgment / Design thinking / Digital archiving (databases) / Architectural publications / Architectural experimentation / Landscape architecture / Urban studies

Emerging and currently available technologies offer great promise for helping older adults, even those without serious disabilities, to live healthy, comfortable, and productive lives. What technologies offer the most potential benefit? What challenges must be overcome, what problems must be solved, for this promise to be fulfilled? How can federal agencies like the National Institute on Aging best use their resources to support the translation from laboratory findings to useful, marketable products and services? Technology for Adaptive Aging is the product of a workshop that brought together distinguished experts in aging research and in technology to discuss applications of technology to communication, education and learning, employment, health, living environments, and transportation for older adults. It includes all of the workshop papers and the report of the committee that organized the workshop. The committee report synthesizes and evaluates the points made in the workshop papers and recommends priorities for federal support of translational research in technology for older adults.

In *The Material Ghost*, Perez draws on his life-long love of the movies as well as his work as a film scholar to write an engaging study of films and filmmakers and the

nature of the art form. For Perez, film is complex and richly contradictory - a medium both lifelike and dreamlike, both documentary and fictional, where real details create imaginary worlds, where figures appear before us like actors on a stage and yet are removed from us like characters in a novel. He investigates these complexities by discussing a breathtaking range of works from the earliest days of cinema to the present. From the silent era, he explores the work of Keaton and Chaplin, Griffith and Eisenstein, the haunting anxiety of Murnau's *Nosferatu* and the epic lyricism of Dovzhenko's *Earth*. From the classic era of sound cinema, he discusses the searching realism of Jean Renoir and the memorable westerns of John Ford, Bunuel's corrosive documentary *Land without Bread* and Hitchcock's mesmerizing *Vertigo*. From the sixties and seventies, he examines the shifting parables of Jean-Luc Godard and the arresting uncertainty of Antonioni's *Eclipse*, Straub and Huillet's reflective *History Lessons* and such explosive Hollywood films as *The Wild Bunch* and *The Godfather*. He also comments on the current scene, including the refashioned gangster films of Martin Scorsese and the philosophical realism of the Iranian filmmaker Abbas Kiarostami.
