Under the Tuscan Sun

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

The Progress of Invention in the Nineteenth Century

Describes special forest products that represent opportunities for rural entrepreneurs to supplement their incomes. Includes: aromatics, berries & wild fruits, cones & seeds, forest botanicals, honey, mushrooms, nuts, syrup, & weaving &

dying materials. Each chapter describes market & competition considerations, distribution & packaging, equipment needs, & resource conservation considerations, & also presents a profile of a rural business marketing the products. Products suitable for small or part-time operators are described. 50 photos.

The Complete Idiot's Guide to European History, 2e

Issue your students a passport to travel the globe with this incredible new series! Eight jam-packed

East of Eden

Fascinating, fact-filled writing that delivers hundreds of years in the life of the European continent. Terrific supplementary reading for AP History students.

Science and Technology in World History

Play Your Bigger Game provides a philosophy and methodology that you can learn in just nine minutes, and it will serve you for the rest of your life. Self-empowerment expert Rick Tamlyn believes that life is all made up. So why not make it a game of your own design—one that excites, challenges, and allows you to fully express your talents and creativity? When you play your bigger game, you create a life that is dynamic, engaging, and wildly inspiring. This book is your antidote to inertia—you will never feel stuck again. Each and every day, it will motivate you to keep stretching, achieving, and thriving above and beyond any boundaries or limitations that might have held you back in the past. Play Your Bigger Game offers pathways, tools, and inspiring stories to feed the hunger in your soul, light the fires of your imagination, and build a fulfilling life and a lasting legacy. If you long to:

- have a more positive impact within your family, your work, your community, or organization
- make a change, but you aren't sure what sort of change
- create meaningful work
- take responsibility and direct your destiny
- make a difference or leave a legacy . . .

then you should join thousands of others around the world and play your bigger game!

The Biological Mind

Landscape in the Longue Durée

Pebbles are usually found only on the beach, in the liminal space between land and sea. But what happens when pebbles

extend inland and create a ridge brushing against the sky? Landscape in the Longue Durée is a 4,000 year history of pebbles. It is based on the results of a four-year archaeological research project of the east Devon Pebblebed heathlands, a fascinating and geologically unique landscape in the UK whose bedrock is composed entirely of water-rounded pebbles. Christopher Tilley uses this landscape to argue that pebbles are like no other kind of stone – they occupy an especial place both in the prehistoric past and in our contemporary culture. It is for this reason that we must re-think continuity and change in a radically new way by considering embodied relations between people and things over the long term. Dividing the book into two parts, Tilley first explores the prehistoric landscape from the Mesolithic to the end of the Iron Age, and follows with an analysis of the same landscape from the eighteenth into the twenty-first century. The major findings of the four-year study are revealed through this chronological journey: from archaeological discoveries, such as the excavation of three early Bronze Age cairns, to the documentation of all 829 surviving pebble structures, and beyond, to the impact of the landscape on local economies and its importance today as a military training camp. The results of the study will inform many disciplines including archaeology, cultural and art history, anthropology, conservation, and landscape studies.

Shanghai Reflections

Play Your Bigger Game

The Ballad Book of John Jacob Niles

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

Passport Series: North America

A re-evaluation of Genghis Khan's rise to power examines the reforms the conqueror instituted throughout his empire and his uniting of East and West, which set the foundation for the nation-states and economic systems of the modern era.

The Four Obsessions of an Extraordinary Executive

The Clean Water Act (CWA) requires that wetlands be protected from degradation because of their important ecological functions including maintenance of high water quality and provision of fish and wildlife habitat. However, this protection generally does not encompass riparian areas—the lands bordering rivers and lakes—even though they often provide the same functions as wetlands. Growing recognition of the similarities in wetland and riparian area functioning and the differences in their legal protection led the NRC in 1999 to undertake a study of riparian areas, which has culminated in *Riparian Areas: Functioning and Strategies for Management*. The report is intended to heighten awareness of riparian areas commensurate with their ecological and societal values. The primary conclusion is that, because riparian areas perform a disproportionate number of biological and physical functions on a unit area basis, restoration of riparian functions along America's waterbodies should be a national goal.

A Little History of the World

The Cure of Alcoholism

Some of the most portentous events in medieval history—the Cathar crusade, the persecution and mass burnings of heretics, the papal inquisition—fall between 1000 and 1250, when the Catholic Church confronted the threat of heresy with force. Moore's narrative focuses on the motives and anxieties of elites who waged war on heresy for political gain.

Great Inventions that Changed the World

Genghis Khan and the Making of the Modern World

California Farmer

This book provides a much-needed detailed analysis of the evolution of Europe over the last decade, as well as a discussion about the path of reform that has been trodden in the aftermath of the financial crisis. It offers a multidisciplinary view of the E(M)U and captures the main factors that induced the reform of the monetary union – a process that has not been linear and is far from being concluded. The author examines the policy responses designed throughout the development of the

crisis and assesses the scale of the crisis in Europe, in comparison to other parts of the world, as well as its prolonged effects both in economic and financial terms. An update on the current 'state of the art' in the conception of risk-sharing mechanisms is provided. With its innovative approach, the book analyses the financing issues which need to be taken into consideration in the design of these instruments and highlights the main categories of governmental risk-sharing mechanisms – in particular, the ones to be used as 'fiscal capacity'. This is a timely and topical book and will be of interest to a broad audience, including experts, scholars and students of European affairs, particularly those with economic, financial, legal and political science backgrounds.

Water and Wastewater Engineering

Discover the inventions that have made our world what it is today A great invention opens the door to a new era in human history. The stone axe, for example, invented some 2 million years ago in East Africa, enabled us to enter the human path of endless improvements through inventions. The taming of fire enabled us to cook food as well as leave the warmth of Africa and move to the frigid lands of the North. From the stone axe to the computer and the Internet, this book provides a fascinating tour of the most important inventions and inventors throughout history. You'll discover the landmark achievements and the men and women that made the world what it is today. Great Inventions That Changed the World is written by Professor James Wei, a renowned educator and engineer who holds several patents for his own inventions. Following an introductory chapter examining the role of inventors and inventions in fueling innovation and global advancement, the book is organized to show how inventions are spurred by human needs and desires, including: Work Food, clothing, and housing Health and reproduction Security As you progress through the book, you'll not only learn about inventions and inventors, but also the impact they have had on our lives and the society and environment in which we live today. Inventions solve problems, but as this book so expertly demonstrates, they can also directly or indirectly create new problems as well, from pollution to global warming to bioterrorism. By enabling us to understand the impact of inventions throughout history, this book can help guide the next generation of citizens, decision makers, and inventors.

The War on Heresy

Vermeer's record of the tasks and duties of women The 35 paintings that have come down to us from the hand of Jan Vermeer (1632-1675) place him beside Rembrandt and Frans Hals as one of the great masters of the golden age of Dutch art. Most of his pictures (all of which are reproduced in this book) show women about their daily business. Vermeer records the tasks and duties of women, the imperatives of virtue under which their lives were lived, and the dreams that provided the substance of their contrasting counter-world. About the Series: Each book in TASCHEN's Basic Art series features: a detailed chronological summary of the life and oeuvre of the artist, covering his or her cultural and historical importance a

concise biography approximately 100 illustrations with explanatory captions

Preserving New York

Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

Managing the "matchless Wonders"

A pioneering neuroscientist argues that we are more than our brains. To many, the brain is the seat of personal identity and autonomy. But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in scientific fact. This blinds us to the physical realities of mental function. We ignore bodily influences on our psychology, from chemicals in the blood to bacteria in the gut, and overlook the ways that the environment affects our behavior, via factors varying from subconscious sights and sounds to the weather. As a result, we alternately overestimate our capacity for free will or equate brains to inorganic machines like computers. But a brain is neither a soul nor an electrical network: it is a bodily organ, and it cannot be separated from its surroundings. Our selves aren't just inside our heads--they're spread throughout our bodies and beyond. Only once we come to terms with this can we grasp the true nature of our humanity.

Income Opportunities in Special Forest Products

Mr Chaston Chapman collected works for two libraries; his working library, based at his laboratory in London, and a private, historical collection. Subjects include brewing and the brewing industry, wine and winemaking, beer, distillation and distilling industry, drinking customs, liquors, ciders and whiskey and legal issues surrounding alcohol. The brewing section represents part of Mr Chaston Chapman's library. The collection contains works on brewing and alcohol which dates from 1578, with 'A Perfite platforme of a Hoppe Garden'.

Riparian Areas

Since childhood they have been inseparable friends: Lorn, Lewis, Ruth and Rachel. The close-knit community of Rhanna has

watched them grow up - playing and fighting together, seeing each other through the bad times. But now they are grown and they face a harsher world, and all the problems of love and loss for which their tranquil Hebridean upbringing cannot prepare them. Yet all four know that whatever might happen, however far they drift apart, they are still and always children of Rhanna.

The Return of the King

“This beautifully written memoir about taking chances, living in Italy, loving a house and, always, the pleasures of food, would make a perfect gift for a loved one. But it’s so delicious, read it first yourself.”—USA Today The 20th anniversary edition of the classic, updated with a new afterword. Don’t miss Frances Mayes in PBS’s Dream of Italy: Tuscan Sun Special! Frances Mayes—widely published poet, gourmet cook, and travel writer—opens the door to a wondrous new world when she buys and restores an abandoned villa in the spectacular Tuscan countryside. In evocative language, she brings the reader along as she discovers the beauty and simplicity of life in Italy. Mayes also creates dozens of delicious seasonal recipes from her traditional kitchen and simple garden, all of which she includes in the book. Doing for Tuscany what M.F.K. Fisher and Peter Mayle did for Provence, Mayes writes about the tastes and pleasures of a foreign country with gusto and passion. Now with an excerpt from Frances Mayes's latest southern memoir, *Under Magnolia*

"The Story of the East Riding of Yorkshire" by Horace B. Browne. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Lonely Planet Andalucia

Tracing historical relationship from the dawn of civilization through the twentieth century, the authors argue that technology as "applied science" emerged relatively, as industry and governments began funding scientific research. They explore the emergence of Europe and the United States as a scientific and technological power.

Vermeer, 1632-1675

The third volume in J.R.R. Tolkien's epic adventure THE LORD OF THE RINGS One Ring to rule them all, One Ring to find them, One Ring to bring them all and in the darkness bind them As the Shadow of Mordor grows across the land, the Companions of the Ring have become involved in separate adventures. Aragorn, revealed as the hidden heir of the ancient Kings of the West, has joined with the Riders of Rohan against the forces of Isengard, and takes part in the desperate victory of the Hornburg. Merry and Pippin, captured by Orcs, escape into Fangorn Forest and there encounter the Ents. Gandalf has miraculously returned and defeated the evil wizard, Saruman. Sam has left his master for dead after a battle with the giant spider, Shelob; but Frodo is still alive—now in the foul hands of the Orcs. And all the while the armies of the Dark Lord are massing as the One Ring draws ever nearer to the Cracks of Doom. “A triumphant close . . . a grand piece of work, grand in both conception and execution. An astonishing imaginative tour de force.” – Daily Telegraph Includes the complete appendices and index for The Lord of the Rings trilogy.

MacRae's Blue Book

Europe in the Middle Ages

This volume comprises select papers presented during TRANSOILCOLD 2019. It covers the challenges and problems faced by engineers, designers, contractors, and infrastructure owners during planning and building of transport infrastructure in Arctic and cold regions. The contents of this book will be of use to researchers and professional engineers alike.

The Story of the East Riding of Yorkshire

How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In A

Slice of the Pie Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick's managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. A Slice of the Pie will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

Technics and Civilization

Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written.”—Journal of Technology and Culture

A Frequency Dictionary of Contemporary American English

Student projects sponsored by Princeton, Hong Kong, and Tongji universities and reviewed by critics.

A Slice of the Pie

A masterpiece of Biblical scope, and the magnum opus of one of America's most enduring authors, in a commemorative hardcover edition In his journal, Nobel Prize winner John Steinbeck called East of Eden "the first book," and indeed it has the primordial power and simplicity of myth. Set in the rich farmland of California's Salinas Valley, this sprawling and often brutal novel follows the intertwined destinies of two families—the Trasks and the Hamiltons—whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. The masterpiece of Steinbeck's later years, East of Eden is a work in which Steinbeck created his most mesmerizing characters and explored his most enduring themes: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Adapted for the

1955 film directed by Elia Kazan introducing James Dean, and read by thousands as the book that brought Oprah's Book Club back, East of Eden has remained vitally present in American culture for over half a century.

The Curiosities of Ale & Beer

First published in 2010 . Routledge is an imprint of Taylor & Francis, an informa company.

The Excavating Engineer

In this stunning follow-up to his best-selling book, The Five Temptations of a CEO, Patrick Lencioni offers up another leadership fable that's every bit as compelling and illuminating as its predecessor. This time, Lencioni's focus is on a leader's crucial role in building a healthy organization--an often overlooked but essential element of business life that is the linchpin of sustained success. Readers are treated to a story of corporate intrigue as the frustrated head of one consulting firm faces a leadership challenge so great that it threatens to topple his company, his career, and everything he holds true about leadership itself. In the story's telling, Lencioni helps his readers understand the disarming simplicity and power of creating organizational health, and reveals four key disciplines that they can follow to achieve it.

Transportation Soil Engineering in Cold Regions, Volume 2

Children of Rhanna

A legend in the folk music community, John Jacob Niles enjoyed a lengthy career as a balladeer, folk collector, and songwriter. Ever close to his Kentucky roots, he spent much of his adulthood searching for the most well-loved songs of the southern Appalachia. The Ballad Book of John Jacob Niles brings together a wealth of songs with the stories that inspired them, arranged by a gifted performer. This new edition includes all of the melodies, text, commentary, and illustrations of the 1961 original and features a new introduction by Ron Pen, director of the John Jacob Niles Center for American Music at the University of Kentucky.
