EMC® VPLEX™ Administration Guide 238 RecoverPoint Management tools RecoverPoint can be managed using either a Command Line Interface (CLI) or Graphical User Interface (GUI). RecoverPoint CLI Use the RecoverPoint CLI to manage and monitor activities interactively, or through scripts.

DELL EMC VPLEX HARDWARE FAMILY

Second, the VPLEX CLI supports wildcards and globbing, much like a typical filesystem. Use the asterisk (*) character to represent anything in a context, and use the double asterisk (**) to represent multiple matches across multiple contexts. You can use regular expressions as well.

Emc Vplex Cli Guide

14 EMC VPLEX Product Guide Introducing VPLEX VPLEX overview EMC VPLEX federates data located on heterogeneous storage arrays to create dynamic, distributed, highly available data centers. Use VPLEX to: Move data nondisruptively between EMC and non-EMC storage arrays without any downtime for the host.

NetStorager System Command Reference Guide

Use the cd command to navigate between command contexts. The current context is always displayed at the Vplexcli prompt: Vplexcli:/> cd

/clusters/cluster-1/devices/. VPlxcli:/clusters/cluster-1/devices>. For example, to navigate from the root (/) context to the monitoring context for a specified director:

VPLEX with GeoSynchrony 5.0 Product Guide

EMC® VPLEX™ Administration Guide 195 VPLEX Witness VPLEX Witness operation
This section describes the output of CLI commands during normal operations and in various failure states: ♦ “Normal operation” ♦ “Single failures (no data unavailability)” ♦ “Dual failures (no data unavailability)” ♦ “Single failures (data unavailability at one cluster)” ♦ “Dual failure (cluster isolation/DU at one cluster)”
Use the ls command in /cluster-witness context to display the state and IP addresses.

Emc Vplex Cli Guide About this guide This document is part of the VPLEX documentation set, and describes the VPLEX command line interface. Each major section includes introductory information and a general procedure for completing a task. The introductory information and detailed steps for each procedure appear in the

VPLEX Shortcut commands for VPLEX CLI | Dell US

EMC VPLEX CLI Guide Implementation and Planning Best Practices for EMC VPLEX Technical Notes VPLEX procedure generator The VPLEX GUI also provides online help. Conventions used in this document EMC uses the following conventions for special notices.

When you disable the VPLEX Witness client on the clusters

A VPLEX cluster is configured with all VS6 engines or all VS2 engines in single, dual or quad options. VPLEX for All-Flash is an all-inclusive solution with a software license for any capacity on one or multiple Dell EMC all-flash arrays. VPLEX for All-Flash is available with VS6 or VS2 engines (models cannot be combined in a cluster).

Emc Vplex Cli Guide - San Vidal

VPLEX is an EMC technology that provides a virtual storage system and access to data in the private cloud. A VPLEX can be implemented on Cisco UCS Director through a pod deployment such as Vblock, or as a standalone device. VPLEX has the following capabilities:

Bing: Emc Vplex Cli Guide

VPLEX employs a Linux-based CLI therefore to simply list commands for example listing the storage arrays connected to VPLEX you would have to issue the following on the VPLEX CLI: Example 1. ll /clusters/cluster-1/storage-elements/storage-arrays/ VPLEX Engineering have provided a set of alias

commands to shorten such CLI commands. Continuing with the example above showing storage arrays connected to VPLEX we can set up the alias showarrays as follows from the VPLEX CLI: Example 2.
