British National Bibliography 1976

The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it

details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big

little business that is beloved by the entire community. In *A Slice of the Pie* Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick's managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. *A Slice of the Pie* will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

A faithful reproduction of the 1970 Floyd Clymer publication of the official Honda Factory Workshop Manual specific to the 1962-1969 n10 50cc Sport Cub series of motorcycles. This manual includes all of the data that you would expect from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components. It also includes a comprehensive troubleshooting section plus tables of technical data, tolerances and fits making it an invaluable resource for collectors and restorers of these classic Honda motorcycles. There are 55 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from Japanese to English is, at times, a little quirky but the illustrations make up for any difficulty in understanding what needs to be done! There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus a detailed electrical service section. This is a - must have - reference for any Honda enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of these classic motorcycles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.

For more than a half century Italian body builders were the leaders of world style, generating creativity, a trend towards innovation and an ability of execution that appears super-human today. The aesthetic values and technology expressed by their work transmitted Italian culture and genius across the globe. Their creations were multiplied in millions of examples, influencing taste and trends in car design, among other things, in every corner of the world. But in spite of the dimensions and importance of their work, the Italian body stylists were often undervalued. This book brings together the profiles of no fewer than 36 of the best known stylists in the history of Italian car design: they include Allemano, Bertone, Castagna, Ghia, Pininfarina, Touring, Vignale and Zagato. The story of each one of them is told through the extraordinary wealth of their iconographic patrimony, most of which have never been published. The body stylists appearing in this book are: Allemano, Balbo, Bertone, Boano, Boneschi, Castagna, Colli, Ellena, Fantuzzi, Fissore, Francis Lombardi, Frua, Garavini, Ghia, ItalDesign, Lotti, Michelotti, Monterosa, Monviso, Moretti, Motto, OSI, Pininfarina, Riva, Savio, Sala, Scaglietti, Scioneri, Siata, Sibona,

Sportscar/Piero Drogo, Stabilimenti Farina, Touring, Vignale, Viotti, Zagato.

This book is essential reading for every MGB enthusiast. The mechanical aspects and the restoration of the vehicle have been written about in numerous publications but the so often maligned electrical systems has never before been comprehensively covered. For those new to vehicle electrical systems the book provides a simple primer using mechanical analogies. Each system in the car has its own chapter, with simple and uncluttered circuit diagrams in which each wire can be seen in its real colours. More than a how-to-do guide, the book also explains the “why” of each system and procedure, aiding diagnostics when things don’t go quite as they should. The many fault finding guides help pin those elusive problems down. For those wishing to improve the car for reliability and safety.

This portfolio covers one of Fiat's iconic cars, the Pininfarina-designed 124 Spider. Production started in 1966 at which time Fiat also introduced the Coupe. The sixties was a great time for sports cars with the 124 Spider competing with Alfa Romeo Spider, MGB, Triumph TR4 and 5 and the Datsun Fairlady. As the years rolled on by - the Spider would remain in production for almost two decades - Fiat kept up a program of continual improvements that involved regular engine capacity increases to 1608cc, then to 1756cc and finally to 1995cc. Along the way there were only minor cosmetic changes to the styling of the 124 Spider - it remained as pure a design as any during a time of some turmoil in the world's automobile industry and production ended in 1985.

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to

enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. Comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.
