Comet Press presents the ultimate collection of extreme creature horror with 17 deviant and gore-soaked stories featuring demons, cannibals, mutants, golems, werewolves, and many more vile creatures. Brace yourself for a wild and bestial ride in these disturbing tales of Sick Things. FANGORIA MAGAZINE REVIEW "Cover every orifice. Comet Press' new collection SICK THINGS: AN ANTHOLOGY OF EXTREME CREATURE HORROR is making a beeline for the soft contents of your body—and it doesn't care one bit where it makes its grand entrance, orbital sockets or otherwise. Rest assured this violation will be painful, given the tight confinements of our fallible frames of flesh—but anything less than a full-on ass-rape would probably seem insufficient in the eyes of editrix Cheryl Mullenax. Read on at your own stomach's peril." FATALLY YOURS REVIEW "If you are an extreme fan of horror looking for the ultimate in disgusting, vile and disturbing fiction, Sick Things: An Anthology of Extreme Creature Horror is a must-read...just make sure you have your barf bag handy!" TOXIC GRAVEYARD REVIEW "Recently I've discovered the awesomeness that is Comet Press. There is a myriad of small press horror publishers out there, and more seem to be popping up all the time. Many times these small press companies promise "extreme" horror

but often what you get is a poorly edited book riddled with grammatical and spelling errors with mediocre unknowns sandwiched between old stories from established authors. Thank goodness for Comet Press. I've reviewed their previous releases Vile Things and The Death Panel and loved em both. The bar was set high for Sick Things, and it soared over it on cloven hoof."

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Semantics

Financial Reporting & Analysis (FR&A) by Revsine/Collins/Johnson/Mittelstaedt emphasizes both the process of financial reporting and the analysis of financial statements. This book employs a true "user" perspective by discussing the contracting and decision implications of accounting and this helps readers understand why accounting choices matter and to whom. Revsine, Collins, Johnson, and Mittelstaedt train their readers to be good financial detectives, able to read, use, and interpret the statements and-most importantly understand how and why managers can utilize the flexibility in GAAP to manipulate the numbers for their own purposes.

This practical coursebook introduces all the basics of semantics in a simple, step-by-step fashion. Each unit includes short sections of explanation with examples, followed by stimulating practice exercises to complete in the book. Feedback and comment sections follow each exercise to enable students to monitor their progress. No previous background in semantics is assumed, as students begin by discovering the value and fascination of the subject and then move through all key topics in the field, including sense and reference, simple logic, word meaning and interpersonal meaning. New study guides and exercises have been added to the end of each unit to help reinforce and test learning. A completely new unit on non-literal language and metaphor, plus updates throughout the text significantly expand the scope of the original edition to bring it up-to-date with modern teaching of semantics for introductory courses in linguistics as well as intermediate students.

Sick Things

The Hive has created a society in which each individual has been genetically programmed to fit into their specific role. There is no dissent; there can be no dissent as even the potential for such has been removed from its population. Only the Human Defense Force remains to resist the genetic imperatives of the Hive. Led by Thane and Allora Denton, the people of the HDF have managed to create a near utopia with the AIs; FREYJA and SCYTHE. Together they have forged a tenuous but centuries long stalemate. Nothing lasts forever though, and the Hive has finally discovered the key to breaking the defenses of the combined human and AI forces. What does it mean to be human? The victors will decide.

Financial Accounting

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match prerequisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. The book covers all essential topics: the accounting cycle, merchandising, assigning costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally, this version of the open text is supported by Lyryx Learning, offering at an affordable price editorial services to develop and adapt the content, formative online assessment, course supplements, and daily support to both the students and instructors.

Thread one. An old grizzly: CP023, with an attitude and a reputation, gets rid of its radio-collar, and wanders out of the National Park boundaries. Thread two. Doug Haldane is hiking up to the town of Hudgin's Mills, located in one of those intermountain valleys, deep in the Rockies. Fifteen miles short of his destination he sees an accident unfold on the other side of a narrow lake. A small boat appears out of the gorge between Hudgin's lake and this one. He sees that the boat is badly damaged but is afloat. There is a family aboard that needs urgent help. He watches them for a few minutes and sees them bring the boat to shore. They appear to be injured. He is hours from a road or other rescue, so with the impetuosity of youth, he takes the matter into his own hands and swims across. Thread three. The Whitcomb family is stranded after being pulled down Lesser Hell's Canyon Gorge in their small boat. It is a hair-raising roller coaster of a ride that few could expect to survive. They are dumped into the lake almost fifteen miles below the one they had been on an hour earlier, and needing medical help. No one knows where they are, and the weather is about to turn against them. Then, unbelievably, they see a young man swimming across the lake to get to them. They see salvation. However, nothing is as simple as it seems, and lives are irrevocably changed on that day when he comes ashore. It becomes a weekend none of them will ever forget when the disparate threads come together. Fate, decrees that there will be one very violent death, and that two lives will be forever changed.

Award-winning and Amazon best-selling author John Fennell's second novel, "The Pursuit" is a continuance of the first novel, "The Diary." Both novels frame the action series "Legends of the Vacaras." Once again, the Legends prove they are up to the challenge when they confront a race of super humans, Zerdroids, led by Maurice Emil. These genetically enhanced humans, bred for generations in Russia, invade the Legends' turf in America and are after one thing-John Vacara. Due to an injury after the D-Day invasion, John was captured by the Nazis and given a life-saving surgery by Nadia Vogt. A serum is applied to his brain, making him the world's leading mentalist. Along with periodic applications and John's natural gift, he is sought after by Germany's most infamous madman. Author von Luther is convinced John is the key to his goal: world domination. Von Luther teams up with Maurice Emil to hunt down John Vacara. John Vacara's wife, Pauline, was a much easier target, so Maurice, along with his Zerdroids, kidnap Pauline, knowing John would scour the world over to find her. The

Zerdroids created diversions in nearby locations, thus making it easy to take Pauline from Wolf Summit compound located west of a small town in West Virginia. The adventure takes you from the family farm to The Foundation compound. The chase leads John to the docks of Baltimore where a mysterious and highly advanced flying machine intervenes and takes Pauline from her kidnapers and in a split-second disappears into the sky. Before the flying machine takes off, it hovers just above John and Nadia, dropping a metal plate that directs them to Havana, Cuba where The Legends join briefly at the world-famous bar, Sloppy Joe's. In the western Caribbean, John teams up with long-time Rock Foundation kingpin, Larry Bleigh, who hands John a surprise. Larry gathers up all of the Legends and travels to Europe where the novel ends with an astonishing discovery. This action-packed novel promises a hungry plot along with suspenseful turns, high-tech machinery, and a super-human race. To add to the mix, passionate love stories deliver stimulating sexual adventures that only these characters are capable of providing.
