Achieving the UN Sustainable Development Goals by 2030 will, to a great degree, depend on implementing a “circular economy”. In the forest sector, this relates to how we manage forests and use forest products. The Forest Products Annual Market Review covers recent trends, policies and market intelligence on forest products along with production, consumption and trade statistics for the UNECE region; all of which are critical to the role of forests in creating a more circular economy.

A Nuclear Weapons-Free World?

Richard A. Prayson, md, summarizes in outline form for active pathologists and residents in training-as well as those seeking a concise up-to-date overview of the subject -the essential element of the neuropathology curriculum. Topics range from basic information on the spectrum of neurologic-related disease to pertinent pictorial examples of many neuropathologic conditions. For each topic there are self-assessment tests based on both textual and pictorial material, along with sample answers and explanations designed to aid comprehension and understanding. Concise yet comprehensive, Neuropathology Review provides an effective and easy-to-use refresher course for those working pathologists wishing to update their skills, as well as for those preparing to take board exams in neuropathology.

Review of Reviews and World's Work

For 18 years, Las Vegas has enjoyed small helpings of their own rich history, served up by public radio station KNPR. Hearing well-told tales of characters with names like "Whiskey Pete," and the comic-opera romance between a famous female evangelist and a boyfriend called "Whataman," many a listener has wished for a transcript. This book fulfills that wish, presenting more than 100 selected mostly by the program's original author, historian Frank Wright. Wright mined the pits and pockets of local lore for nuggets little-known to the public, misunderstood by most, or merely enough fun to be worth telling once more.

De Bow's Review

Even though the effect of lead contamination on human health has been known for decades, very little attention has been paid to lead-based solders used in electronics until recently. This comprehensive book examines all the important issues associated with lead-free electronic solder. It collects the work of researchers recognized for their significant scientific contributions in the area.

In 2002, the Records of Early English Drama (REED) project marked its twenty-fifth anniversary with a special series of sessions at the International Medieval Congress at Leeds University. The REED sessions were designed to allow critical reflection on the past, present, and future of the project as it entered the twenty-first century. Thirteen essays amplifying the content of selected conference papers, and a fourteenth submitted at the editors' invitation, make up REED in Review. Contributors to the collection describe the conception and early years of REED, assess the project's impact on recent and current scholarship, and anticipate or propose stimulating new directions for future research. Individual essays address a wide variety of subjects, from the impact of REED research on Shakespeare textual editing, Robin Hood, patronage, and Elizabethan theatre studies, to a thought provoking redefinition of 'drama,' details of recent ground-breaking research in Scottish records, and the broadening possibilities for editorial and research relationships with information technology. The editors' introduction and a select bibliography, with commentary and a list of REED-related publications by editors and scholars from a variety of disciplines, make up the remainder of this landmark volume.

The Truth on the Congo Free State

Few public policy issues have stirred political passions on both sides of the Canada/US border as free trade did in the late 1980s. Negotiated between Canada and the United States in 1987, the Free Trade Agreement became the dominant issue in the November 1988 Canadian federal election, perhaps the most dramatic and divisive campaign in the second half of the twentieth century. Ten years after implementation of the agreement, the McGill Institute for the Study of Canada organized a major conference to renew the discussion of free trade and consider its economic impact. It also marked the fifth anniversary of the North American Free Trade Agreement by expanding the discussion to include the impact of NAFTA on Mexico, as well as the NAFTA side agreement on the environment.

Florists' Review

In the decades preceding the Civil War, the South struggled against widespread negative characterizations of its economy and society as it worked to match the North's infrastructure and level of development. Recognizing the need for regional reform, James Dunwoody Brownson (J. D. B.) De Bow began to publish a monthly journal -- De Bow's Review -- to guide Southerners toward a stronger, more diversified future. His periodical soon became a primary reference for planters and entrepreneurs in the Old South, promoting urban development and industrialization and advocating investment in schools, libraries, and other cultural resources. Later, however, De Bow began to use his journal to manipulate his readers' political

views. Through inflammatory articles, he defended proslavery ideology, encouraged Southern nationalism, and promoted anti-Union sentiment, eventually becoming one of the South's most notorious fire-eaters. In *De Bow's Review: The Antebellum Vision of a New South*, author John Kvach explores how the editor's antebellum economic and social policies influenced Southern readers and created the framework for a postwar New South movement. By recreating subscription lists and examining the lives and livelihoods of 1,500 Review readers, Kvach demonstrates how *De Bow's Review* influenced a generation and a half of Southerners. This approach allows modern readers to understand the historical context of De Bow's editorial legacy. Ultimately, De Bow and his antebellum subscribers altered the future of their region by creating the vision of a New South long before the Civil War.
