30 Graphic Organizers for the Content Areas, Grades K-3

At present, graphic organizers have become recognized instructional tools to help support students as they write. The purpose of this study is to examine the impact of paper-based and digital graphic organizers to improve persuasive writing of fourth and fifth grade students. A quasi-experimental study with a comparison design with pre-test and post-tests was used with the switching replication method. The population consists of sixty-seven public and private school students in fourth and fifth grade. The most prominent results indicate that the use of a digital graphic organizer first, leads to significant improvements in the following five writing outcome areas: goal statements, reasoning statements, supporting arguments, conclusion statements, and overall scores. Likewise, female students

also showed significant improvements in all five writing outcomes. Comparable to digital, the use of paper-based graphic organizers first, resulted in significant improvements in three areas: supporting arguments, conclusion statements, and overall scores. For older students (aged 10-11), the use of both paper-based and digital graphic organizers first, leads to significant improvements in the following five writing outcome areas: goal statements, reasoning statements, supporting arguments, conclusion statements, and overall scores. The overall results indicate that graphic organizers yield significant improvements in the persuasive writing of fourth and fifth grade students. Furthermore, a consistent finding throughout this study is that the use of paper-based and digital graphic organizers results in significant improvements in these three areas: supporting arguments, conclusion statements, and overall scores.

Master Writing Big Book

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Great Teaching with Graphic Organizers

Educators who feel they do not have the sufficient background knowledge and confidence to teach science to students need a method that gives them the means to promote meaningful learning in the science content area. The purpose of this study was to explore the effectiveness from the perspective of middle school teachers on the use of graphic organizers; and to present their insights on the effects of teacher confidence in practicing science education. The results indicated that for some educators who had an engaging teaching philosophy and effective classroom management techniques used the graphic organizers as teaching tools that positively affected their ability and confidence to teach science. These teachers

used the process driven organizer to direct the flow of information and focus learning activities on the students. While other educators were too dependent on having the background content knowledge to use the graphic organizers to teach science. This paper examines the theory of how information is processed and applies it to the use of graphic organizers by teachers to engage in their own learning while teaching. This study also focuses on a new direction in graphic organizer research in an effort to provide a base for future investigations from the teacher's perspective.
