How to Paint Your Car on a Budget

During the muscle car wars of the 1960s, Holley carburetors emerged as the carbs to have because of their easy-to-tune design, abundance of parts, and wide range of sizes. The legendary Double Pumper, the universal 600-cfm 1850 models, the Dominator, and now the Avenger have stood the test of time and are the leading carburetors in the high-performance engine market. To many enthusiasts, the operation, components, and rebuilding procedures remain a mystery. Yet, many carburetors need to be rebuilt and properly set up for a particular engine package. Veteran engine building expert and automotive author Mike Mavrigian guides you through each important stage of the rebuilding process, so you have the best operating carburetor for a particular engine and application. In addition, he explains carb identification as well as idle, mid-range and high-speed circuit operation, specialty tools, and available parts. You often need to replace gaskets, worn parts,

and jets for the prevailing weather/altitude conditions or a different engine setup. Mavrigian details how to select parts then disassemble, assemble, and calibrate all of the major Holley carburetors. In an easy-to-follow step-by-step format, he shows you each critical stage for cleaning sensitive components and installing parts, including idle screws, idle air jets, primary/secondary main jets, accelerator pumps, emulsion tubes, and float bowls. He also includes the techniques for getting all of the details right so you have a smooth-running engine. Holley carburetor owners need a rebuilding guide for understanding, disassembling, selecting parts, and reassembling their carbs, so the carb then delivers exceptional acceleration, quick response, and superior fuel economy. With *Holley Carburetors: How to Rebuild* you can get the carb set up and performing at its best. And, if desired, you can move to advanced levels of tuning and modifying these carbs. If you're looking for the one complete book that helps you quickly and expertly rebuild your Holley and get back on the road, this book is a vital addition to your performance library.

American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer

determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, *Made in Korea* takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

This is the story of Niki Lauda's racing career. Climbing the ladder: starting against his family's wishes with a Mini in 1968, Niki Lauda drove a Formula Vee Kaimann in 1969 and had a disastrous Formula 3 season with McNamara in 1970 before switching to a Porsche sports car; with progress stalling, he took out a loan to buy a Formula 2 seat at March in 1971. Faltering in Formula 1: he debuted with March at the 1971 Austrian Grand Prix, then stayed with the team in 1972; he moved to BRM for 1973, still paying his way with further borrowing and some income from racing touring cars — but in all this time he had only one points-scoring Formula 1 finish. The Ferrari years: finally Lauda fulfilled his promise after receiving the call to Maranello, winning the World Championship twice in his four years there, in 1975 and 1977, but he left after tensions with the team arose in his final season. The Brabham years: Lauda famously won the 1978 Swedish Grand Prix in Brabham's 'fan car.' but thereafter the team's competitiveness declined and he retired at the end of 1979, tired of driving round in circles' and focused instead on his new airline, Lauda Air. The McLaren years: tempted by a salary of unprecedented size, Lauda returned in 1982 after a two-year absence, silenced doubters by winning his third race, and in 1984 secured his third World Championship; at the end of 1985, with a career tally of 25 Grand Prix victories, he hung up his helmet for good.

For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. *Transitions to Alternative Vehicles and Fuels* assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

Volkswagen Beetles and their variants are some of the most iconic and easily recognizable cars on the road! The classic air-cooled Volkswagen Beetle, officially the Volkswagen Type 1, is regarded as one of the most important and well-engineered vehicles of the twentieth century. It was the most popular imported car in America in the 1960s, and before that it enjoyed a humble beginning as "the people's car" in its native Germany. The Complete Book of Classic Volkswagens encompasses the evolution of the popular Beetle as well as other variations of Volkswagen's air-cooled cars, vans, and trucks. Thoroughly illustrated, this is an invaluable reference to Volkswagen's collectible and iconic cars. The history of VW automobiles is just as colorful as the hues they were manufactured in, and this book illustrates the full story. German automakers originally sought to supply their countrymen with an automobile that was easy to mass produce. By 1938, they finalized the design for the VW "Bug"--the first rear-engined, rear-wheel-drive configured car. In its heyday, the little rounded Beetle was produced at a rate of more than one million per year. Today, with more than 23 million cars built, the Beetle holds the record as the most-produced passenger car of all time. But the Beetle is only one part of the air-cooled Volkswagen story. The rest--from Type 2 vans, pick-ups, and campers to the Type 113 "Super Beetle"--is included here. If you're the owner of a Volkswagen or if you just love their iconic look and you're interested in their evolution, this book deserves a place on your bookshelf.

"A visual celebration of the iconic car of Italy's fashionable dolce vita boom years. The Fiat 500, which began production in 1957, is the iconic car of Italy's free-spirited boom years, when Italian films, fashion, and design took the world by storm. The car remains immortalized in America's imagination and is much sought after by collectors and anyone with a nostalgic love for la dolce vita. This book celebrates the 500 for both its groundbreaking design and its role as a pop-culture icon. Despite its diminutive size, it proved to be enormously practical and popular. It was an instant hit with the Cinecittà movie stars as well as with American tourists absorbing Italy's local color. The book features an array of vintage images of the 500, including film stills, paparazzi shots, and advertising, in addition to more serious chapters on design. The publication of this handsome tribute volume is timed with Fiat's release in the United States of its updated version of the car for the twenty-first century, the Fiat Nuova 500"--Publisher's description.

Hannah's list: Ghosts are cold to the touch. Being tied up isn't much fun. And danger is a sure-fire prescription for amazing sex! When Hannah Campbell attends a memorial service for the neurosurgeon who once saved her life, the last thing she expects is a lightning strike that knocks her out cold and blasts her lungs full of the departed's ashes. Things only get weirder when she wakes up to find the deceased standing over her hospital bed, insisting she help him track down the terrorists who blew up his plane. Professor Takeshi Shimodo doesn't know what to believe when smart-mouthed Hannah appears on his doorstep, claiming to be haunted by the ghost of his best friend. Yet she exhibits some extraordinary psychic abilities. And her determination to find justice for the crash victims, in spite of her fragile health, touches his heart. Takeshi's acupressure techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Soon, their passion flares hotter than any lightning strike. But now the terrorist they seek is hunting them. And the FBI is suspicious Hannah knows just a little too much. Without some "spiritual" help, they haven't a ghost of a chance. Warning, this title contains the following: explicit sex, graphic language and violence.
