Louis Kahn's Situated Modernism

This year the 21st International Conference on Human-Computer Interaction, HCI 2019, which was held in Orlando, Florida, USA, in July 2019, introduced the additional option of "late-breaking work", which applied both for papers and posters with the corresponding volumes of the proceedings. The 47 late-breaking papers included in this volume were published after the conference has taken place. They were organized in the following topical sections: user experience design and evaluation; information, visualization, and decision making; virtual and augmented reality; learning and games; human and task models in HCI; and design and user experience case studies.

The Greatest Educators Ever

Originally a Unesco project, this annotated bibliography results from more than 4,600 requests to media scholars and researchers for research reports, publications, and other information relating to violence and terrorism. Although there is an international cast to the materials, most are from the U.S. Even though violence and terrorism permeate our myths and legends, there is increasing concern with their effect on viewers. This bibliography is particularly timely, with entries through spring 1987. The sections of the work (mass media content, mass media effects, pornography and the media, terrorism and the media) give a better idea of the work's scope than does the title. Choice [T]he annotations are clearly written, succinctly descriptive of the original work's research with test groups, and evaluative of research results. Reference Books Bulletin This bibliography focuses on research and scholarly works relating to violence and terror. Consisting primarily of articles published in scholarly journals and books, this comprehensive work examines major topics such as violence and mass media content, violence and mass media effects, terrorism and the mass media, and pornography. Also included are articles from popular journals, reports published by the United States and other governments, conference papers, and dissertations. Each entry consists of the bibliographic citation and a short abstract; many of the sources include studies from other countries where relevant research has been conducted. The compilers' introduction provides a clear definition of violence and

terrorism as they are dealt with in this volume and offers an interesting overview of various aspects of the subject.

501 Sentence Completion Questions

“Epistemic governance” refers to the cognitive and knowledge-related paradigms that underlie a social system. In this volume, the authors apply the concept to higher education. In a comprehensive review of recent literature, they define key terms and concepts, arguing that a good, effective and sustainable governance of higher education is not possible unless the epistemic structure and knowledge paradigms of higher education are addressed directly. Effective governance of academic institutions is particularly important, given their essential role in generating and disseminating knowledge. The authors consider the practical and policy implications of the epistemic approach for promoting quality assurance, quality enhancement, and quality management of higher education, and their impact on university administration and academic career development.

Violence and Terror in the Mass Media

Epistemic Governance in Higher Education

In its struggle for independence, Bangladesh became the focal point of world attention in the early 1970s. It emerged victorious, but its development was hindered by the after-effects of the war—the destruction of much of its infrastructure, problems of governmental change, and the enormous difficulties faced by government and aid officials in assembling a data base for long-range planning. Professor Rashid's book—the first major comprehensive geographic inventory of Bangladesh—provides the key elements for such a base. Emphasizing the rural and agricultural characteristics of the country, it also covers in depth its physiography, hydrography, climate, soils, land utilization, migration and settlement patterns, transportation infrastructure, and human and natural resources.

Economic and social survey of Asia and the Pacific, 2008

Most books on fractals focus on deterministic fractals as the impact of incorporating randomness and time is almost absent. Further, most review fractals without explaining what scaling and self-similarity means. This book introduces the idea of scaling, self-similarity, scale-invariance and their role in the dimensional analysis. For the first time, fractals emphasizing mostly on stochastic fractal, and multifractals which evolves with time instead of scale-free self-similarity, are discussed. Moreover, it looks at power laws and dynamic scaling laws in some detail and provides an overview of modern statistical tools for calculating fractal dimension and multifractal spectrum.
