Anand Kumar, a mathematics prodigy, defied all challenges to set up one of the most successful and innovative teaching initiatives in the world—Super 30. Born in Chandipur Bela, Patna, Anand secured a place in Cambridge University but couldn't attend because he had no money and sold papads in the evenings instead. He dealt with his own disappointment by setting up an innovative school in 2002 to prepare underprivileged students for the IIT JEE examination. Super 30 has an astonishing success rate and on an average, twenty-seven to twenty-eight of the thirty students crack the exam every year. Stirring and heart-wrenching, this is the extraordinary story of a visionary who has elevated these bright sparks and, through education, given them hope to rise above crippling poverty.

Problems in Physics

In the past few years, the IIT-JEE has evolved as an examination designed to check a candidate's true scientific skills. The examination pattern needs one to see those little details which others fail to see. These details tell us how much in-depth we should know to explain a concept in the right direction. Keeping the present-day scenario in mind, JEE Advanced Physics series is written for students, to allow them not only to learn the tools but also to see why they work so nicely in explaining the beauty of ideas behind the subject. The central goal of this series is to help the students develop a thorough understanding of Physics as a subject. This series stresses on building a rock-solid technical knowledge based on firm foundation of the fundamental principles followed by a large collection of formulae. The primary philosophy of this series is to guide the aspirants towards detailed groundwork for strong conceptual understanding and development of problem-solving skills like mature and experienced physicists. This updated Third Edition of the series will help the aspirants prepare for both Advanced and Main levels of JEE conducted for IITs and other elite engineering institutions in India. This book will also be equally useful for the students preparing for Physics Olympiads. All books in this series are enriched with detailed exhaustive theory that introduces the concepts of Physics in a clear, concise, thorough and easy-to-understand language. A large collection of relevant problems is provided in eight major categories (including updated archive for JEE Advanced and JEE Main), for which the solutions are demonstrated in a logical and stepwise manner.

Manorama Year Book

In evocative prose and with street-level reporting, Daniel Lak argues that India has become a global superpower because of its religion, caste, politics, and poverty, and not in spite of it. He looks presciently to the future, and concludes that the strength that democracy gives it means that India is much better positioned to sustain its newfound status than China, whose political system is sure to eventually hinder it. As an expert who has covered the region for the BBC for the last twelve years, Lak weaves together his substantive knowledge of Indian politics, economics, and culture with fascinating stories of everyday people. India Express incisively explores the most urgent challenges facing India in the 21st century: · The governance and development of the most religiously, culturally, and linguistically diverse population on the planet · Crushing poverty--with 300 million on less \$2 a day--despite the rise of the largest middle class the world has ever known ·

Uncertain geopolitics including the parallel rise of China and civil wars in neighboring states and the increasingly unstable, nuclear-armed Pakistan · Corruption at all levels of government while the business sector becomes ever more globalized and attuned to international standards · Growing urbanization: three of the world's top fifteen cities in terms of population are already Indian and they are growing faster than most others · Inequality between different Hindu castes, sexes, regions and newly minted haves and have-nots

As the water rose in his village during the floods in Bihar forcing him and his family to live in tents, Chiranjeev dreamt of a future working in a plush office in a city. Hundreds of kilometres away in Chhattisgarh, Sudoku whizkid Vipul focused on the International Physics Olympiad and winning a top rank in the All-India Joint Entrance Examination. Success would mean a coveted seat in one of the Indian Institutes of Technology-not to mention celebrity status amongst peers and in the family. With an acceptance ratio far lower than Harvard or MIT, the IIT JEE (or JEE Advanced) is one of the most competitive exams in the world. So how do the toppers succeed? Are there smart ways to prepare for the exam? How does the students' quest transform the lives of their families? Through extensive interviews with JEE top rankers, pioneering teachers and the many students who had to fight extraordinary odds to get into an IIT, Soum Paul, entrepreneur and IIT Kanpur alumnus, puts together stories of fierce competition, incredible hard work and sacrifice.
