Municipal Journal, Public Works Engineer Contractor's Guide

Rural Builder

This work contains a selection of contributions to the NATO ASI which took place in April 1992, in Turkey. In addition to the introductory sections on the mechatronics concept and design methodology and the impact of advance in technology on the mechatronics concept, the importance of the mechatronic design in the textile industries is highlighted, together with many examples. These include: mechatronics in the design of textile machinery, such as 3-D braiding; weaving and LAN systems for weaving; yarn tension compensation; texturing; spinning; measurement automation and diagnosis; knowledge-based expert systems; automated garment manufacture and assembly; and apparel manufacture.
