Electronic Genie takes its readers on a two-century journey that begins with Antoine Lavoisier's prediction of the existence of silicon as an element. It traces the emergence of silicon as key to the development of most forms of today's electronics and its role in making possible the revolutionary digital computer.

Loaded with information about such original thinkers as Lavoisier, John Bardeen, Bill Gates, Patrick Haggerty, Gordon Moore, and many more, the volume traces the use of silicon in metallurgy, as a diode rectifier in wireless and radio, and ultimately as a nonlinear element for heterodyne mixing in radar during World War II. *Electronic Genie* will appeal to students of science and technology as well as to anyone interested in the history of these fields.

Abel Gunner is a rock-star with legendary skills both in and out of the bedroom. He swore he wouldn't fall for another woman after being schemed and manipulated by an ex-lover. He kept that vow until he met Gia Mastro. The Dom inside of him awoke the moment he set eyes upon the submissive beauty. His dark soul hungered for her submission and affection. The deep connection they share leaves him desperate for something he never expected - her love. Her pain brings him the pleasure he craves. Her smile calms the beast that rages within him. Gia loves Abel more than life itself, but Abel is disillusioned by love and wrecks Gia in the process. Her life hangs in the balance. His life depends on forgiving her. This couple must face many truths. Is love enough to overcome the damage that dwells within? Gia's experiences with love have been nil until meeting the infamous bad-boy rocker, Abel Gunner. Swept up in a mind-bending, Dom/submissive love affair, she's forced to make decisions that both help and hurt their relationship. They both have to face their demons before they can embrace a future together. In the end, they're faced with two choices: Fight for their love, or die with their demons.

Advertising expenditure data across ten media: consumer magazines, Sunday magazines, newspapers, outdoor, network television, spot television, syndicated television, cable television, network radio, and national spot radio. Lists brands alphabetically and shows total ten media expenditures, media used, parent company and PIB classification for each brand. Also included in this report are industry class totals and rankings of the top 100 companies of the ten media.

Electrical Record

Demonstrates how aluminum's essential qualities of brilliance, strength, light weight, & ease of recycling have made it not only ubiquitous in daily life but also irresistible to some of the world's most visionary artists.

Best Choices from the People's Pharmacy

House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

Waste Not, Want Not

"The twentieth century loved machines and the speed they made possible. Speeding cars, trains, and planes promised to conquer space and time; their aerodynamic styling and metal skins embodied a new and modern beauty, one that especially enchanted American designers from the late 1920s through the 1950s. Streamlining became the popular American style for all sorts of objects: from toy scooters to typewriters, from power tools to teakettles." "This book celebrates this beauty as epitomized by the work of Raymond Loewy, Kem Weber, Henry Dreyfuss, Norman Bel Geddes, as well as in works by many lesser-known industrial designers whose products are presented here for the first time. The book also demonstrates the resurgence of interest in streamlining among international vanguard designers from the 1980s to the present." "This volume is illustrated with patent drawings and period photographs showing how these dynamically styled

objects were used. The one hundred eighty objects presented here, drawn from the Eric Brill Collection (recently donated to the American Friends of Canada) and supplemented by pieces from the Stewart Collection at the Montreal Museum of Fine Arts, were photographed for this book. A full bibliography, biographies of the designers, and index complete the study."--BOOK JACKET.
