## **International English for Speakers of Other Languages**

Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business

## **Outskirts 4**

Elias Caldwell needs more than his life in nineteenth-century England has to offer. He'd rather go on an adventure than spend one more minute at some stuffy party. When his grandfather gives him a pocket watch he claims can transport him to any place and time, Elias doesn't believe it until he's whisked away to twenty-first-century America. Tyler Forrester just wants to fall hopelessly in love. But making that kind of connection with someone has been more of a dream than reality. Then a boy appears out of thin air, a boy from the past. As he helps Elias navigate a strange new world for him, introducing him to the wonders of espresso, binge-watching, and rock and roll, Tyler discovers Elias is exactly who he was missing. But their love has time limit. Elias's disappearance from the past has had devastating side effects, and now he must choose where he truly belongs—in the Victorian era, or with the boy who took him on an adventure he never dreamed possible?

## **Round Up 5 Sb, 3Ed**

The series is specially designed for students from intermediate to proficiency level. Each book consists of five modules and provides systematic preparation in all four language skills - listening, speaking, reading and writing - required at these levels. The Student's Book and the Workbook are designed to be covered in approximately 100 to 120 hours of classroom work.
