The authors trace the emergence of Ataturk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire, which led to the introduction of European social models, the establishment of dictatorship and of secularist reforms. This produced in both Turkey and Iran highly authoritarian, nationalist, and quasi-westernised states, where the personality cult of the leader defined the politics of each country."

Essays on great figures and important issues, advances and blind alleys—from trepanation to the discovery of grandmother cells—in the history of brain sciences. Neuroscientist Charles Gross has been interested in the history of his field since his days as an undergraduate. *A Hole in the Head* is the second collection of essays in which he illuminates the study of the brain with fascinating episodes from the past. This volume's tales range from the history of trepanation (drilling a hole in the skull) to neurosurgery as painted by Hieronymus Bosch to the discovery that bats navigate using echolocation. The emphasis is on blind alleys and errors as well as triumphs and discoveries, with ancient practices connected to recent developments and controversies. Gross first reaches back into the beginnings of neuroscience, then takes up the interaction of art and neuroscience, exploring, among other things, Rembrandt's "Anatomy Lesson" paintings, and finally, examines discoveries by scientists whose work was scorned in their own time but proven correct in later eras.

Ol' Rosie, a cranky, old mare, has escaped the corral and has led ten of the Nolan's other horses into the stark mountains of eastern Oregon. It's not the first time, but for Wart's pa, this is a particularly desperate situation. On their ranch -- as on any ranch in 1907 -- horses are the key to a rancher's livelihood. So when Ol' Rosie and the other horses run off, somebody has to go catch them. But Wart's ma is having a baby. His pa needs to stay with her and to watch his little brother Danny. That leaves twelve-year-old Wart with the dangerous and critical charge of rounding up their runaway horses by himself. Struggling through the rugged wilderness and facing almost overwhelming peril, Wart must keep his wits about him. "I stood there for another minute trying to think. The wind had been knocked out of me but I was beginning to breathe better. I was miles from home. It was late afternoon -- soon to be dark. I was hurt. Gypsy was lame. Worst of all, I knew that the cougar was out there -- close to me. I was bleeding and he was hunting." With each successive threat, Wart becomes more determined to defy the frightening odds against him and prove his worth to his stern, critical pa. Wart is sent on a mission to save his family's ranch, and along the way he learns that despite his youth and insecurity, he possesses the knowledge and spirit to survive and eventually triumph.

Cardiff-by-the-Sea is a beautiful Southern California coastal town nestled between the San Elijo Lagoon to the south and rolling hills to the east. Known simply by locals as Cardiff, it was named by Esther M. Cullen, who arrived from Boston in 1910 with her husband, J. Frank Cullen, a man determined to transform the swampy expanse of fertile farmland into a coastal playground and town. During the 1920s, the town evolved quickly into a bustling community with a school district, post office, train station, and water irrigation district. The independent character of today's residents can be gleaned throughout the history of the area, from Cullen's determination to build a town in a region thought to be unsuitable for inhabitation, to the citizens' battle in the 1980s to retain autonomy as the town was incorporated into a larger city. Today Cardiff-by-the-Sea is one of five communities comprising the city of Encinitas and is proud of the small-town atmosphere first cultivated by the pioneering spirit of its early settlers.

The Devil In Ol' Rosie

Truth Vibrations is the first book in New Age visionary and conspiracy theorist David Icke's series of groundbreaking exposés of the mysteries of life, the possibilities for the future of humanity, and the history of the global conspiracy known as the New World Order. On 29 March 1990, David Icke visited a healer. What happened that day and in the months that followed changed his life forever. The former professional footballer, TV presenter and Green politician found himself on a wondrous, transformative journey of discovery. Guided by master souls from other dimensions, he went to Canada, the United States and all over Britain, meeting sensitives and helping to balance the disturbed earth's energy systems. This journey led David Icke to write the explosive Truth Vibrations, a revelatory book which looks at the great mysteries which for centuries have baffled scientists,

doctors and historians were unravelled for David Icke: why are we here? What is the truth about God and Jesus? What happens to us when we die? What are crop circles and who makes them? Did Atlantis exist? Most importantly, David Icke reveals who the Illuminati and the Babylonian Brotherhood are, exposing a global conspiracy that has been controlling the fate of the world's people for century by keeping it in a state of mass hypnosis. But David Icke's Truth Vibrations also offers hope, through his new vision of the world and his prediction for an Age of Aquarius. Through his visions, David Icke has learned what is to befall humanity and what steps we can take to reduce the physical and emotional impact of the enormous changes that are about to confront our planet and all life upon it. During his spiritual journey, he discovered the truth vibration, an energy frequency which can break us out of our hypnotised state and allow us to face the challenges of the twenty-first century. Many of the events he predicted in the eye-opening Truth Vibrations over 20 years ago have since come to pass, making David Icke's extraordinary story and the message that Truth Vibrations brings to every man, woman and child of supreme importance to the future of planet Earth. Professor Lou Marinoff's first book drew on the wisdom of the great philosophers to solve our everyday problems, launching a movement that restored philosophy to what it once was: useful in all walks of life. Now, in *The Big Questions*, he takes the concept to the next level, applying centuries of philosophy and great literature to answer central questions of modern existence. Urging us not to accept victimhood as the by-product of modern life, Professor Marinoff uses specific case studies from his counseling practice to show how wisdom from the great thinkers can help us define our own philosophy, and thereby reclaim our sense of well-being. He asks and answers questions that go to the heart of the human condition: How do we know what is right? How can we cope with change? Why can't we all get along? And, most centrally, how can we use the centuries of wisdom that have come before us to help us answer these questions and feel at ease in the world? Accessible, entertaining, and profoundly useful, *The Big Questions* mixes wisdom from the great thinkers with specific case studies to illuminate how a shift in perspective can truly be life changing. Lou Marinoff is the author of the international hit *Plato, Not Prozac!*, which has been published in twenty languages. A professor of philosophy at the City College of New York, Marinoff is also the founding president of the American Philosophical Practitioners Association. Praise for *Plato, Not Prozac!*: 'What exactly is philosophical practice? Marinoff calls it 'therapy for the sane.' In a nutshell, it's using the 2,500-year-old tradition of philosophy to solve everyday problems, like work, relationship and family issues. It's a return to what philosophy was meant to be - a guideline for a way of life.' -Salon.Com 'Plato, Not Prozac! looks to become the bible of the "philosophical counseling" movement.' -Philadelphia Inquirer Magazine 'The ancient think

The Exiled King

In *Religious Experience and the New Woman*, Joanna Dean traces the development of liberal spirituality in the early 20th century through the life and work of Lily Dougall (1858--1923), a New Woman novelist who became known as a religious essayist and Anglican modernist. Dean examines the connections between Dougall's marginal position as a woman intellectual and her experiential, combatively iconoclastic theology, and demonstrates that through her writing and mentoring, Dougall contributed to the shaping of modern spirituality. Lily Dougall described religious experience -- the sense of the presence of God -- as the "rock" of her theology. Dean observes the protean nature of this rock as Dougall moved from a submissive holiness faith, to a mystical Mauricean sense of the Kingdom of God, to the relational theology of personal idealism, and reveals how psychology, which appeared to provide scientific support for her religious beliefs, eventually threatened to undermine her experiential faith.
