### Berkshire World

An illustrated survey of the world's most endangered birds This illustrated book vividly depicts the most endangered birds in the world and provides the latest information on the threats each species faces and the measures being taken to save them. Today, 571 bird species are classified as critically endangered or endangered, and a further four now exist only in captivity. This landmark book features stunning photographs of 500 of these species—the results of a prestigious international photographic competition organized specifically for this book. It also showcases paintings by acclaimed wildlife artist Tomasz Cofta of the 75 species for which no photos are known to exist. The World's Rarest Birds has introductory chapters that explain the threats to birds, the ways threat categories are applied, and the distinction between threat and rarity. The book is divided into seven regional sections—Europe and the Middle East; Africa and Madagascar; Asia; Australasia; Oceanic Islands; North America, Central America, and the Caribbean; and South America. Each section includes an illustrated directory to the bird species under threat there, and gives a concise description of distribution, status, population, key threats, and conservation needs. This one-of-a-kind book also provides coverage of 62 data-deficient species.

### Does God Love You No Matter What?

Uninhabited by humans, the Mascarene Islands of the Indian Ocean were once home to an extraordinary range of birds and reptiles: giant tortoises, parrots, skinks, geckos, burrowing boas, flightless rails and herons, and, most famously, dodos. But the discovery of the three isolated islands in the 1500s, and their colonization in the 1600s, led to dramatic ecological

changes. The dodo became extinct on its home island of Mauritius within several decades, and over the next 150 years most native vertebrates suffered the same fate. This fascinating book provides the first full ecological history of the Mascarene Islands as well as the specific story of each extinct vertebrate, accompanied by Julian Hume's superb color illustrations.

It took less than a hundred years of human influence in Mauritius to wipe out the Dodo. The delicate balance of nature was suddenly tipped and became a threat to the survival of the Dodo, which had reigned supreme on this island for thousands of years. For nearly two hundred years after its extinction, the Dodo was forgotten, and there were some doubts as to whether it actually lived at all. It seemed that these strange birds had only been part of the imagination and exaggeration of sailors. Today, the once remote island of Mauritius is home to over a million people of European, African, Indian and Chinese origin. It can boast of being one of the most stable democratic countries in the world and it is host to thousands of tourists who find shops full of Dodos in many forms, shapes and sizes. Yet, there is an unfortunate lack of information about this island's unique national icon. This book allows the reader to examine various eyewitness writings, drawings, paintings and skeletal remains, which depict the Dodo as it actually was, and helps us to understand how it was driven to extinction. It also traces what happened after the final demise of the bird, and how worldwide evidence was pieced together to provide a reasonable idea of how the Dodo lived and died.--Back cover.

Charles Dudley Warner (1829-1900) was an American essayist and novelist. He worked with a surveying party in Missouri; studied law at the University of Pennsylvania; practiced in Chicago; was assistant editor (1860) and editor (1861-1867) of The Hartford Press, and after The Press was merged into The Hartford Courant, was co-editor with Joseph R Hawley; in 1884 he joined the editorial staff of Harper's Magazine, for which he conducted The Editors Drawer until 1892, when he took charge of The Editor's Study. He travelled widely, lectured frequently, and was actively interested in prison reform, city park supervision, and other movements for the public good. He was the first president of the National Institute of Arts and Letters. He first attracted attention by the reflective sketches entitled My Summer in a Garden (1870). Amongst his other works are Saunterings (1872), Backlog Studies (1873), Being a Boy (1878), In the Wilderness (1878), Captain John Smith (1881), Washington Irving (1881), A Little Journey in the World (1889), As We Were Saying (1891) and That Fortune (1899).

When the word Sheol in the Old Testament is rendered in English by the grave, it is inadequate times out of number. The Hebrew writers were not always speaking or thinking of the grave when they wrote of Sheol, which has to be bottomed in Amenta, the divine nether-earth, not simply in the tomb. The grave is not identical with hell, nor the pit-hole with the bottomless pit. The pangs and sorrows of Sheol, like the purging pangs of the Romish purgatory, have to be studied in the Egyptian Ritual. from Egyptian Wisdom in other Jewish Writings It goes unappreciated by modern Egyptologists, but it is embraced by those who savor the concept of a hidden history of humanity, and those who approach all human knowledge from the perspective of the esoteric. Gerard Massey 's massive Ancient Egypt: The Light of the World first published in 1907 and the crowning achievement of the self-taught scholar redefines the roots of Christianity via Egypt, proposing that Egyptian mythology was the basis for Jewish and Christian beliefs. Here, Cosimo proudly presents Book 8 of Ancient Egypt, in which Massey connects the stories of the Egyptians with the tales and lessons of the Hebrew prophets, likening David to Osiris and the King of Glory and Lord of Hosts that is, Yahweh to the sun-god of astronomical mythology. With similar symbology of flocks and shepherds, light and darkness, and immortality in an afterlife, it is impossible, Massey argues, not to see deep connections to and influences of Egyptian wisdom in that of the Hebrews. Peculiar and profound, this work will intrigue and delight readers of history, religion, and mythology. British author GERALD MASSEY (1828 1907) published works of poetry, spiritualism, Shakespearean criticism, and theology, but his best-known works are in the realm of Egyptology, including A Book of the Beginnings and The Natural Genesis.

The Bristol-based animation company Aardman is best known for its most famous creations Wallace and Gromit and Shaun the Sheep. But despite the quintessentially British aesthetic and tone of its movies, this very British studio continues to enjoy international box office success with movies such as Shaun the Sheep Movie, Flushed Away and Wallace and Gromit: Curse of the Were-Rabbit. Aardman has always been closely linked with one of its key animators, Nick Park, and its stop

motion, Plasticine-modelled family films, but it has more recently begun to experiment with modern digital filmmaking effects that either emulate 'Claymation' methods or form a hybrid animation style. This unique volume brings together leading film and animation scholars with children's media/animation professionals to explore the production practices behind Aardman's creativity, its history from its early shorts to contemporary hits, how its films fit within traditions of British animation, social realism and fantasy cinema, the key personalities who have formed its ethos, its representations of 'British-ness' on screen and the implications of traditional animation methods in a digital era.

The novel's protagonist is a British Roman Catholic priest, Father Percy Franklin, who looks identical to the mysterious U.S. Senator Julian Felsenburgh of Vermont. The senator appears as a lone and dramatic figure promising world peace in return for blind obedience. No one quite knows who he is or where he comes from, but his voice mesmerizes. Under his leadership, war is abolished. Felsenburgh becomes the President of Europe, then of the world, by popular acclaim. Everyone is fascinated with him, yet still no one knows much about him. People are both riveted and frightened by the way he demands attention. Most follow without question. Having been a close observer of President Felsenburgh's rise, Father Franklin is called to Rome, a Hong Kong-style enclave ruled by Pope John XXVI and raised to the College of Cardinals. Meanwhile, defections among bishops and priests increase. At Cardinal Franklin's instigation, the pope abolishes the Eastern Catholic Churches and forms a new religious order, the Order of Christ Crucified. All its members, including the Pope, vow to die in the name of the faith.

David Quammen's book, *The Song of the Dodo*, is a brilliant, stirring work, breathtaking in its scope, far-reaching in its message -- a crucial book in precarious times, which radically alters the way in which we understand the natural world and our place in that world. It's also a book full of entertainment and wonders. In *The Song of the Dodo*, we follow Quammen's keen intellect through the ideas, theories, and experiments of prominent naturalists of the last two centuries. We trail after him as he travels the world, tracking the subject of island biogeography, which encompasses nothing less than the study of

the origin and extinction of all species. Why is this island idea so important? Because islands are where species most commonly go extinct -- and because, as Quammen points out, we live in an age when all of Earth's landscapes are being chopped into island-like fragments by human activity. Through his eyes, we glimpse the nature of evolution and extinction, and in so doing come to understand the monumental diversity of our planet, and the importance of preserving its wild landscapes, animals, and plants. We also meet some fascinating human characters. By the book's end we are wiser, and more deeply concerned, but Quammen leaves us with a message of excitement and hope.
