### **Bittersweet Destiny**

The gap between a rising demand for health care services on the one side and scarce resources on the other, is leading to a growing pressure on decision-making processes. Hence, prioritization in medicine has become an increasingly important issue for assuring stability of health systems and improving the capability of health care. The present volume addresses normative dimensions of methodological and theoretical approaches, the legal basis behind priority setting as well as international experiences concerning the normative framework and the process of priority setting. It also examines specific criteria for prioritization and discusses economic evaluations. Contributing authors from a broad range of scientific disciplines discuss prioritization within an international dialogue.

For network professionals everywhere this feature of LTM is probably the most challenging. This book aims to help those faced with writing iRules and getting the best out of them. Anyone with an interest in iRules, particularly those new to them or with no programming knowledge will find this book invaluable. With over 100 rule examples there's plenty of material included to learn from and get you started. The book approaches iRules from the same standpoint as a network engineer and is for those in the networking field with little or no programming knowledge. This is an introductory beginners reference. By the time you've read the entire book you'll certainly understand a lot more about programming and you'll be able to write and understand iRules and fulfil most requirements demanded of you. The second edition more than doubles the amount of content and adds more detail, further examples, command and event references, glob and regular expression guides and more.

In Edo period Japan, a strange new disease called the Redface Pox has begun to

prey on the country's men. Within eighty years of the first outbreak, the male population has fallen by seventy-five percent. Women have taken on all the roles traditionally granted to men, even that of the shogun. The men, precious providers of life, are carefully protected. And the most beautiful of the men are sent to serve in the shogun's Inner Chamber -- VIZ Media

## **The Hero's Chamber**

Taking a page from Jules Verne's classic tale, Monisha Rajesh embarked on an adventure around India in eighty trains. Indian trains carry over twenty million passengers daily, plowing through cities, crawling past villages, climbing up mountains, and skimming along coasts. Monisha hopes that her journeys across India will lift the veil on a country that had become a stranger to her.

If you already have basic knowledge of GNU/Linux and storage systems, but have no experience of software-defined storage solutions and Ceph, and are eager to learn about it, this is the book for you. If you are looking for your next career jump as a Ceph administrator, this book is also ideal for you.

## **Ôoku: The Inner Chambers**

Sophia Loren is more than a beloved movie star, she's a cook. In this volume she offers a hundred or so Italian recipes arranged by course - antipasti through desserts. Stunning photos and all sorts of Sophia memorabilia accompany this book filled with reminiscences of family, home, and work. Sophia's repertoire is tempting and Sophia's introductory notes and other asides leave no doubt that the author is a serious, passionate cook.

## **The Passions of Andrew Jackson**

Bittersweet Destiny combines discourse on the evolution of human behavior with a philosophical perspective. It explores evolutionary theory aimed at determining human behavior. Del Thiessen presents this material against the broad background of everyday life, allowing the reader to see the theory of evolution as it has shaped his or her own behavior. However, he points out that when evolutionary theory is aimed at human behavior, the critics object, and controversy results. Thiessen argues that nothing in our lives makes sense unless we look at it through a biological lens. We can thereby understand our origin, our affiliation with all animals and plants, and our cultural destination. However, we can also discover a dark side to our destiny—our favoritism to those who share our own genes, our ability to deceive, and our capacity for abuse, rape, and murder. Good, bad, and indifferent, we serve the replication of our DNA. Critics extrapolate evolutionary

theory to a wide range of animal species, and even human morphology and physiology, but when the same perspective is applied to human behavior there is strong dissent. What these critics fear, according to Thiessen, is that accepting evolutionary notions about human behavior strikes at the heart of free will, self-determination, and social equality. *Bittersweet Destiny* describes the heroic efforts of naturalists Charles Darwin and Alfred Wallace to unlock the secrets of evolution. It continues with a vivid description of our fossil history and our chance beginnings. From there the story implicates disease processes in evolution, highlights our rational and irrational nature, focuses on those characteristics of brain evolution and language that make us distinctive, and illustrates our most basic survival and reproductive mechanisms. Thiessen warns the reader that things are as they are no matter what we might wish; we ignore facts and controversy at our own risk. This book will be significant to anthropologists, psychologists, biologists, and sociologists.

A unique approach to the philosophy of science that focuses on the liveliest and most important controversies surrounding science. Is science more rational or objective than any other intellectual endeavor? Are scientific theories accurate depictions of reality or just useful devices for manipulating the environment? These core questions are the focus of this unique approach to the philosophy of science. Unlike standard textbooks, this book does not attempt a comprehensive review of the entire field, but makes a selection of the most vibrant debates and issues. The author tackles such stimulating questions as: Can science meet the challenges of skeptics? Should science address questions traditionally reserved for philosophy and religion? Further, does science leave room for human values, free will, and moral responsibility? Written in an accessible, jargon-free style, the text succinctly presents complex ideas in an easily understandable fashion. By using numerous examples taken from diverse areas such as evolutionary theory, paleontology, and astronomy, the author piques readers' curiosity in current scientific controversies. Concise bibliographic essays at the end of each chapter invite readers to sample ideas different from the ones offered in the text and to explore the range of opinions on each topic. Rigorous yet highly readable, this excellent invitation to the philosophy of science makes a convincing case that understanding the nature of science is essential for understanding life itself.

A guide to leadership draws on Ernest Shackelton's management style during his exploration of Antarctica, providing advice on how leaders can instill optimism, set personal examples, and persevere in the face of adversity.

## **Learning Ceph**

For millennia, we lived in harmony with the Earth, taking only what we required to survive. But in just the past few centuries, we have used our powers to satisfy our obsession with consumption and new technology, without regard for the consequences. And in doing so, we have exploited our surroundings on an

unprecedented scale. In this revised and updated edition of *From Naked Ape to Superspecies*, David Suzuki and Holly Dressel lucidly describe how we have evolved beyond our needs, trampling other species, believing that we can make the Earth work the way we want it to. And they introduce us to the people who are fighting back, those who are resisting the inexorable advance of the "global economy" juggernaut, the people whose voices are difficult to hear over the din of corporate public relations machines. We learn about how human arrogance—demonstrated by our disregard for the small and microscopic species that constitute the Earth's engine and our reckless use of technological inventions like powerful herbicides or genetically engineered crops—is threatening the health of our children and the safety of our food supply.

Porter's Reaper Death is a minor inconvenience in the path to true love. When the God of the Underworld sends Alstair back to the Academy to help pick out a new headmaster, he doesn't mention he put Alstair in for the job. Angered but willing to keep his word, Alstair discovers the headmaster position comes with more knots of deception than a sailor's rope. Porter Exton had a crush on Alstair. He'd watched Alstair train Elijah through the window and had spent more than one night dreaming of the Reaper. However, dreams were set aside in order to discover the truth about his death and if the man who killed him is responsible for the other deaths at the school. Two men with different backgrounds need to discover what they have in common if they hope to save themselves from plotting gods, egomaniacs and possible killers. *Temple's Touch* Sometimes true love is right in front of you. Madison Archer dreams of the day he can claim Temple as his mate. However, when Temple heads off to school Maddie worries he'll be forgotten

among Temple's new friends. Maybe a half wolf can't understand the bond between mates. Temple Stewartson has always loved Madison Archer. Childhood friends, they were now old enough to start their own lives. However, Temple doesn't want to leave the pack without Madison by his side. So when Maddie disappears, Temple is willing to do anything to get his man back.

## **Restoration Stone Carving**

When Tom Perini, a legendary Heisman Trophy winner turned criminal lawyer, is found brutally murdered in Central Park, his widow Julie Perini suspects a wider conspiracy. Not only was her husband part of the defense team for a Congressman on trial for bribery, her intuition also tells her that the FBI is not too eager to find the killer. Relying on her skills as a journalist, Julie begins her own investigation and soon discovers her late husband's secret underworld associations; ties that now threaten her and her toddler's lives. Fighting grief and a sense of betrayal, Julie is pulled into an inescapable labyrinth of organized crime dealings, political corruption, brutal power grabs and murder. Desperate, Julie turns to Vincent Sorrentino, Tom's defense partner, for help, and the two discover a shocking and terrifying truth that threatens to paralyze them. But it may also hold the key—the only key—to saving the lives of Julie and her daughter. Renowned attorney Paul Batista seamlessly combines crack legal expertise with suspenseful storytelling to produce a pulse-pounding action story and a first rate courtroom procedural; a legal thriller so authentic, it reads like tomorrow's headlines.

Differentiated Reading for Comprehension is designed to provide high-interest, nonfiction reading success for all readers. This 64-page book focuses on third grade reading skills defined by the Common Core State Standards. Each of 15 stories is presented separately for the below-level, on-level, and advanced students, followed by a series of comprehension questions. Grade three covers such standards as how key details support the main idea, understanding the relationships and connections between parts of a text, and developing an understanding point of view. This new series will allow teachers to present the same content to below-level, on-level, and advanced students with these leveled nonfiction stories. It includes multiple-choice, fill-in-the-blank, and true/false questions; short-answer writing practice; and comprehension questions. Students stay interested, build confidence, and discover that reading can be fun! The reading passages will be separated into sections with titles such as Extreme Places, Amazing People, Wild Animals, Strange and Unexplained, Fascinating Machines, and Amazing Kids.

Probability, Markov Chains, Queues, and Simulation provides a modern and authoritative treatment of the mathematical processes that underlie performance modeling. The detailed explanations of mathematical derivations and numerous illustrative examples make this textbook readily accessible to graduate and advanced undergraduate students taking courses in which stochastic processes

play a fundamental role. The textbook is relevant to a wide variety of fields, including computer science, engineering, operations research, statistics, and mathematics. The textbook looks at the fundamentals of probability theory, from the basic concepts of set-based probability, through probability distributions, to bounds, limit theorems, and the laws of large numbers. Discrete and continuous-time Markov chains are analyzed from a theoretical and computational point of view. Topics include the Chapman-Kolmogorov equations; irreducibility; the potential, fundamental, and reachability matrices; random walk problems; reversibility; renewal processes; and the numerical computation of stationary and transient distributions. The M/M/1 queue and its extensions to more general birth-death processes are analyzed in detail, as are queues with phase-type arrival and service processes. The M/G/1 and G/M/1 queues are solved using embedded Markov chains; the busy period, residual service time, and priority scheduling are treated. Open and closed queueing networks are analyzed. The final part of the book addresses the mathematical basis of simulation. Each chapter of the textbook concludes with an extensive set of exercises. An instructor's solution manual, in which all exercises are completely worked out, is also available (to professors only). Numerous examples illuminate the mathematical theories. Carefully detailed explanations of mathematical derivations guarantee a valuable pedagogical approach. Each chapter concludes with an extensive set of exercises.

Accountability is a hot issue in business as organizations face the toughest recession in years. Yet the notion of accountability is confused with punishment, fault, blame and guilt. Accountability expert Linda Galindo has created a program for building a mindset for personal accountability and responsibility for organizational results. The Accountability Experience training program outlines a 3-step process that leads from accepting responsibility to self-empowerment to take personal action and finally to answering for the outcome through accountability. The Participant Workbook takes the participant through the exercises to understand and master the personal accountability process.

### **It Started with Copernicus**

Most people vaguely imagine Andrew Jackson as a jaunty warrior and a man of the people, but he was much more—a man just as complex and controversial as Jefferson or Lincoln. Now, with the first major reinterpretation of his life in a generation, historian Andrew Burstein brings back Jackson with all his audacity and

hot-tempered rhetoric. The unabashedly aggressive Jackson came of age in the Carolinas during the American Revolution, migrating to Tennessee after he was orphaned at the age of fourteen. Little more than a poorly educated frontier bully when he first opened his public career, he was possessed of a controlling sense of honor that would lead him into more than one duel. As a lover, he fled to Spanish Mississippi with his wife-to-be before she was divorced. Yet when he was declared a national hero upon his stunning victory at the Battle of New Orleans, Jackson suddenly found the presidency within his grasp. How this brash frontiersman took Washington by storm makes a fascinating story, and Burstein tells it thoughtfully and expertly. In the process he reveals why Jackson was so fiercely loved (and fiercely hated) by the American people, and how his presidency came to shape the young country's character. From the Trade Paperback edition.

The first mystery in a truly unique crime series. 'There comes a time when a novel raises the bar for a particular genre, and The Sea Detective does just that for Scottish crime fiction' (Scotsman) Cal McGill is an Edinburgh-based oceanographer, environmentalist and one-of-a-kind investigator. Using his knowledge of the waves - ocean currents, prevailing winds, shipping records - McGill can track where objects have come from, or where they've gone. It's a unique skill that can help solve all sorts of mysteries. Such as when two severed feet wash up miles apart on two different islands off the coast of Scotland. Most strangely, forensic tests reveal that the feet belong to the same body. As Cal McGill investigates, he unravels a web of corruption, exploitation and violence, which threatens many lives across the globe - very soon including his own Praise for The Sea Detective: 'Raises the bar for Scottish crime fiction elegantly written and compelling' The Scotsman 'Excellent' The Literary Review - top five crime books of the year 'Promises to be a fine series of detective novels' Sunday Times Crime Book of the Month 'An unusual, interesting and enthralling read' Shotsmag 'A compelling protagonist' The Times Literary Supplement

## **Christmas Poems and Stories**

These chapters gathered from two special issues of the journal Life Writing take up a major theme of recent work in the Humanities: Trauma. Autobiography has had a major role to play in this 'age of trauma', and these essays turn to diverse contexts that have received little attention to date: partition narratives in India, Cambodian and Iranian rap, refugee letters from Nauru, graffiti in Tanzania, and the silent spaces of trauma in Chile and Guantanamo. The contexts and media of these autobiographical trauma texts are diverse, yet they are linked by attention to questions of who gets to speak/write/inscribe autobiographically and how and where and why, and how can silences in the wake of traumatic experiences be read. These essays deliberately set out to establish some new fields for research in trauma studies by reaching out to a broader global context, into various texts, media and artifacts, representing diverse histories with specific attention to different voices, bodies, memories and subjectivities. This collection addresses the contemporary circuits of trauma story, and the media and icons and narratives that carry trauma story to political effect and emotional affect. This book was previously published as two special issues of Life Writing.

## **Raging Star**

The much-anticipated, thrilling conclusion to Moira Young's Dust Lands trilogy. When the star reader, Auriel Tai, challenged Saba to seize her destiny and defeat DeMalo and the Tonton, Saba was confident in her purpose. Then she met DeMalo and he confounded all expectations with his seductive vision of a healed earth, a New Eden. DeMalo and Saba had an intense and passionate encounter - physical, emotional and psychic - that changed her life, and now he wants Saba to join him, in life and work, to create and build a healthy, stable, sustainable world for the chosen few. Jack's choice is clear: to fight DeMalo and try to stop his dangerous New Eden project. Still uncertain, her connection with DeMalo a secret, Saba

commits herself to the fight. Joined by her brother Lugh, anxious for the land in New Eden, Saba leads an inexperienced guerilla band against the powerfully charismatic DeMalo, in command of his settlers and the Tonton militia. What chance do they have? Saba must act. And be willing to pay the price. From the Hardcover edition.
