This book has brought 24 groups of experts and active researchers around the world together in image processing and analysis, video processing and analysis, and communications related processing, to present their newest research results, exchange latest experiences and insights, and explore future directions in these important and rapidly evolving areas. It aims at increasing the synergy between academic and industry professionals working in the related field. It focuses on the state-of-the-art research in various essential areas related to emerging technologies, standards and applications on analysis, processing, computing, and communication of multimedia information. The target audience of this book is researchers and engineers as well as graduate students working in various disciplines linked to multimedia analysis, processing and communications, e.g., computer vision, pattern recognition, information technology, image processing, and artificial intelligence. The book is also meant to a broader audience including practicing professionals working in image/video applications such as image processing, video surveillance, multimedia indexing and retrieval, and so on. We hope that the researchers, engineers, students and other professionals who read this book would find it informative, useful and inspirational toward their own work in one way or another.

Remote Sensing of the Terrestrial Water Cycle is an outcome of the AGU Chapman Conference held in February 2012. This is a comprehensive volume that examines the use of available remote sensing satellite data as well as data from future missions that can be used to expand our knowledge in quantifying the spatial and temporal variations in the terrestrial water cycle. Volume highlights include: - An in-depth discussion of the global water cycle - Approaches to various problems in climate, weather, hydrology, and agriculture - Applications of satellite remote sensing in measuring precipitation, surface water, snow, soil moisture, groundwater, modeling, and data assimilation - A description of the use of satellite data for accurately estimating and monitoring the components of the hydrological cycle - Discussion of the measurement of multiple geophysical variables and properties over different landscapes on a temporal and a regional scale Remote Sensing of the Terrestrial Water Cycle is a valuable resource for students and research professionals in the hydrology, ecology, atmospheric sciences, geography, and geological sciences communities.

This volume (5116) of Springer's Lecture Notes in Computer Science contains the proceedings of the 9 International Workshop on Digital Mammography (IWDM) which was held July 20 - 23, 2008 in Tucson, AZ in the USA. The IWDM meetings traditionally bring together a diverse set of researchers (physicists, mathematicians, computer scientists, engineers), clinicians (radiologists, surgeons) and representatives of industry, who are jointly committed to developing technologies to support clinicians in the early detection and subsequent patient management of breast cancer. The IWDM

conference series was initiated at a 1993 meeting of the SPIE Medical Imaging Symposium in San Jose, CA, with subsequent meetings hosted every two years at sites around the world. Previous meetings were held in York, England; Chicago, IL USA; Nijmegen, Netherlands; Toronto, Canada; Bremen, Germany; Durham, NC USA and Manchester, UK. The 9 IWDM meeting was attended by a very international group of participants, and during the two and one-half days of scientific sessions there were 70 oral presentations, 34 posters and 3 keynote addresses. The three keynote speakers discussed some of the “hot” topics in breast imaging today. Karen Lindfors spoke on “Dedicated Breast CT: Initial Clinical Experiences. ” Elizabeth Rafferty asked the question is “Breast Tomosynthesis: Ready for Prime Time?” Finally, Martin Tornai discussed “3D Multi-Modality Molecular Breast Imaging.

Seldom does a book achieve status as a classic in its first edition, but *The Art of Aesthetic Surgery* by Foad Nahai has been hailed as a masterpiece since its inception. Reviews have been universally laudatory, and residents and experienced practitioners alike have embraced this work as the ultimate resource on all things aesthetic. Now, this landmark work has been totally revised and updated with over 40 new chapters (many with new authors) and every chapter has been revised to reflect the latest trends, techniques, and information. This three-volume set also includes seven DVDs with 24 operative videos. Comprehensive Coverage 93 chapters in three volumes cover the full range of cosmetic medical treatments and aesthetic operations. Topics include: Hair transplantation and brow lift Eyelid surgery Laser resurfacing and chemical peels Tissue fillers and fat grafting Rhytidectomy and face and neck lift Facial implants Rhinoplasty and ptoplasty Lip rejuvenation Breast augmentation, reduction, and mastopexy Surgical, noninvasive, and minimally invasive body contouring Liposuction To address the modern physician's need for business acumen as well as surgical skill, three chapters focus on practice management, ranging from practice model options, staff and financial management, marketing and communications, and legal issues. World-Renowned Authors Dr. Foad Nahai is an acknowledged leader in aesthetic surgery. He has personally written a third of the chapters for this three-volume work. His contributors, representing the "who's who" of aesthetic surgery, provide detailed accounts of their techniques for the different operations, as well as the planning process so crucial to producing excellent results. Help with Decision-Making Of particular note are the clinical decision-making chapters authored by Dr. Nahai. This invaluable insight provides readers with a unique overview of the various options for each problem, along with his preferred solutions. Complete with algorithms and case studies, this problem-solving feature offers the expert guidance necessary to sort through options, understand their advantages and limitations, and make the best choice for each patient. Necessary Anatomy Key chapters introducing each major anatomic region or topic area focus on applied anatomy and provide essential information that the surgeon needs to know to execute these surgical maneuvers

safely and effectively. Reliable Format This new edition maintains the same features that made the previous edition so popular, including beautiful medical illustrations, large type for readability, and a consistent, comprehensive approach. The semi-atlas format features the applicable images located next to legend text for enhanced clarity.

This is the ideal resource for all those requiring an authoritative and up-to-date review of imaging appearances of diseases of the lung, pleura and mediastinum. Chest radiography and CT are integrated with other imaging techniques, including MRI and PET, where appropriate. The clinical and pathologic features of different diseases are provided in varying degrees of detail with more in depth coverage given to rarer and less well understood conditions. A single volume, comprehensive reference text on chest radiology. Provides in a single resource all of the information a generalist in diagnostic radiology needs to know. Concisely and clearly written by a team of 4 internationally recognized authors. Avoids the inconsistency, repetition, and unevenness of coverage that is inherent in multi-contributed books. Multimodality coverage integrated throughout every chapter. All of the applicable imaging modalities are covered in a clinically relevant, diagnostically helpful way. Approximately 3,000 high quality, good-sized images. Provides a complete visual guide that the practitioner can refer to for help in interpretation and diagnosis. Covers both common and uncommon disorders. Provides the user with a single comprehensive resource, no need to consult alternative resources. Access the full text online and download images via Expert Consult Access the latest version of the Fleischner Society's glossary of terms for thoracic imaging. Outlines, summary boxes, key points used throughout. Makes content more accessible by highlighting essential information. Brand new color images to illustrate Functional imaging techniques. Many of the new imaging techniques can provide functional as well as anatomic information. Introduction of a second color throughout in summary boxes in order to better highlight key information. There's a wealth of key information in the summary boxes—will be highlighted more from the narrative text and will therefore be easier to access. Practical tips on identifying anatomic variants and artefacts in order to avoid diagnostic pitfalls. Many misdiagnoses are the result of basic errors in correlating the anatomic changes seen with imaging to their underlying pathologic processes. Latest techniques in CT, MRI and PET as they relate to thoracic diseases. The pace of development in imaging modalities and new applications/refined techniques in existing modalities continues to drive radiology forward as a specialty. Emphasis on cost-effective image/modality selection. Addresses the hugely important issue of cost-containment by emphasizing which imaging modality is helpful and which is not in any given clinical diagnosis. COPD and Diffuse Lung Disease, Small Airway disease chapters extensively up-dated. Access the full text online and download images via Expert Consult Access the latest version of the Fleischner Society's glossary of terms for thoracic imaging.

Creating Video for Teachers and Trainers This practical resource will help teachers and trainers produce professional quality training videos, even while using less than professional quality equipment and software. Author Timothy Spannaus shows how to use professional techniques with consumer-grade equipment to produce videos that work and tell the intended story, minimizing defects that get in the way of improving learning and performance. The end result is a video that can be used in classroom or labs, distributed on the web, packaged for use in learning management systems, or shared on social media sites. Praise for Creating Video for Teachers and Trainers "This is a practical, immediately usable resource, filled with concrete and creative ideas and tips. For those of us wanting to know how to plant our feet and not stumble when venturing into designing and making great videos, it's a godsend." —Len Scrogan, digital learning architect, Future-Talk Blog "The perfect roadmap for instructional professionals new to video production. Includes evidence-based guidelines on the when, why, and how of video for training purposes." —Ruth Clark, president, Clark Training and Consulting "In my 20-plus years working in the television, training, and corporate communication industry, Tim's book is the first to provide a practical and budget-conscious approach to video production for the learning professional. Comprehensive in its scope, the book's realistic examples, combined with a systematic roadmap, arms you with the tools to kickstart your videos with a quality and efficiency that we all dream about in the learning profession." —David Shulkin, Video Operations and Instructional Technology Catalyst, Bloomfield Hills Schools Digital Media Services
