### **A Catalog of Books Represented by Library of Congress Printed Cards Issued to July 31, 1942**

#### **Guide to U.S. Government Publications**

This manual is part of the following series of manuals. (1) NAVEDTRA 130, Task Based Curriculum Development Manual; (2) NAVEDTRA 131, Personnel Performance Profile Based Curriculum Development Manual; (3) NAVEDTRA 134, Navy Instructor Manual; (4) NAVEDTRA 135, Navy School Management Manual. The NAVEDTRA 130 series of manuals provides fundamental guidance within the Naval Education and Training Command (NAVEDTRACOM) for the development of curricula, the delivery of instruction, and the management and evaluation of training programs. Each of the manuals is designed as a stand alone document to serve a specific user group such as curriculum developers, instructors, course managers or training managers. The manuals are, however, interrelated and appropriately cross referenced to one another. The NAVEDTRA 135, Navy School Management Manual, amplifies the policies set forth in Chief of Naval Education and Training (CNET) instructions; defines the processes and procedures

periodicals and reference tools published by U.S. government agencies. Over the years, the index section of the Guide to U.S. Government Publications has expanded to more than 40,000 entries. Agencies and titles are indexed, followed by a keyword title index for quick and easy referencing. No other single resource provides historical and current information on U.S. government publications in one place.

### **The Book of Basic Machines**

### **Monographic Series**

This book includes both Hospital Corpsman NAVEDTRA 14295 and the Advancement Handbook for Hospital Corpsman. The United States Navy training programs have long been the standard used as the pinnacle of training achievement. The Hospital Corpsman training program has been continuously tested and updated to successfully educate every member of the Navy Hospital Corps since its inception. The needs of the instructor, the student, the patient, and the Navy are perfectly balanced. This is the model all educators should follow when developing training programs.

### **Navy School Management Manual**

## **CIS Index to U.S. Executive Branch Documents, 1910-1932**

Over 220,000 entries representing some 56,000 Library of Congress subject headings. Covers all disciplines of science and technology, e.g., engineering, agriculture, and domestic arts. Also contains at least 5000 titles published before 1876. Has many applications in libraries, information centers, and other organizations concerned with scientific and technological literature. Subject index contains main listing of entries. Each entry gives cataloging as prepared by the Library of Congress. Author/title indexes.

## **How to Get it**

### **The United States Navy**

Have you ever wondered why levers and pulleys make it easy to lift heavy objects? Or thought about what it is that makes a combustion engine work? The Book of Basic Machines will give you the information you need to understand key concepts, techniques, components, and much more. Designed and prepared by the Naval Education and Training Program Development Center for naval training, and taught widely in technical school across the country, the manual covers the theory and application of many of the most important mechanical ideas. Concepts build effortlessly from one chapter to the next. Clear explanations, illuminating examples, and over 200 skillfully rendered diagrams, cross-sections, and illustrations make it remarkably easy for readers of any level to understand the fascinating inner-workings of basic machines. The Book of Basic Machines is an invaluable resource for mechanical engineering students looking to learn the basics, working engineers wanting to brush up on some theory, or hobbyists who simply want to know how things work. Simply put, this book is required reading for anyone interested in machines. From the basics of simple levers to the principles of the internal combustion engine, The Book of Basic Machines
