Astronomy for Older Eyes

If you thought The Manchurian Candidate was fiction or John Farris's The Fury, which featured a CIA mind-control program run amok, was the stuff of an overheated imagination, you were sorely mistaken. From behind the cloak of U.S. military secrecy comes the story of Star Gate, the project that for nearly a quarter of a century trained soldiers and civilian spies in extra-sensory perception (ESP). Their objective: To search out the secrets of America's cold war enemies using a skill called "remote viewing." Paul H. Smith, a U.S. Army Major, was one of these viewers. Assigned to the remote viewing unit in 1983 at a pivotal time in its history, Smith served for the rest of the decade, witnessing and taking part in many of the seminal national-security crises of the twentieth century. With the Star Gate secrets declassified and the program mothballed by the Central Intelligence Agency, the story can now be told of the ordinary soldiers drafted onto the battlefield of human consciousness. Using hundreds of interviews with the key players in the Star Gate program, and gathering thousands of pages of documents, Smith opens the records on this remarkable chapter in American military, scientific, and cultural history. He reveals many secrets about how remote viewing works and how it was used against enemy targets. Among these stories are the search for hostages in Lebanon; spying on Soviet directed energy weapons; investigating the bombing of Pan Am Flight 103 over Lockerbie, Scotland; tracking foreign testing of weapons of mass destruction; combating narco-trafficking off America's coasts; aiding in the Iranian hostage situation; finding KGB moles in the CIA; pursuing Middle East terrorists; and more. Between the lines in the official records are revelations about unrelenting attempts from within and without to destroy the remote viewing program, and the efforts that kept Star Gate going for more than two decades in spite of its enemies. This is a story for the believer and the skeptic---a rare look at the innards of a top secret program and

an eye-opening treatise on the power of the human mind to transcend the limitations of space and time. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Image is You

This book is composed by the papers accepted for presentation and discussion at The 2019 International Conference on Information Technology & Systems (ICITS'20), held at the Universidad Distrital Francisco José de Caldas, in Bogotá, Colombia, on 5th to 7th February 2020. ICIST is a global forum for researchers and practitioners to present and discuss recent findings and innovations, current trends, professional experiences and challenges of modern information technology and systems research, together with their technological development and applications. The main topics covered are: information and knowledge management; organizational models and information systems; software and systems modelling; software systems, architectures, applications and tools; multimedia systems and applications; computer networks, mobility and pervasive systems; intelligent and decision support systems; big data analytics and applications; human-computer interaction; ethics, computers & security; health informatics; information technologies in education.

Recent Advances in Information and Communication Technology 2020

(Vocal Selections). "This show has guts!" proclaimed Richard Zoglin of Time magazine about this 2012 revival, which won the Off-Broadway Alliance Award for Best Musical Revival. It features music by Michael Gore, lyrics by Dean Pitchford, and book by Lawrence D. Cohen (based on the novel by Stephen King). Our folio features vocal selections for 18 songs from that revival, including: Alma Mater * And Eve Was Weak * Carrie * Carrie (Reprise) * Do Me a Favor * Dreamer in Disguise * Epilogue * Evening Prayers * I Remember How Those Boys Could Dance * In * A Night We'll Never Forget * Once You See * Open Your Heart * Unsuspecting Hearts * When There's No One * Why Not Me? * The World According to Chris * You Shine.

Carrie: The Musical - Vocal Selections

Coastal Ecological Systems of the United States

This book is a compilation of papers, manuals & comments to help students of (CRV) or Controlled Remote Viewing, learn this amazing intuitive art. We present FOIA documents from the CIA Star Gate archives, from the public domain and from prominent practitioners of remote viewing for the first time together in one book. First, we include a paper from the father of Remote Viewing and the creator of CRV - Ingo Swann. The document is titled 'Co-ordinate Remote Viewing (CRV)

technology 1981-1983, Three year project'. After this we present two differing CRV manuals. The first by Ingo Swann's top CRV student and the only person trained in all CRV stages by Ingo Swann (Tom McNear). This is titled: 'Coordinate Remote Viewing Stages I-VI and Beyond' - 1985. The second, a later manual was created primarily by Paul H. Smith with help from the 'then' team of military Controlled Remote Viewers, titled: 'The DIA CRV Manual' - 1986.

Hollywood in the Information Age

Bruce's home is already a full house. But when a big storm brings all his woodland neighbors knocking, he'll have to open his door to a crowd of animals in need of shelter—whether he likes it or not. Readers will love this next installment of the uproarious, award-winning Mother Bruce series.

A Descriptive Geography and Brief Historical Sketch of Palestine

How did the human brain with all its manifold capacities evolve from basic functions in simple organisms that lived nearly a billion years ago? John Allman addresses this question in *Evolving Brains*, a provocative study of brain evolution that introduces readers to some of the most exciting developments in science in recent years.

Bruce's Big Storm

It will take a Christmas miracle to melt her heart. Resort developer Madison Lane is about to lose the one thing she loves most in the world - her job. Dubbed "The Grinch Who Killed Christmas," Madison spoiled a deal that would turn quaint Christmas, Colorado, into a tourist's winter wonderland. Now the citizens want her fired but the company gives her one last chance, sending Madison to the small town to restore the holiday cheer. For Sheriff Gage McBride, no hotshot executive from New York City is going to destroy the dreams of the people he loves. But one look at this beautiful woman and it's his heart that may be broken. In just a few days, Madison causes more trouble than he's had to deal with all year. He can't decide if she's naughty or nice, but one thing is for certain- Christmas will never be the same again

Interactive TV: A Shared Experience

Bestseller Michael Uslan (*Archie Marries*, *Batman: Black and White*) unites two classic pulp heroes in a meticulously-researched historical fiction! An unstoppable power will plunge the world into darkness unless the crime-fighting icons known as The Shadow, The Green Hornet, and Kato can stop it! When an invention capable of harnessing elemental forces falls into the hands of the maniacal Shiwan Khan, The Shadow races against time to prevent the utter destruction of all

America's vital industries and financial institutions. To that end, he enlists The Green Hornet, a crusader masquerading as a crimelord, to infiltrate Shiwan's organization of saboteurs. Will the masked heroes prevent Khan's deadly plot to shatter a nation? This 144 page collection reprints issues 1-5 of the hit series written by MICHAEL USLAN and drawn by KEITH BURNS. It features footnotes for every issue and a complete cover gallery by ALEX ROSS, JOHN CASSADAY and CHRIS ELIOPOULOS. "Uslan offers up a fast-paced and intense story that pulls you in from the first page." - COMIC BOOK THERAPY "Great premise, great story and great art." - SCI FI PULSE

The Essential Guide to Remote Viewing

Celebrity stylist and fashion icon Brad Goreski takes readers inside his whirlwind life, from his small-town Canadian roots to his worldwide successes, sharing a wealth of style tips, tricks, and photos along the way to help every reader look and feel their absolute best. Fans of The Rachel Zoe Project and It's a Brad, Brad World already know that there's no one on reality TV more fearless or savvy when it comes to style. But Born to Be Brad gives the world its first behind-the-scenes look at how Brad became the stylist he is. This is not just a how-to style book. It's a sublimely written, riveting life story with the power to take you to the top of your fashion game—right along with Brad.

Lucifer Christ Encounters

This book gathers papers presented at the International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD-2018), which was held in Tangiers, Morocco on 12–14 July 2018. In addition to the latest research in the field of energy, it offers new solutions, tools and effective techniques, and provides essential information on smart grids, renewable and economical energy. Further, it addresses modeling, storage management and decision support in the field of energy, offering a valuable guide for researchers, professionals and all those who are interested in the development of advanced intelligent systems in the energy sector.

Ai Weiwei

On October 5th, 2009, Dave posted a note on Facebook announcing that he was quitting his job, dropping everything, and walking west. But what no one knew (save a few collaborators) was that Dave was lying and that his westward travels were all an elaborate hoax. And so Dave's existence split in two-earning his followers' trust with postings about everyday activities before escalating the story with tales of teepeeing an Amish horse and buggy and thus being forced to work off his debt on the farm. Meanwhile, the real Dave went into hiding, sequestering himself in his parents' e.

Sleep with Buteyko

A foreword for the present workshop proceedings cannot be provided without first looking at the larger context of the AMI conference in which the workshops were organized. The AMI 2007 conference has roots in preceding events, but in many respects, AMI can be called a novel conference format and hence a premiere. Among the several aims that inspired and shaped this new conference format, the following two are particularly worth considering: (1) to provide a forum for the ambient intelligence flavor of research on the Post-PC era of computer science, complementing the ubiquitous computing and pervasive computing flavors emphasized by already existing conferences; (2) to offer an event that attracts contributions from all over the globe yet emphasizes European strengths – with particular reference to the Information Society Technologies (IST) branch of the EU research framework programs (FPs), which carry the same label as the conference. The workshop organization chairs reflected these unique characteristics of the new AMI conference series in the call for workshop proposals using two corresponding measures: (1) by particularly soliciting workshops on in-depth topics corresponding to the above-mentioned ambient intelligence flavor of Post-PC research; (2) by offering two different workshop threads: one ‘usual’ thread for advanced topics (called “SW workshops”) and one thread for workshops related to concrete EU FP6 and FP7 projects (called “EU workshops”).

Fired-Up Fundraising

A National Book Award Finalist An Edgar Award Finalist A California Book Award Gold Medal Winner A dark, contemporary fairy tale in the tradition of Neil Gaiman. Jeremy Johnson hears voices. Or, specifically, one voice: the ghost of Jacob Grimm, one half of The Brothers Grimm. Jacob watches over Jeremy, protecting him from an unknown dark evil whispered about in the space between this world and the next. But Jacob can't protect Jeremy from everything. When coltish, copper-haired Ginger Boultinghouse takes a bite of a cake so delicious it's rumored to be bewitched, she falls in love with the first person she sees: Jeremy. In any other place, this would be a turn for the better for Jeremy, but not in Never Better, where the Finder of Occasions—whose identity and evil intentions nobody knows—is watching and waiting, waiting and watching. . . And as anyone familiar with the Brothers Grimm know, not all fairy tales have happy endings. Veteran writer Tom McNeal

has crafted a young adult novel at once grim(m) and hopeful, full of twists, and perfect for fans of contemporary fairy tales like Neil Gaiman's *The Graveyard Book* and Holly Black's *Doll Bones*. The recipient of five starred reviews, *Publishers Weekly* called *Far Far Away* "inventive and deeply poignant." From the Hardcover edition.

Sandworm

Originally published in hardcover in 2019 by Doubleday.

The Seventh Sense

The human visual system is amazing in its ability to guide us in a diverse range of everyday tasks - driving, preparing food, reading - in addition to leisurely pursuits such as ball games, or reading music. Somehow, without conscious effort, our eyes find the information we need to negotiate the world around us. Only recently, however, has it become possible to explore just how it is that our eyes can supply the brain systems controlling our limbs with the information they need to carry out these tasks. Thanks to the development of head-mounted eye trackers, we can now explore the strategies that the eye movement system uses in the the initiation and guidance of action. *Looking and Acting* explores a wide variety of visually guided activities - from sedentary activities such as reading music, or drawing, to dynamic behaviours such as driving or playing cricket. It proposes that the eye movement system has its own store of knowledge about where to find the most appropriate information for guiding action - information not often available to conscious scrutiny. Thus, every action has its own specific repertoire of linked eye movements. The book starts with a brief background of eye movement studies. Part two reviews observations and analyses of different activities. Finally, the book looks at visual representations, the neurophysiology of the brain systems involved, and the roles of attention and learning. Opening up a whole new field in eye movement research, the fascinating new book will be of great interest to all vision scientists, (psychologists, physiologists, ophthalmologists) whether at professional, graduate, or advanced undergraduate levels.

Convergence Culture

Marketing attempts to influence the way consumers behave. These attempts have implications for the organizations making the attempt, the consumers they are trying to influence, and the society in which these attempts occur. We are all consumers and we are all members of society, so consumer behavior, and attempts to influence it, are critical to all of us. This text is designed to provide an understanding of consumer behavior. This understanding can make us better consumer, better marketers, and better citizens. A primary purpose of this text is to provide the student with a usable, managerial understanding of consumer behavior.-Pref.

The Trouble with Christmas

This is a major new assessment of the American movie industry in the 1990's, focusing on the development of new communication technologies such as cable and home video and examining their impact on the production and distribution of motion pictures.

Last Week Tonight with John Oliver Presents a Day in the Life of Marlon Bundo

“What the future fortunes of [Gramsci’s] writings will be, we cannot know. However, his permanence is already sufficiently sure, and justifies the historical study of his international reception. The present collection of studies is an indispensable foundation for this.” —Eric Hobsbawm, from the preface Antonio Gramsci is a giant of Marxian thought and one of the world's greatest cultural critics. Antonio A. Santucci is perhaps the world's preeminent Gramsci scholar. Monthly Review Press is proud to publish, for the first time in English, Santucci’s masterful intellectual biography of the great Sardinian scholar and revolutionary. Gramscian terms such as “civil society” and “hegemony” are much used in everyday political discourse. Santucci warns us, however, that these words have been appropriated by both radicals and conservatives for contemporary and often self-serving ends that often have nothing to do with Gramsci’s purposes in developing them. Rather what we must do, and what Santucci illustrates time and again in his dissection of Gramsci’s writings, is absorb Gramsci’s methods. These can be summed up as the suspicion of “grand explanatory schemes,” the unity of theory and practice, and a focus on the details of everyday life. With respect to the last of these, Joseph Buttigieg says in his Nota: “Gramsci did not set out to explain historical reality armed with some full-fledged concept, such as hegemony; rather, he examined the minutiae of concrete social, economic, cultural, and political relations as they are lived in by individuals in their specific historical circumstances and, gradually, he acquired an increasingly complex understanding of how hegemony operates in many diverse ways and under many aspects within the capillaries of society.” The rigor of Santucci’s examination of Gramsci’s life and work matches that of the seminal thought of the master himself. Readers will be enlightened and inspired by every page.

Not Quite as Advertised

Written by one of the world's leading experts in the field, The Essential Guide to Remote Viewing is a basic introduction to the extraordinary extrasensory perceptual skill which was developed for the US military during the Cold War. This book describes what remote viewing is, how it came to be, what kinds of remote viewing there are, and counters skeptical arguments against remote viewing's legitimacy. Further, the book contains examples of successful remote viewing attempts, explains how remote viewing can be used for practical purposes, how ordinary civilians can themselves now learn

to do it, and outlines experiments that readers can try for themselves. The ideal reader of *The Essential Guide to Remote Viewing* will be someone who knows little or nothing about remote viewing and wants an inexpensive source for credible information. Others who will be interested are those who are involved in remote viewing and want an easily-accessible introduction to give to friends or relatives who have questions about what this thing is their loved ones have gotten involved with. Finally, those who are already involved with remote viewing but feel the need to extend their basic knowledge will find this book both interesting and useful.

Born to Be Brad

Advanced Intelligent Systems for Sustainable Development (AI2SD'2018)

This book gathers the proceedings of the 16th International Conference on Computing and Information Technology (IC2IT 2020), held on May 14th-15th, 2020, at Dusit Thani Pattaya, Thailand. The topics covered include big data, artificial intelligence, machine learning, natural language processing, speech recognition, image and video processing, and deep learning. In turn, the topics represent major research and engineering directions for autonomous driving, language assistants, automatic translation, and answering systems. Lastly, they are responses to major economic changes around the world, which are increasingly shaped by the need for enhanced globalization and worldwide cooperation, and by emerging global problems.

Evolving Brains

"A captivating short work almost beyond description." *The New Yorker*

Proceedings of the 48th Congress of the International Society for Applied Ethology

This book is for the aging amateur astronomy population, including newcomers to astronomy in their retirement and hobbyists who loved peering through a telescope as a child. Whether a novice or an experienced observer, the practice of astronomy differs over the years. This guide will extend the enjoyment of astronomy well into the Golden Years by addressing topics such as eye and overall health issues, recommendations on telescope equipment, and astronomy-related social activities especially suited for seniors. Many Baby-Boomers reaching retirement age are seeking new activities, and amateur astronomy is a perfect fit as a leisure time activity. Established backyard astronomers who began their love of astronomy in their youth, meanwhile, may face many physical and mental challenges in continuing their lifelong hobby as

they age beyond their 55th birthdays. That perfect telescope purchased when they were thirty years old now suddenly at sixty years old feels like an immovable object in the living room. The 20/20 eyesight has given way to reading glasses or bifocals. Treasured eyepieces feel all wrong. Growing old is a natural process of life, but astronomy is timeless. With a little knowledge and some lifestyle adjustments, older astronomers can still enjoy backyard observing well into their seventies, eighties and even into their nineties.

Constructing Ambient Intelligence

The processes required to make a humble stainless steel teaspoon are remarkably complicated and every stage involves risk, coal, energy, capital, international trade and finance. Stainless steel cutlery has taken thousands of years of experimentation and knowledge to evolve and the end result is that we can eat without killing ourselves with bacteria. We are in the best times to have ever lived on planet Earth and the future will only be better. All this we take for granted. Greens may have started as genuine environmentalists. Much of the green movement has now morphed into an unelected extremist political pressure group accountable to no one. Greens create problems, many of which are concocted, and provide no solutions because of a lack of basic knowledge. This book examines green policies in the light of established knowledge and shows that they are unrealistic. Policies by greens adopted by supine governments have resulted in rising costs, increased taxes, political instability, energy poverty, decreased longevity and environmental degradation and they don't achieve their ideological aims. Wind, solar and biomass energy emit more carbon dioxide than they save and reduction of carbon dioxide emissions does nothing to change climate and only empties the pocket. No stainless steel teaspoon could be made using green "alternative energy." This book argues that unless the greens live sustainably in caves in the forest and use no trappings of the modern world, then they should be regarded as hypocrites and treated with the disdain they deserve.

Consumer Behavior

A collection of short poems, mainly on themes suggested by the natural world.

CRV - Controlled Remote Viewing

Praise for Fired-Up Fundraising: Turn Board Passion into Action "Fired-Up Fundraising is honest, realistic, practical, and inspiring. It transforms the whole concept of fundraising from obligation and drudgery into passion and fun. Every CEO, development director, development consultant, and board chair needs to have and use this book." —Charles F. (Chic) Dambach President and CEO, Alliance for Peacebuilding Former Senior Consultant, BoardSource "A breakthrough! Fired-Up

Fundraising takes the mystery out of engaging your board in the ongoing work of fundraising. In this well-organized little book, Gail Perry lays out a commonsense, four-step process that will fire up your board and help you meet your fundraising goals, year after year." —Mal Warwick author of How to Write Successful Fundraising Letters "Fired-Up Fundraising: Turn Board Passion into Action is by far the best book I have ever read on how to involve board members in the entire process of fundraising, from identifying prospects, cultivating them, and finally making 'the ask.' Just as important, it is an invaluable guide on how to select, enlist, train and especially inspire board members so they take ownership of their institutions. Every nonprofit CEO and development officer should read this book." —Robert L. Gale President Emeritus, Association of Governing Boards of Universities and Colleges and founder of BoardSource (formerly known as the National Center for Nonprofit Boards) "This is the book for which EVERY nonprofit chief executive has been yearning since time immemorial. Every nonprofit needs money to survive and thrive, and every nonprofit has a board of trustees to help raise it, but few nonprofits come anywhere near using their boards to maximum benefit. Fired-Up Fundraising, a reader-friendly, realistic, and practical playbook written by a richly experienced, highly literate fundraiser turned consultant, takes readers by the hand and leads them step-by-step through eminently doable ways of inspiring the greatest possible engagement of-and return from-their trustees. It will instantly become the gold-standard guide for building successful boards." —Joel Fleishman Professor of Law and Public Policy and Director, The Foundation Research Program, Duke University

Reading the Enemy's Mind

This book constitutes the refereed proceedings of the 4th International Symposium on Advances in Signal Processing and Intelligent Recognition Systems, SIRS 2018, held in Bangalore, India, in September 2018. The 28 revised full papers and 11 revised short papers presented were carefully reviewed and selected from 92 submissions. The papers cover wide research fields including information retrieval, human-computer interaction (HCI), information extraction, speech recognition.

Coyote Peterson's Brave Adventures

100% of Last Week Tonight's proceeds will be donated to The Trevor Project and AIDS United. HBO's Emmy-winning Last Week Tonight with John Oliver presents a children's picture book about a Very Special boy bunny who falls in love with another boy bunny. Meet Marlon Bundo, a lonely bunny who lives with his Grampa, Mike Pence - the Vice President of the United States. But on this Very Special Day, Marlon's life is about to change forever With its message of tolerance and advocacy, this charming children's book explores issues of same sex marriage and democracy. Sweet, funny, and beautifully illustrated, this book is dedicated to every bunny who has ever felt different.

Not for Greens

Memoirs of a Beatnik is an account of a young artist coming of age sensually and intellectually. The book grew out of the author's own experience as a bold and independent woman who dropped out of college at the age of 18 in order to write.

Fakebook

The two-volume set LNICST 150 and 151 constitutes the thoroughly refereed post-conference proceedings of the First International Internet of Things Summit, IoT360 2014, held in Rome, Italy, in October 2014. This volume contains 74 full papers carefully reviewed and selected from 118 submissions at the following four conferences: the First International Conference on Cognitive Internet of Things Technologies, COIOTE 2014; the First International Conference on Pervasive Games, PERGAMES 2014; the First International Conference on IoT Technologies for HealthCare, HealthyIoT 2014; and the First International Conference on IoT as a Service, IoTaaS 2014. The papers cover the following topics: user-centric IoT; artificial intelligence techniques for the IoT; the design and deployment of pervasive games for various sectors, such as health and wellbeing, ambient assisted living, smart cities and societies, education, cultural heritage, and tourism; delivery of electronic healthcare; patient care and medical data management; smart objects; networking considerations for IoT; platforms for IoTaaS; adapting to the IoT environment; modeling IoTaaS; machine to machine support in IoT.

At Home at Highclere

This book constitutes the refereed proceedings of the 5th European Conference on Interactive Television, EuroITV 2007, held in Amsterdam, The Netherlands, May 2007. The volume covers a wide range of areas such as media studies, audiovisual design, multimedia, HCI, and management. The papers are organized in topical sections on social TV systems, user studies, the future of TV, social TV evaluation, personalization, and mobile TV.

Looking and Acting

For the past thirty years, the United States government has secretly trained a select corps of military personnel in the art of "remote viewing" -- the psychic ability to perceive the thoughts and experiences of others through the power of the human mind. Now, for the first time, Lyn Buchanan -- a world-renowned expert on remote viewing and its potential -- tells the complete, candid story of his experiences. Assigned for nearly a decade to a clandestine U.S. Army intelligence group, Buchanan trained military personnel who utilized their inherent psychic abilities as a data-collection tool during the Iran hostage crisis, the Chernobyl disaster, and the Gulf War. In this incredible account, Buchanan tells how he was selected for his unique psychic abilities, and how he was transformed from an ordinary soldier into one of our nation's leading psychic spies. Working on top-secret government and military projects using "mental espionage" created permanent, life-altering

changes within Buchanan. Now, after many years of analysis and interpretation, he reveals the techniques and mental exercises used to train remote viewers, and demonstrates that each of us carries a dormant psychic ability that we can explore and use ourselves. For anyone interested in a hard, scientific look at the reality of psychic covert operations in the world today, or anyone who has ever wondered if he or she could have the inherent skills to become a remote viewer, this fascinating chronicle of life as a psychic spy will reveal the answers.

The Shadow/Green Hornet

Lisson Gallery is proud to present a major exhibition of work by Ai Weiwei. From 13 May to 16 July 2011 Ai Weiwei will present a show of sculptural and video works at Lisson Gallery. This will be a chance to view a number of key works by the artist, one of the most significant cultural figures of his generation, both in China and internationally.

Log of the S.S. The Mrs. Ungentine

The aim is not only to bring the most recent advances in applied animal behaviour and animal welfare, but also raise awareness of new interdisciplinary approaches, ideas and tools that would allow us to further advance in the study of animal behaviour and welfare. The scientific program 'MOVING ON' covers a great variety of traditional, but also many non-traditional topics such as: movement and space use, modelling and social networking, precision/smart farming, from pain to positive emotions, clinical behavioural problems, welfare in wildlife, neurobiology of behaviour and welfare, and behaviour and reproduction.

Advances in Signal Processing and Intelligent Recognition Systems

The Emmy-winning host of Brave Wilderness shares his wildest encounters with animals across the world in this illustrated book for young readers. After catching his first snapping turtle as a kid, Coyote Peterson was fascinated by wild animals. Now he shares that fascination through his YouTube channel, Brave Wilderness, and his Animal Planet series, Coyote Peterson: Brave the Wild. Over the years, he and his camera crew have had some incredible moments with wildlife, both on and off camera. From the time a giant alligator nearly caught Coyote in its bone crushing jaws, to the time an 800-pound Grizzly Bear helped him teach viewers what NOT to do when facing one of them in the wild, every tale is full of fast paced action and daring adventure. With danger often looming for Coyote, these stories remind readers that animals rule the wild places of this planet, and if we respect them from a safe distance, even the most frightening creatures are more likely to be afraid of us than we are of them.
