"It's not only a feast for the eye--Florian Schulz is a fine young nature-wildlife photographer--but a challenge to those of us who live in a not-yet-used corner of the planet." (Seattle P-I) A grizzly bear emerges, one small detail in an immense vista of field and mountains and sky. A shoreline, still and empty but for the telltale tracks of passing wildlife. Golden peaks that roll to the horizon, starkly beautiful in the morning light. This kind of space, of solitude-of simple wildness--still exists in

North America, outside the boundaries of any park. Photographer Florian Schulz documents the landscape, plants, animals, and people of an eco-system that is surprisingly intact up and down the spine of the Rocky Mountains. There is still time to make a difference: to direct the path of encroaching development and establish connections between the national and provincial parks on this course. Essay contributors--including Dvid Suzuki, David Quammen, Rick Bass, Ted Kerasote and Roberts F. Kennedy Jr.-- tell of their travels through the region and their experience of the land. They explain the need for Y2Y, based on new findings that reveal isolated nature sanctuaries to be a recipe for extinction. They set the Y2Y conservation program in context: a grand vision grounded on science; a practical plan that provides for economic as well as environmental sustainability; a blueprint designating critical wildlife habitat. Environmental conservation does not mean that humans must be excluded from the land, but we must act thoughtfully.
