Index Veterinarius

A guide to more than 22,000 national and international organizations, including: trade, business, and commercial; environmental and agricultural; legal, governmental, public administration, and military; engineering, technological, and natural and social sciences; educational; cultural; social welfare; health and medical; public affairs; fraternal, nationality, and ethnic; religious; veterans', hereditary, and patriotic; hobby and avocational; athletic and sports; labor unions, associations, and federations; chambers of commerce and trade and tourism; Greek letter and related organizations; and fan clubs.

The Medical Directory

Now with a new page design, this international directory describes awards given for achievements in virtually every field of endeavor. Awards are listed alphabetically by the name of the administering organization, followed by alphabetical listings and descriptions of each of the awards it offers. Each

volume contains organization, award, and subject indexes for quick reference. This reference now includes e-mail addresses and URLs.

Encyclopedia of Associations V.1 [pt. 1]

Vols. for 1942- include proceedings of the American Physiological Society.

Dissertation Abstracts International

Includes biographies of people considered outstanding in the nursing field. Also, indexed geographically by specialty.

Pure and Applied Science Books, 1876-1982

Bibliography on Medical Electronics

CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1,800+ serials publications, and also provides abstracts of books, book chapters, dissertations, and conference papers.

Government Reports Annual Index

This multi-volume directory which lists more than 40,000 companies is indexed by company name, geographic area, non-U.S. parent companies, technology, product code, CorpTech code, and SIC code. Profiles are provided for each company listed, and company rankings given under each industry.

Cumulative Author Index to Psychological Abstracts

Over 220,000 entries representing some 56,000 Library of Congress subject headings. Covers all disciplines of science and technology, e.g., engineering, agriculture, and domestic arts. Also contains at least 5000 titles published before 1876. Has many applications in libraries, information centers, and other organizations concerned with

scientific and technological literature. Subject index contains main listing of entries. Each entry gives cataloging as prepared by the Library of Congress. Author/title indexes.

Water Quality International

Proceedings from the ninth International Conference on Artificial Life; papers by scientists of many disciplines focusing on the principles of organization and applications of complex, life-like systems. Artificial Life is an interdisciplinary effort to investigate the fundamental properties of living systems through the simulation and synthesis of life-like processes. The young field brings a powerful set of tools to the study of how high-level behavior can arise in systems governed by simple rules of interaction. Some of the fundamental questions include: What are the principles of evolution, learning, and growth that can be understood well enough to simulate as an information process? Can robots be built faster and more cheaply by mimicking biology than by the product design process used for automobiles and airplanes? How can we unify theories from dynamical systems, game theory, evolution, computing, geophysics, and cognition? The field has contributed fundamentally to our understanding of life itself through computer models, and has led to novel solutions to complex real-world problems across high technology and human society. This elite biennial meeting has grown from a small workshop in Santa Fe to a major international conference. This ninth volume of the proceedings of the international A-life conference reflects the growing quality and impact of this interdisciplinary scientific community.

This book discusses the recent advances in the area of near-field Raman scattering, mainly focusing on tip-enhanced and surface-enhanced Raman scattering. Some of the key features covered here are the optical structuring and manipulations, single molecule sensitivity, analysis of single-walled carbon nanotubes, and analytic applications in chemistry, biology and material sciences. This book also discusses the plasmonic materials for better enhancement, and optical antennas. Further, near-field microscopy based on second harmonic generation is also discussed. Chapters have been written by some of the leading scientists in this field, who present some of their recent work in this field.

- Near-field Raman scattering
- Tip-enhanced Raman spectroscopy
- Surface-enhanced Raman spectroscopy
- Nano-photonics
- Nanoanalysis of Physical, chemical and biological materials beyond the diffraction limits
- Single molecule detection

Federation Proceedings

Previous editions are cited in Books for College Libraries, 3rd ed.. This guide contains descriptions of about 17,500 associations and societies from the fields of science, culture and technology.

Arrangement is alphabetically by name within an alphabetical listing of countries. Indexing is by association names, persons, and subjects. Each entry gives the association name (where applicable: extension to name, abbreviation, name in English, former name), contact information, homepage, year of foundation, number of members, names of officials, details of periodical publications, and whether or not a library and/or archives exists. New information includes details on aims and activities, awards, grants, and events. Distributed by Gale. Annotation copyrighted by Book News Inc., Portland, OR.
