## **Afghanistan Under Siege**

Ethno-national conflict is one of the central issues of modern politics. Despite the emergence of approaches to managing it, from nation-building to territorial autonomy, in recent years, the application of these approaches has been uneven. Old conflicts persist and new ones continually emerge. The authors of this book contend that what is needed to drive forward the theory and practice of ethno-national conflict management is a more nuanced understanding of ethnicity and nationalism. The book addresses this issue by linking theories of ethnicity and nationalism to theories of conflict management. Its contributors share a common goal of demonstrating that a nuanced understanding of ethnicity and nationalism can beneficially inform conflict management in theory and practice. To do so, they analyse both hot and cold conflict zones, as well as cases that have been important in the development of the most widely-used conflict management models. The book is aimed at those interested in the theory and practice of ethno-national conflict management as well as the study of ethnicity and nationalism. It is well-suited for undergraduate and advanced research students, experts and policy-makers. This book was originally published as a special issue of *Commonwealth and Comparative Politics*.

## **Violent Conflict and Peacebuilding**

This book examines the continuing devastation in the Darfur region of Sudan, from the perspective of a multiplicity of conflicts of distinct types. The crisis reached its peak in 2003-2004, when certain Arab militias joined forces with the Sudan armed forces in a campaign against insurgent resistance movements. Engulfed in the tumult, Darfurians experienced systematic slaughter, sexual violence, and internal displacement on a massive scale. Although the violence has waned in recent years, the fighting continues to this day. The authors cast this crisis as a complex web of four distinct, yet interlacing, conflict types: long-standing disputes between farmers and herders and between different herder communities political struggles between the local elite leaders of the resistance movements, and those between traditional leaders (elders) and younger aspiring leaders long-standing grievances of marginalized groups against those at the national centre of power cross-border conflicts, primarily the proxy war waged between Chad and Sudan The crisis in South Sudan is also examined through the lens of conflict complementarity. This book will be of interest to students of African politics, genocide, political violence, ethnic conflict, war and conflict studies, peacebuilding and IR.

## **Building Peace**

Since the dawn of human speech and interaction, there have been conflicts among individuals, regions,

and whole nations. Disagreements, miscommunications, no matter the name they take; conflicts will continue to be present in every field of work or study. New technologies such as social media have extended people's ability to communicate, and therefore dispute, making additional research and practical solutions for resolving conflict all the more necessary. *Interdisciplinary Perspectives on Contemporary Conflict Resolution* presents theoretical perspectives on the causes of diverse conflicts, approaches novel disputes and the technology associated therein, and provides readers with multifaceted solutions to the myriad of potential arguments and disagreements that arise as part of the human condition. This interdisciplinary publication is a critical resource for researchers, legal practitioners, policy makers, government officials, and students and educators in the fields of political science, communication studies, and business.

### **Mediation**

"Find out how to successfully resolve your most emotionally charged conflicts. In this landmark book, world-renowned Harvard negotiation expert Daniel Shapiro presents a groundbreaking, practical method to reconcile your most contentious relationships and untangle your toughest conflicts. Before you get into your next conflict, read *Negotiating the Nonnegotiable*. It is not just "another book on conflict resolution," but a crucial step-by-step guide to resolve life's most emotionally challenging conflicts--whether between spouses, a parent and child, a boss and an

employee, or rival communities or nations. These conflicts can feel nonnegotiable because they threaten your identity and trigger what Shapiro calls the Tribes Effect, a divisive mind-set that pits you against the other side. Once you fall prey to this mind-set, even a trivial argument with a family member or colleague can mushroom into an emotional uproar. Shapiro offers a powerful way out, drawing on his pioneering research and global fieldwork in consulting for everyone from heads of state to business leaders, embattled marital couples to families in crisis. And he also shares his insights from negotiating with three of the world's toughest negotiators--his three young sons. This is a must read to improve your professional and personal relationships"--

### **Territorial Disputes and Conflict Management**

Dispute System Design walks readers through the art of successfully designing a system for preventing, managing, and resolving conflicts and legally-framed disputes. Drawing on decades of expertise as instructors and consultants, the authors show how dispute systems design can be used within all types of organizations, including business firms, nonprofit organizations, and international and transnational bodies. This book has two parts: the first teaches readers the foundations of Dispute System Design (DSD), describing bedrock concepts, and case chapters exploring DSD across a range of experiences, including public and community justice, conflict within and beyond organizations, international

and comparative systems, and multi-jurisdictional and complex systems. This book is intended for anyone who is interested in the theory or practice of DSD, who uses or wants to understand mediation, arbitration, court trial, or other dispute resolution processes, or who designs or improves existing processes and systems.

The application of private international law to electronic consumer contracts raises new, complex, and controversial questions. It is new because consumer protection was not a private international law concern until very recently and e-commerce only became an important commercial activity within the last ten years. E-consumer contracts generate original questions which have not been considered under traditional private international law theories. It is complex because it has to deal both with difficulties raised by consumer contracts and the challenges of e-commerce. Reasonable resolutions to consumer contracts may prove inappropriate in e-commerce,

while effective approaches to resolving private international law problems in e-commerce may be improper for consumer contracts. It is controversial because it concerns the conflicting interests of consumers and businesses in a fast-moving commercial environment - a fair balance is therefore hard to achieve. Without proper solutions provided by private international law, consumers will not be confident about purchasing online, and businesses will face unreasonable risk and participation costs in e-commerce. Updated and properly designed private international law rules are essential to the further development of e-commerce. This book aims to provide an answer to the urgent requirement for legal certainty, security and justice in e-consumer contracts. It is primarily concerned with existing approaches to jurisdiction and choice of law issues in e-consumer contracts in the European Community and England, but some typical approaches in other jurisdictions are also examined. Based on the analysis and the comparative study of the existing law, the book seeks to provide a proposal as to what the law should be in order to provide certainty to both parties, to provide reasonable protection to consumers, and to promote the development of e-commerce.

### **Peace and Conflict 2016**

Describes the elements of dignity, how to recognize violations of dignity, and ways to respond to restore broken relationships.

### **Nursing Leadership**

"Invitation to Peace Studies is the first textbook in the field to emphasize 21st-century topics and the latest empirical research, as well as the first to prominently apply a gender perspective to the topics of peace, war, and violence. The book covers traditional peace studies' concerns with interstate wars while offering an equal emphasis on intrastate wars, group- and gender-based violence, and on the many nonviolent movements which have shaped recent world history. Clear and accessible language invites students to become more frequent and effective peace promoters in their own everyday lives. Dozens of case studies and textboxes foreground contemporary topics such as climate change, cyber warfare, digital activism, drones and robots, the occupy movement, peace ecology, positive psychology, religion and violence, and terrorism"--

### **Dignity**

In order for an organization to thrive, it is essential to

develop key strategies for interaction, leadership, and management within diverse settings. Refining these skills ultimately aids in the arbitration of any potential conflicts that may arise during intra-organizational interactions. The Handbook of Research on Effective Communication, Leadership, and Conflict Resolution evaluates operational strategies and interpersonal skill development for the successful leadership and management of modern organizations. Highlighting various governance and interaction techniques that assist in mediating organizational controversies, this handbook of research is a vital source for professionals, leaders, managers, and human resource specialists interested in developing skills needed to efficiently communicate, collaborate, and negotiate across differences within an organization.

### **Ancient Canaan and Israel**

Examining international water allocation policies in different parts of the world, this book suggests that they can be used as a platform to induce cooperation over larger political issues, ultimately settling conflicts. The main premise is that water can and should be used as a catalyst for peace and cooperation rather than conflict. Evidence is provided to support this claim through detailed case studies from the Middle East and the Lesotho Highlands in Africa. These international cases - including bilateral water treaties and their development and formation process and aftermath - are analyzed to draw conclusions about the outcomes as well as the processes by which these outcomes are achieved. It is

demonstrated that the perception of a particular treaty as being equitable and fair is mainly shaped by the negotiation process used to reach certain outcomes, rather than being determined mechanistically by the quantitative allocation of water to each party. The processes and perceptions leading to international water conflict resolutions are emphasized as key issues in advancing cooperation and robust implementation of international water treaties. The key messages of the book are therefore relevant to the geo-political and hydro-political aspects of water resources in the context of bilateral and multilateral conflicts, and the trans-boundary management of water resources, which contributes insights to political ecology, geo-politics, and environmental policy.

### **Online Research Methods in Urban and Planning Studies: Design and Outcomes**

Even though international peacebuilding has rapidly expanded in the last two decades to respond to more multi-faceted and complex conflicts, the field has lagged behind in documenting the impact and success of projects. To help address this gap, the Alliance for Peacebuilding, one of the leading networks in the field, has brought together 13 stories of innovative peacebuilding practices from around the world in *Building Peace*. While the projects covered are diverse in nature, together they demonstrate the significant impact of peacebuilding work. Contributors created new institutions to prevent and manage conflicts at the local or national levels, helped restore

relationships in conflict-affected communities, and empowered citizens to work for positive change in their societies across ethnic, religious, and political divides. It's clear that there is no quick fix for violence but this volume will go a long way in providing inspiration and practical tools for policymakers, academics and practitioners who seek to make significant and valuable contributions towards achieving peace.

### **Invitation to Peace Studies**

New ways of managing conflict are increasingly important features of work and employment in organizations. In the book the world's leading scholars in the field examine a range of innovative alternative dispute resolution (ADR) practices, drawing on international research and scholarship and covering both case studies of major exemplars and developments in countries in different parts of the global economy. This Handbook gives a comprehensive overview of this growing field, which has seen an explosion of programmes of study in university business and law schools and in executive education programmes.

The Singapore Convention on Mediation presents a comprehensive and insightful commentary on the Singapore Convention and the emerging field of the private international law of mediation. The Convention is just beginning its life as an international legal instrument. Recent years have witnessed the growing recourse to mediation as an alternative method of solving disputes in the sphere of international commercial and investment relations. How is it likely to fare? In this first comprehensive, article-by-article commentary, the authors provide a robust report on the features of the Convention and their implications, with analysis of potential controversies and authoritative clarifications of particular provisions. What's in this book: The book's meticulous examination considers the following issues and topics: - international mediated settlement agreements as a new type of legal instrument in international law; - types of settlement agreements that fall within the scope of the Convention; - how the Convention's enforcement mechanism works; - the meaning of 'international' and the absence of a seat of mediation; - the Convention's approach to recognition and enforcement of internationally mediated settlement agreements; - the grounds for refusal to grant relief under the Convention; -

mediator misconduct as a ground for refusal to grant relief; – the impact of the Convention on private international law; – the relationship of the Singapore Convention with other international instruments such as the UN Model Law on International Commercial Mediation and the New York Convention on Arbitration; – possibilities for Contracting States to declare reservations. How this will help you: This book will be one of the first publications providing legal practitioners and other stakeholders with legal commentary on the Singapore Convention on Mediation. It informs readers of the legal implications and potential controversies associated with the Convention and offers much-needed clarifications on particular provisions This book takes a giant step towards relieving the inherent uncertainty associated with how this newly constituted instrument may operate, and how States may become ‘Convention ready’. It is sure to become an essential reference for international lawyers, mediators and government officials as the Convention proves itself in the coming years.

## **Interdisciplinary Perspectives on Contemporary Conflict Resolution**

Takes mediation beyond the family arena into a broader context.

## **Conflict Resolution for the Helping Professions**

Conflicts happen, and the workplace can be a cacophony for competing interests. Consider that organizational culture is an ensemble of shared values, beliefs, assumptions, perceptions, and norms. Organizations are not solos. They are an accompaniment of individuals, departments, and divisions, and each is competing for scarce resources. Measure in a little power imbalance and organizational political posturing. Then, scale in the fact that today's managers are faced with diversity and cultural issues ranging from race and gender to individual ethnicity, principles, and philosophies, about which employees are more vocal. All this discord can strike a sharp note of dissonance. However, effective resolutions can change this discord to harmony. Consider that music is not a single note. Rather, it is the silence between the notes that makes beautiful music, and conflict is that silence. Unfortunately, conflict has a bad reputation,

and it is often labeled as disagreement, fighting, or arguing that leads to stress, retaliation, and resentment. Some managers spend a disproportionate amount of their workdays dealing with conflicts. They have not learned what causes conflicts or how to productively manage them. As a result, they often avoid or force outcomes causing discord, fractured relationships, loss of productivity, and even lawsuits. Learning to fine tune inevitable conflicts will help managers orchestrate a more harmonious workplace. From Discord to Harmony: Making the Workplace Hum is largely evidence-based, and many of the chapters contain cutting-edge research by experts in their respective fields.

### **Dispute System Design**

Examines international cases to understand what causes a society's ethnic conflicts to escalate or de-escalate. This book contains examinations of the political and historical antecedents to conflict around the world, combining them with psychological analyses of group identity and intergroup conflict. In examining the escalation of ethnic conflict, the chapters highlight the critical role of group identification, stressing how group identification becomes enmeshed with threatened economic resources, violent political subcultures, and media manipulation of collective fear.

### **Jones,brinkert**

The analysis and interpretation of conflicts can be a

dangerously simplistic exercise. A western, developed socio-economic perspective can simplify conflicts in the so-called 'Third World' as the inevitable struggles of people who cannot coexist because of ethnic, religious or cultural differences. While acknowledging that many contemporary conflicts are characterised and influenced by these factors, this book calls for an approach to conflict prevention and resolution which mainly addresses the underlying political, economic and social causes. The conflict in Sudan, where narratives evolved from an interpretation based on religious differences between a Muslim North and the Christian South, provides a case study through which the author explores how most prevention and resolution strategies were based on flawed assumptions leading to poor results. By focusing instead on the underlying socio-economic inequality and marginalisation among groups she analyses the dynamics of the complex peace process to ascertain if and how economic and social rights were effectively included and implemented as a part of the peace agreement, including after South Sudan's independence.

### **"A "A Problem From Hell"**

This volume aims to provide a detailed explanation of the effects of cooperation and coordination on international multiparty mediation in conflicts. Contemporary scholarship stresses that the crucial ingredients for a successful multiparty mediation are 'consistency in interests' and 'cooperation and coordination' between mediators. This book seeks to

supplement that understanding by investigating how much the 'consistency of interests' and 'cooperation and coordination' affect the overall process, and what happens to the mediation process when mediating parties do not share the same idea and interest in finding a common solution. At the same time, it explores the obstacles in achieving coordination and coherence between various mediators in such an environment and how to surmount the problems that multiple mediators face when operating without a 'common script' in attempting to mediate a negotiated settlement. The study investigates three distinct mechanisms (both on the systemic and contextual level) that have the potential to deter defection from a (potential) member of the multiparty mediation coalition: geo-political shifts, changes in the conflict dynamics, and mediators' ability to bargain for a cooperative relationship. As the number of states and international actors that are involved in mediation increases, a careful assessment is necessary not only of their relative institutional strengths and weaknesses, but also of how to promote complementary efforts and how to synchronize the whole process when one actor is transferring the responsibilities for mediation to others. This book will be of much interest to students of mediation, conflict management, war and conflict studies, security studies and IR.

### **International Conflict Resolution and Peacebuilding Strategies**

The potential of online communication to reduce the costs of dispute resolution has long been recognized. Apart from cost reduction, online applications may also improve the quality of dispute resolution. Online communication can be limiting when offline processes are copied into an online environment. However, by designing processes specifically for the medium, innovations are possible that are not available in offline dispute resolution. In this book, the limitations and benefits of using online communication for dispute resolution processes are investigated. The book also explores the potential of online communication to support a specific dispute resolution process. The focus is on tools to support integrative negotiation, which is a common method for negotiating disputes, used widely in legal practice and embedded in the formal system of many countries in the form of court-annexed mediation. The process is usually described in general terms. In this research, the process is broken down into 14 concrete tasks. Additionally, several chapters describe how online applications may support users in dealing with communication issues (miscommunication, distrust, and strong emotions), in uncovering interests, and in

developing creative outcomes. Examples from three applications demonstrate how these methods are being used in practice.

### **The Singapore Convention on Mediation**

This book examines the problems of boundary demarcation and its impact on territorial disputes, and offers techniques to manage and resolve the resulting conflicts. Historically, most civil conflicts and internal wars have been directly related to boundary or territorial disputes. Cross-border discord directly affects the sustenance and welfare of local populations, often resulting in disease, impoverishment, and environmental damage as well as creating refugees. Although the impact of territorial disputes is great, they can often be settled through bilateral, and sometimes multilateral, agreements or international arbitration. This book sets out to probe into the problems of existing techniques on boundary demarcation and to test their possible impacts on boundary and territorial disputes. Various factors and their influences on cross-border tensions are tested, either qualitatively or quantitatively. After close examination of dozens of the most significant cases, the book presents various alternative solutions to the achievement of cross-border cooperation in disputed territories. An 'art of avoiding war' is included within the book, comprising six key schemes and five negotiating techniques. The comparative advantages, costs and benefits of each of these is analyzed and evaluated. This book will help guide practitioners in territorial disputes and will be of

interest to students of conflict management, international security, peace and conflict studies, political violence and IR in general.

### **You Can Choose to be Happy**

An authoritative source of information on violent conflicts and peacebuilding processes around the world, *Peace and Conflict* is an annual publication of the University of Maryland's Center for International Development and Conflict Management and the Graduate Institute of International and Development Studies (Geneva). The contents of the 2016 edition are divided into three sections: » *Global Patterns and Trends* provides an overview of recent advances in scholarly research on various aspects of conflict and peace, as well as chapters on armed conflict, violence against civilians, non-state armed actors, democracy and ethnic exclusion, terrorism, defense spending and arms production and procurement, peace agreements, state repression, foreign aid, and the results of the *Peace & Conflict Instability Ledger*, which ranks the status and progress of more than 160 countries based on their forecasted risk of future instability. » *Special Feature* spotlights work on measuring micro-level welfare effects of exposure to conflict. » *Profiles* has been enlarged to survey developments in instances of civil wars, peacekeeping missions, and international criminal justice proceedings that were active around the world during 2014. Frequent visualizations of data in full-color, large-format tables, graphs, and maps bring the analysis to life and amplify crucial developments in

real-world events and the latest findings in research. The contributors include many leading scholars in the field from the US and Europe.

## **Global Directory of Peace Studies and Conflict Resolution Programs**

This book shows how colonial legacies and the postcolonial state of Pakistan negatively influenced the socio-political and cultural dynamics and the security situation in Pakistan's Pashtun 'tribal' areas, formerly known as the Federally Administered Tribal Areas (FATA). It offers a local perspective on peace and conflict resolution in Pakistan's Pashtun 'tribal' region. Discussing the history and background of the former FATA region, the role of Pashtun conflict resolution mechanism Jirga and the persistence of colonial-era Frontier Crimes Regulations (FCR) in the region, the author argues that the persistence of colonial legacies in the Pashtun 'tribal' areas, especially the FCR, coupled with the overarching influence of the military on security policy has negatively impacted the security situation in the region. By focusing on the Jirga and Jirga-based Lashkars (or Pashtun militias), the book shows how Pashtuns have engaged in their own initiatives to handle the rise of militancy in their region. Moreover, the book argues that, even after the introduction of constitutional reforms and FATA's merger with the Khyber Pakhtunkhwa province, little has changed in the region, especially regarding the treatment of 'tribal' Pashtuns as equal citizens of Pakistan. This book explains, in detail, why indigenous methods of peace and conflict resolution, such as the Jirga, could play some role towards long-term peace in the Sotuh

Asian region. Historically and contextually informed with a focus on North-West Pakistan, this book will be of interest to academics studying South Asian studies, international relations, peace and conflict studies, terrorism and traditional justice and restorative forms of peace-making.

### **Expert Mediators**

In this book, based on field work undertaken in Afghanistan itself and through engagement with postcolonial theory, Bojan Savic critiques western intervention in Afghanistan by showing how its casting of Afghan natives as “dangerous” has created a power network which fractures the country - in echoes of 19th and 20th century colonial powers in the region. Savic also offers an analysis of how and by what means global security priorities have affected Afghan lives.
