Essentials of Organizational Behavior

As scientists toil in the fields of their disciplines, they rarely enjoy opportunities to step back from their work and evaluate where their efforts have taken them. Assessing a field's scientific progress, however, is critical if it is to have any hope of making meaningful advances. The time has come for a systematic self-examination of the state of the field of organizational behavior. Where has it been? Where is it now? And where is it going? The present book poses these questions to raise the self-consciousness of organizational scholars, causing them to question the field's values and its worth as a scientific and practical endeavor. Such a critical self-assessment of the state of organizational behavior is absolutely essential if the field is to prosper and make meaningful advances to behavioral science and to the welfare of individuals and society. This volume is a collection of essays by the field's most highly regarded scholars--experts who have contributed widely to the field, and who were invited to share their thoughts about its past, present, and future. By presenting their ideas about the state of organizational behavior, the discipline as a whole is invited to engage in critical self-reflection. No other book serves this function.

This isn't someone's opinion; it's a definitive, evidence-based guide to effective management: a set of bedrock principles to rely on throughout an entire management career. The Rules of Management: They're surprisingly easy to learn and live by. Now, Richard Templar's brought them all together in one place. Templar covers everything from setting realistic targets to holding effective meetings; finding the right people to inspiring loyalty. Learn when and how to let your people think they know more than you (even if they don't) -- and recognize when they really do. The first edition of The Rules of Management became a global phenomenon, topping bestseller charts around the world. This new, even better edition contains 10 brand new rules

to take you further, faster. In *Wired to Care*, top business strategist Dev Patnaik tells the story of how organizations of all kinds prosper when they tap into a power each of us already has: empathy, the ability to reach outside of ourselves and connect with other people. When people inside a company develop a shared sense of what's going on in the world, they see new opportunities faster than their competitors. They have the courage to take a risk on something new. And they have the gut-level certitude to stick with an idea that doesn't take off right away. People are *Wired to Care*, and many of the world's best organizations are, too.
