stills/ video hybrid. With 60fps burst shooting, class leading stabilization, a user configurable menu system, 80Mp High Resolution mode and many other high end features it is of necessity a complex camera. As with any digital camera the heart of the machine is the menu system, consisting of around 180 entries, many with their own sub menus offering many hundred of options. It is no surprise then that even experienced users can find themselves scratching their heads as they wade through the mass of options.. This book goes through each and every every menu choice and explains what it does and why you might want to do it. It doesn't try to teach you photography. You wouldn't have chosen a G9 if you didn't already have some expertise. What my books aims to do is to familiarise yourself with the G9 and learn to tailor it to your own taste and needs. Having done that, you I think you will find using the G9 not only a pleasure but inspiring as well.

AFS or AFC? Constant Preview on or off? Self Timer or Shutter Delay? AVCHD or MP4(LPCM)?The Panasonic GH5 Micro Four Thirds camera is the most advanced and capable stills/ video hybrid produced to date. The GH5's menu system is well presented and logically laid out but with over 200 main menu items, most with their own sub menus it could never be simple to master.Many photographers faced with this seemingly endless array of options, never fully get to grips with

it. That needn't be you. This book offers a blow by blow explanation of the menu items, what they do and why you might want to utilize them, in non-technical language. The last chapter goes through every menu item in order and tells you how the author has his camera set up. You can simply copy these settings to your GH5 and within a few minutes be out and about taking pictures with confidence. As time goes by with the help of this book you will finish up with a GH5 tailored to your own way of working, not only a supremely capable camera but a joy to use as well.
