The Death of Bunny Munro

The oldest fairy stories constitute a fascinating introduction to the book of modern science, curiously predicting its discoveries, its uncovering of the resources of the earth and air, its growing control of the tremendous forces which work in earth and

air. And it is significant that the recent progress of science is steadily toward what our ancestors would have considered fairy land; for in all the imaginings of the childhood of the race there was nothing more marvellous or more audaciously improbable than the transmission of the accents and modulations of familiar voices through long distances, and the power of communication across leagues of sea without mechanical connections of any kind. The myths record the earliest attempt at an explanation of the world and its life; the fairy tale records the free and joyful play of the imagination, opening doors through hard conditions to the spirit, which craves power, freedom, happiness; righting wrongs and redressing injuries; defeating base designs; rewarding patience and virtue; crowning true love with happiness; placing the powers of darkness under control of man and making their ministers his servants. In the fairy story, men are not set entirely free from their limitations, but, by the aid of fairies, genii, giants and demons, they are put in command of unusual powers and make themselves masters of the forces of nature.

'I am damned,' thinks Bunny Munro in a sudden moment of self-awareness reserved for those who are soon to die. He feels that somewhere down the line he has made a grave mistake, but this realisation passes in a dreadful heartbeat and is gone—leaving him in a room at the Grenville Hotel, in his underwear, with nothing but himself and his appetites. Bunny Munro drinks too much, smokes too much and thinks of sex all the time. Following his wife's suicide, he takes his nine-years-old son on a trip to recover from the tragedy. But he is about to discover that his days are numbered. Dark, funny and raunchy, *The Death of Bunny Munro* is the story of a man full of emotional atyachar. Written in the high octane, charged prose that has made Nick Cave one of the world's most acclaimed lyricists, it is an unforgettable book.

Sticks and Stones presents a treasure trove of building and engineering ideas for children to employ in the great outdoors using the materials made readily available to them, from cabins and tipis to bridges and dams. Many smaller scale projects are included, too—such as how to make ochre paint with shale, make a fishing pole, and carve a marshmallow roasting stick. Opportunities and materials for constructive play exist everywhere in nature. Author Melissa Lennig (of the blog Fireflies and Mud Pies) introduces today's screen-overloaded kids to this world of fun waiting just outside the door. Whether camping or hanging out in the back yard, children will marvel at the wonderful, useful tools and playthings they can create with natural objects. Sticks and Stones details various designs for the ever-popular fort (cabins, tipis, survival shelters, etc.) and also covers structures such as bridges, fences, and dams, while explaining the STEAM principles behind each. In

addition to structures, there are other ideas and projects for camping and the backyard, like a fire ring (explaining the types of fires, airflow, and safety), the always useful tripod, a travois, a rock garden, and toy boats. Along the way, there are multi-leveled reading opportunities in the form of quick features on considerations like mindfulness, campfire safety, mini STEAM design challenges, and more. Sticks and Stones is an essential resource for every junior outdoor adventurer.
