This is one of the most comprehensive books ever published on introduction to computers. This self-paced text is graphically oriented with step-by-step screen captures. The book' is designed to provide tutorial information on DOS, Windows, Word(R) for Windows, Excel(R) for Windows, PowerPoint(R), and shareware - has two components; the printed text shows students how to use a personal computer

with Windows 2000 and various application programs, including Microsoft(R) Office 2000. New to this edition are chapters on Windows 2000, Office 2000, Networking, Systems Administration, and the World Wide Web. The CD-ROM contains tutorial information on DOS, Windows 3.x, Windows 95, and application programs based on Windows 3.1 and Windows 95. Employers and academics have applauded this landmark publication.

Virtual-Office Tools for a High-Margin Practice

Informationweek

F & S Index United States Annual

A concise introduction to technological possibilities for conducting and administering educational research. Identifies 27 common tasks associated with conducting and managing educational research. Includes 74 tactics which illustrate, in practical terms, how technology can be utilized to facilitate these tasks. And, presents many examples of possibilities to help readers decide which technology tools will support their research productivity. For those involved in conducting and instructing educational research.

Tired of spending more time with filing cabinets than with clients? Is overhead eating up margins? Now, two leading financial planners and columnists deliver the help advisers have been begging for. Virtual-Office Tools for a High-Margin Practice is a nontechnical trove of technology, clever workarounds, and procedural efficiencies tailored to help financial advisers move toward a paperless office, while still complying with SEC record-keeping requirements. The authors show planners how to reduce the amount of paperwork in their offices by 99 percent, slash overhead, and find anything they need in one minute or less by adapting

innovative software tools and shifting from on-site employees to remote assistants and virtual work partners. Until now, creative ways of working this smart were hard to come by. With this book, they are available, ready to go, and easy to implement.

Technology in the Law Office

Macworld? Mac? Upgrade and Repair Bible

Approriate for courses on Computers and the Law Technology in the Law Office provides thorough coverage of the use and management of technology in the legal workplace. This text builds a foundation in technology concepts and applications needed by paralegals and attorneys as well as information technologists working in the legal environment. Students develop a hands-on understanding of real workplace software using the most popular commercially available legal programs including AbacusLaw, Tabs3, SmartDrawLegal, LexisNexis CaseMap and TimeMap, and Sanction II. Members of the legal team are introduced to the roles each plays in the use of technology and develop the technical vocabulary needed to collaborate effectively on-the-job. A continuing theme throughout the text is to empower student success by teaching students how to independently learn to use new software features and programs.
