## **The Craft of Photography**

In the early 1960s, Constantine Manos spent three years living in Greece and working as a photographer under the auspices of the prestigious agency Magnum Photos. A Greek Portfolio represents an impromptu pictorial account of Manos's travels through rural Greece and the Greek islands. The strength of these black-and-white duotone images, taken in small country villages and on secluded farms, lies in their portrayal of a way of life that had remained virtually unchanged for centuries before finally being overtaken by the modern world-a way of life that may strike viewers as at once humble and exalted in its quiet dignity and beauty. A Greek Portfolio was first published in 1972; the limited first edition has since become a much sought-after collector's item. Upon publication, the work received awards at Arles and at the Leipzig Book Fair. This new edition has been enhanced through the addition of eight previously unpublished images and a new foreword. A traveling exhibition of prints in this country will coincide with the publication of the new edition. There will also be a major exhibition at the Benaki Museum in Athens, Greece. Images from this work are in the permanent collections of the Museum of Modern Art in New York, the Art Institute of Chicago, and the Bibliotheque Nationale in Paris.

Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Film is back! And about time, too. We just were getting a little too comfortable with the idea of snapping selfies on our dumb phones at the ends of vanity sticks when film returned to slap us up. Film is not for the faint of heart. It takes serious effort, serious time. It costs money for each frame, from buying the film to paying to develop it or developing it in a film tank. Only those interested in the unique and fantastic look of film will brave this path. *The Film Photography Book* is for us, those interested in all aspects of film photography from choosing cameras and lenses, to choosing film and subjects, to buying chemicals and processing. The book can serve as a refresher to those who now are returning to film photography after a long absence, and as a "getting started" course for those who never shot film in their lives. It's an adventure, a new *Voyage of Photography*, part of Shawn M. Tomlinson's *Guide to Photography Series*, the beginning of a sub-series about film photography. Come on along.

We are now standing at the precipice of the next transformative development: the Internet of Things. Soon, connected technology will be embedded in hundreds of everyday objects we already use: our cars, wallets, watches, umbrellas, even our trash cans. These objects will respond to our needs, come to know us, and learn to think on our behalf. David Rose calls these devices--which are just beginning to creep into the marketplace--Enchanted Objects. Some believe the future will look like more of the same--more smartphones, tablets, screens embedded in every conceivable surface. Rose has a different vision: technology that atomizes, combining itself with the objects that make up the very fabric of daily living. Such technology will be woven into the background of our environment, enhancing human relationships and channeling desires for omniscience, long life, and creative expression. The enchanted objects of fairy tales and science fiction will enter real life. Groundbreaking, timely, and provocative, Enchanted Objects is a blueprint for a better future, where efficient solutions come hand in hand with technology that delights our senses.

### **It's Not About the F-Stop**

Jay Maisel has been hailed as one of the most brilliant and gifted photographers of all time. But he is also much more than that--he is a mentor, teacher, and trailblazer to many photographers, and a hero to those who feel Jay's teaching has changed the way they see and create their own photography. He is a living legend whose work is studied around the world, and whose teaching style and

presentation garner standing ovations and critical acclaim every time he takes the stage. In his first educational book, *Light, Gesture, and Color*, Jay put his amazing insights and learning moments from a lifetime behind the lens into a book that communicated the three most important aspects of street photography: light, gesture, and color. Here, in *It's Not About the F-Stop*, Jay builds on that success to take you beyond the buttons and dials on your camera to continue to teach you how to "see" like a photographer, and how to capture the world around you in a way that delights, intrigues, and challenges the viewer. Each page unveils something new and inspires you to rethink everything you know about the bigger picture of photography. This isn't a book about f-stops or ISOs. It's about seeing. And nobody communicates this, visually or through the written word, like Jay Maisel.

### **Speedlitter's Handbook**

Since the advent of the camera, there have been photographers whose mission is to record and interpret the public sphere in all its aspects. Eugene Atget documented evidence of everyday life in the streets as well as the buildings and monuments of Paris. Henri Cartier-Bresson pursued what he called "The Decisive Moment," the moment in which the meaning of an event was most clearly captured in a photograph. Their work, and that of many other masters, has inspired generations of photographers to wander public spaces, camera in hand, searching for meaningful moments in time. Success requires the street photographer to be proficient with their equipment, to be constantly aware of their surroundings, and to have a keen eye. Quick reflexes and self-confidence are essential: Street photographers know from experience that hesitation or procrastination could mean missing a once-in-a-lifetime shot. The adage "it's better to ask for forgiveness than permission" was probably coined by a street photographer. In *Street Photography: The Art of Capturing the Candid Moment*, Gordon Lewis helps readers understand and conquer the challenging yet rewarding world of street photography. The book includes discussions of why photographers are drawn to street photography, the different styles of street photography, and what makes a great street photograph. Lewis then goes on to explore how the choice of location can change a photographer's approach to image capture: from city streets to fairs to beaches, Lewis discusses the impact different environments have on the process of street photography. Another crucial element to becoming a good street photographer is learning to travel light, with minimal equipment. Lewis gives readers practical advice on everything from cameras and lenses to camera bags and clothing. Lewis also delves into the techniques and approaches that will help novices master the art of street photography. Whether your style is to engage your subjects or to remain unnoticed and take candid portraits, Lewis offers ideas on how to capture fascinating moments in time: a gesture, expression, or composition that may exist for only a fraction of a second, but can leave a lasting impression of the wonders, challenges, and absurdities of modern life.

### **Plate to Pixel**

Photographer and writer Shawn M. Tomlinson reconsiders the camera brand that got him started long before digital single-lens reflex cameras existed. In this 12th volume of Shawn M. Tomlinson's Guide to Photography, the author outlines the history of the camera maker, its film and digital cameras, and explains why Pentax still is a viable choice for the serious amateur, enthusiast, semi-pro and professional photographer. From the book: "I was a Pentax Loyalist for years, then a Pentax Apologist, then I rather switched that fight it anymore, then I began to re-appreciate Pentax. The point was/is that I write these guide books to help the less-than-wealthy budding photographer get the best equipment possible for the lowest prices possible. I write this stuff because I know what it's like to yearn for the newest, shiniest cameras and lenses, yet at the same time know that I cannot possibly afford them. I know there are a lot of other people out there who have the same problem."
