Leaving Van Gogh

This book offers the first concentrated examination of the representation of the black female subject in Western art through the lenses of race/color and sex/gender. Charmaine A. Nelson poses critical questions about the contexts of production, the problems of representation, the pathways of circulation and the consequences of consumption. She analyzes not only how, where, why and by whom black female subjects have been represented, but also what the social and cultural impacts of the colonial legacy of racialized western representation have been. Nelson also explores and problematizes the issue of the historically privileged white artistic access to black female bodies and the limits of representation for these subjects. This book not only reshapes our understanding of the black female representation in Western Art, but also furthers our knowledge about race and how and why it is (re)defined and (re)mobilized at specific times and places throughout history.

Eye of the Tempest

The Remaking of the Chinese Character and Identity in the 21st Century

“Alex Dryden is a writer who can please everyone from fans of old le Carré to students of current affairs.” —James Grippando, New York Times bestselling author of *Afraid of the Dark* “Ex-KGB Colonel Anna Resnikov is a terrific heroine.”

—Phillip Margolin, New York Times bestselling author of Supreme Justice “Alex Dryden is the real thing. If he got any realer, he would step out of the pages and physically punch you, with both elegance and regret.” —Hugh Laurie, star of “House” An author whom the Richmond Times Dispatch calls, “the next John le Carré,” Alex Dryden returns with *The Blind Spy*—the third book in his critically acclaimed espionage fiction series featuring Anna Resnikov, formerly of the KGB in Moscow. One of the most intriguing female protagonists in contemporary fiction, Anna is back in the rifle sights of her former masters as she races to expose Russia’s plot to destabilize the Ukraine and retake their former territory. A story almost literally ripped from the headlines, *The Blind Spy* is a gripping, smart adventure that crackles with authentic modern spycraft—an absolute must-read for fans of John le Carré, Alex Berenson, Martin Cruz Smith’s Arkady Renko series, spy novel and geopolitical thriller devotees, and for any readers interested in what’s really going on in the “new Russia.”

The Secret Science is the study of the human condition and the foundations of life: Desire, Sex, God, Mind, Spirit, and the Search for Happiness. It says that the physical and spiritual transformation of Man is achievable through the living of life, not by detaching oneself from it. *The Secret Science* is intended for the reader who is driven by a spiritual inquietude and an inner yearning to deepen his personal knowledge of himself at a practical and tangible level. Also available in Spanish, Latvian, Bulgarian, Russian, German, Portuguese and Italian.

What Animals Want

A highly radical interpretation of the Bible demonstrating the methods of meditation used by the Prophets to attain their unique states of consciousness. First English translation from ancient unpublished manuscripts, with commentary.

Using the Phone Book

Mistaken for Jesus, shunned as a Satanist, identified as the spirit of a long dead explorer and repeatedly asked to run for the presidency of Zambia, David Lemon walked eighteen hundred kilometres along the wild Zambezi River. On the way, he spent time with cabinet ministers, drug smugglers, tribal chiefs and villagers, all of whom took him into their hearts and their homes. Exciting, poignant and brilliantly evocative of an Africa that is rapidly disappearing, *Cowbells Down the Zambezi* tells the story of an epic walk among the River People of Zambia.

[Siren Menage Everlasting: Erotic Paranormal Menage a Quatre Romance, M/F/M/M, shape-shifters, light consensual BDSM, spanking, sex toys] Michelle Andrews needs a break. After years of catering to her sister's every whim, she's lost herself. So she drags her sister away from the country music limelight and heads for Savage Valley, looking to catch some hard-earned R&R. What she catches instead are the hearts of charming bear-shifters Elias, Thomas, and Franklin Ashley. The brothers recognize something beautiful and good in Michelle, but they know she's fragile. As they help her stand up to her sister and rediscover her strength, land-hungry NormCorp plans to unsettle the peaceful town. But will NormCorp's violent scheme expose Savage Valley's most treasured secret? Note: There are two different series in the Savage Valley, Colorado collection. Rugged Savage Valley by Edith Dubois is bear-shifters. The Pride of Savage Valley series by Helena Ray is mountain lion-shifters. Each book features a different romantic trio or quartet. Even though the two series take place in the same setting with crossover characters and share an external story arc, each of the series can stand alone. Note: There is no sexual relationship or touching for titillation between or among siblings. ** A Siren Erotic Romance

Representing the Black Female Subject in Western Art

Critical Thinking and American Government contains 41 critical thinking exercises that use a wide variety sources to actively engage students in understanding and thinking critically about American government and politics. These sources include court decisions, the Federalist Papers, legislation, public opinion polls, elections results, apportionment and population tables, data on topics such as African-American representation in Congress, among many others. The critical thinking exercises require students to interpret and analyze data, discover basic relationships among variables, read critically, summarize information accurately, and formulate generalizations and hypotheses. The exercises are based on the scholarship of teaching and learning. Each exercises contains clear and discrete student learning objectives which facilitate the measurement and assessment of student outcomes and learning.

The importance of involving the poor recipients in planning and implementing development policies has long been recognized, and has been the official aim of large donors, including the World Bank and major donor agencies. This text assesses their success and the results of the primary stakeholder participation achieved. It analyzes the institutional changes necessary for stakeholders to participate in decision-making, and the strategies and behaviour of other parties involved, including NGOs. From this review and analysis, it draws an important range of lessons for future donor and NGO policies and organizational reform.

Restoring Pride

Diversity is one of the defining characteristics of contemporary German-language literature, not just in terms of the variety of authors writing in German today, but also in relation to theme, form, technique and style. However, common themes emerge: the Nazi past, transnationalism, globalisation, migration, religion and ethnicity, gender and sexuality, and identity. This book presents the novel in German since 1990 through a set of close readings both of international bestsellers (including Daniel Kehlmann's *Measuring the World* and W. G. Sebald's *Austerlitz*) and of less familiar, but important texts (such as Yadé Kara's *Selam Berlin*). Each novel discussed in the volume has been chosen on account of its aesthetic quality, its impact and its representativeness; the authors featured, among them Nobel Prize winners Günter Grass, Elfriede Jelinek and Herta Müller demonstrate the energy and quality of contemporary writing in German.

`This book is helpful in providing a survey of where education has reached in strategic planning in theory and practice. Helpfully, case studies are scattered throughout so readers can compare themselves with other schools and pick up "do and don't tips" - *Management in Education* `The strategies presented here are quite useful to provide future directions not only to the managers but also to the planners and trainers' - *Journal of Education Planning and Administration* This book examines the issue of strategic management in schools and colleges. The contributors present an overview of theory in order to enhance management practice in education, and articulate good practice on the basis of evidence in education settings. The ideas presented here are derived from international research and practice, and apply to all phases of education, with the emphasis on using the findings to improve practice in schools and colleges.

Cowbells Down the Zambezi

How can we save politics from the politician? How can we save ourselves? This book looks at the example of those who leave the city and break the social contract, rebellious exiles and freedom fighters escaping the wheel of necessity, and

learns from them.

Perinatal Pathology

Nothing says "home" like being attacked by humans with very large guns, as Jane and Anyan discover when they arrive in Rockabill. These are professionals, brought into kill, and they bring Anyan down before either Jane or the barghest can react. Seeing Anyan fall awakens a terrible power within Jane, and she nearly destroys herself taking out their attackers. Jane wakes, weeks later, to discover that she's not the only thing that's been stirring. Something underneath Rockabill is coming to life: something ancient, something powerful, and something that just might destroy the world. Jane and her friends must act, striking out on a quest that only Jane can finish. For whatever lurks beneath the Old Sow must be stopped and Jane's just the halfling for the job.

Plays Extravagant

In the summer of 1890, in the French town of Auvers-sur-Oise, Vincent van Gogh shot himself in the chest with a revolver. He died two days later, at the age of thirty-seven, largely unknown despite having completed over two thousand works of art that would go on to become some of the most important and valued in the world. In this riveting novel, Carol Wallace brilliantly navigates the mysteries surrounding the master artist's death, relying on meticulous research to paint an indelible portrait of Van Gogh's final days—and the friendship that may or may not have destroyed him. Telling Van Gogh's story from an utterly new perspective—that of his personal physician, Dr. Gachet, specialist in mental illness and great lover of the arts—Wallace allows us to view the legendary painter as we've never seen him before. In our narrator's eyes, Van Gogh is an irresistible puzzle, a man whose mind, plagued by demons, poses the most potentially rewarding challenge of Gachet's career. Wallace's narrative brims with suspense and rich psychological insight as it tackles haunting questions about Van Gogh's fate. A masterly, gripping novel that explores the price of creativity, *Leaving Van Gogh* is a luminous story about what it means to live authentically, and the power and limits of friendship.

Kodae Sosol

This book explores the characterization of Jeroboam in 1 Kings 11-14, tracing the rise and fall of this notorious figure. Close analysis of the Hebrew text reveals a literary achievement of great subtlety and suggests the arrival of Jeroboam's kingship can be read as a direct response to scandalous activity within the Solomonic empire.

An Introduction to Art Therapy Research

Here is a new book on methods and issues in clinical research. Its objectives can be summarized in three points. 1. Integrate medical and statistical components of clinical research. 2. Do justice to the operational and practical requirements of clinical research. 3. Give space to the ethical implications of methodological issues in clinical research. The book ends with a brief description of the drug development process and the phases of clinical development.

Aerosols in workplace atmospheres have been - and continue to be - a major focus of industrial hygiene. Although there are many existing texts on aerosol science and on occupational health respectively, this new book sets out to be complementary to these and to provide a link between the two fields. In particular, the central concept of worker exposure leads to a structured approach which draws together wide-ranging aspects of aerosol science within the occupational health

framework. Introductory chapters are concerned with the nature and properties of aerosols, and how they are generated in the occupational environment. The book then goes on to provide a description of the fundamental mechanical properties of aerosols, in particular those mechanical properties associated with the motion of airborne particles (which govern particle transport, inhalation, deposition, sampling and control). There follows a description of the optical properties of workplace aerosols since these are important in the visual appearance of aerosols and in many aspects of measurement. The central core of the book deals with the processes which govern the nature of exposure to and the subsequent fate and effects of airborne particles, leading to a rational framework for standards, measurement and control. Finally, a chapter is added which relates what has been said about aerosols to gaseous and vapour contaminants. The book is aimed at graduate students and practitioners in industrial hygiene and other occupational (and environmental) health disciplines.

The only authorized Lab Portfolio for the new Cisco Networking Academy CCNA Security Course Gives CCNA Security students a comprehensive, printed and bound lab resource containing all of the course's labs, for use whenever Internet access isn't available Handy printed format lets students easily highlight and make notes Page correlations link to the online curriculum Covers the latest CCNA Security Course, from threats to firewalls, cryptography to VPNs The Cisco CCNA Security curriculum provides foundational network security knowledge, practical experience, opportunities for career exploration, and soft-skills development to help students prepare for careers with network security responsibilities. CCNA Security includes a comprehensive set of hands-on, online laboratories. To complement these, many students and instructors have requested a printed resource that can be used to study in places where Internet access may not be available. CCNA Security Lab Portfolio is that resource. Drawn directly from the online curriculum, it covers every lab presented in this course, addressing all these areas of network security: " Modern network security threats " Securing network devices " Authentication, authorization and accounting " Implementing firewall technologies " Implementing intrusion prevention " Securing LANs " Cryptography " Implementing VPNs " Putting it all together CCNA Security Lab Portfolio gives students new flexibility to study these hands-on labs offline, highlight key points, and take handwritten notes. All topics are correlated directly to online web pages, helping you easily switch between offline and online content. Additional notes pages will be included between each lab for use as a notebook in class. A separate Answer Key is available in the Cisco Academy Connection area of Cisco's web site.

A comprehensive review of analytical signal processing techniques applied to power systems and power quality applications. This reference book is unique in addressing time-varying waveform and harmonic distortions. It details many different approaches, pooling cutting edge material from university lecturers and practising power engineers to provide a wide spectrum of expertise. Divided into clear sections, the book discusses a range of topics including current and voltage variations; standards and measurement issues; advanced techniques such as spectral, time-frequency, probabilistic; and further methods, such as independent component analysis, and fuzzy logic. Case studies, real world data and examples (including basic application examples and sample waves from industrial sites) supplement the theory and demonstrate the methods shown. With extensive appendices in addition, this book is of great value to power systems, utility, maintenance and instrumentation engineers. It is also a useful source of information for researchers and consultants, university professors and graduate students in power systems and power quality areas.

Being Against the World

An Introduction to Art Therapy Research is a pragmatic text that introduces readers to the basics of research design in quantitative and qualitative methodology written in the language of art therapy, with particular attention to the field's unique aspects, current thinking, and exemplars from published art therapy research studies. This combination of a broad, standard approach to research design plus art therapy's particular perspective and major contributions to the subject make the text suitable for courses in introductory research, survey of art therapy history and literature, art therapy assessment, and ethics. The book includes strategies for evaluating research reports and writing for peer-reviewed publication, features that make the text of special value to students, practitioners, doctoral candidates, and academics writing for publication. An online instructor's manual with student resources is available and offers material to enhance the pedagogical features of the text.

The Blind Spy

Doing Business in India. Essential Managers

Although formal barriers to women's social and political participation have crumbled, society remains, to a significant degree, gendered in the roles that women and men play. Women's and men's choices regarding work and family are largely responsible for maintaining and reinforcing the differences. While feminists recognize the need to criticize women's choices, too often they focus on restrictive conditions rather than the choices themselves. Kimberly A. Yuracko argues instead that encouraging women to make choices in accordance with a grounded and well-defined conception of perfectionism—a philosophy concerned with human flourishing—is the most effective way to redress persistent gender inequality. To this end, Yuracko seeks not only to expose the perfectionism underlying current choice critiques, but to articulate a concrete set of feminist perfectionist principles that would improve the quality of individual women's lives and improve the social standing of women as a whole.

Larry Carbone, a veterinarian who is in charge of the lab animal welfare assurance program at a major research university, presents this scholarly history of animal rights. Biomedical researchers, and the less fanatical among the animal rights activists will find this book reasonable, humane, and novel in its perspective. It brings a novel, sociological perspective to an area that has been addressed largely from a philosophical perspective, or from the entrenched positions of highly committed advocates of a particular position in the debate.

In the last decade, gold nanoparticles have provided a suitable platform for the development of novel and efficient diagnostic and therapeutic tools, which avoid the typical drawbacks of the old systems. They are biocompatible and they can be easily synthesised, encapsulated and functionalised with (bio)molecules. Nanoparticles produced by a wet chemistry synthesis have the geometry, which enables the complete control of their optical and physical properties. It is also possible to influence the targeting and stability/release behaviour by coating the nanoparticle surface. In this Update the reader can find in a single volume the methods used most often for the synthesis and coating of gold nanoparticles (spheres, cages, cubes, rods), the links between optical features and geometries of gold nanoparticles, and the novel applications in nanomedicine of gold nanoparticles determined by their geometry. One of the main objectives of this Update is to provide, a readily comprehensible connection in all the chapters between the geometry of gold nanoparticles and their final applications. Another target of this book is to provide information about efficient processes for the synthesis and the coating of gold nanoparticles, all of which have been directly tested by the author. This Update offers comprehensive

information on the whole topic from the synthesis of the gold nanoparticles to their medical applications; this is accompanied by a complete and recent bibliography, in order to give to the readers the opportunity to research further the topics addressed in the book. In this way, students and researchers from academia and industry can have a complete picture of gold nanostructures, physicians and biologists can develop ideas and applications for the new nano-tools, and chemists can have a general guide to the synthesis of gold nanoparticles. This is a state-of-the-art guide for the synthesis and uses of gold nanoparticles.

Rugged Return [Rugged Savage Valley, Colorado 2]

Two childhood friends, one black, one white, whose lives intertwined in segregated East Texas return to Longview when Harley Groves, the man credited with making them the successful men they became, is murdered. They knew Groves, who had lost both feet to the Korean War, as a kind, gentle man who just wanted to share his life with the woman he loved and never raised his voice or a hand to anybody. Except for that one terrible, memorable night in Harley's pool hall called "The Chicken Shack."
