New York Times Bestseller • New York Times Notable Book 2014 • Winner of the Royal Society Winton Prize for Science Books “A thrilling account of the modern material world.” —Wall Street Journal “Miodownik, a materials scientist, explains the history and science behind things such as paper, glass, chocolate, and

concrete with an infectious enthusiasm." —Scientific American Why is glass see-through? What makes elastic stretchy? Why does any material look and behave the way it does? These are the sorts of questions that renowned materials scientist Mark Miodownik constantly asks himself. Miodownik studies objects as ordinary as an envelope and as unexpected as concrete cloth, uncovering the fascinating secrets that hold together our physical world. In *Stuff Matters*, Miodownik explores the materials he encounters in a typical morning, from the steel in his razor to the foam in his sneakers. Full of enthralling tales of the miracles of engineering that permeate our lives, *Stuff Matters* will make you see stuff in a whole new way. "Stuff Matters is about hidden wonders, the astonishing properties of materials we think boring, banal, and unworthy of attention. It's possible this science and these stories have been told elsewhere, but like the best chocolatiers, Miodownik gets the blend right." —New York Times Book Review

Creating the New Egyptian Woman

A Better Way to Think about Business

Domestic tourism is estimated to represent around 5 to 6 billion trips globally. This report provides an in-depth analysis of domestic tourism in 16 Asian countries highlighting its crucial contribution to the socio-economic development of one of the fastest growing tourism regions in the world. The study comprises four major components: a country profile,

case studies, domestic tourism data and detailed recommendations for the development of domestic tourism. With contributions from the academia, public officials and tourism professionals, this study aims to serve as practical guide for a more holistic and sustainable approach to the development of domestic tourism and a useful groundwork for further research into the topic of domestic tourism in Asia and the Pacific and in other regions.

Ecological restoration for protected areas: principles, guidelines and best practices

Introduction to Cyprus Law

Did you know that by failing to negotiate her starting salary for her first job, a woman may sacrifice over a half a million pounds in earnings by the end of her career? Yet, as research reveals, men are four times as likely to ask for higher pay than are women with the same qualifications. In this eye-opening book, Linda Babcock and Sara Laschever draw on research in psychology, sociology, economics and organisational behaviour as well as dozens of interviews to explore the personal and societal reasons why women seldom ask for what they need, want and deserve at work and at home. *Why Women Don't Ask* - a sensation when published in the US in 2003 - is a call to arms that will help you recognise the ways in which our culture perpetuates inequalities - and how you can begin to overcome them.

The Mona Lisa Stratagem

Years after her death, Princess Diana remains a mystery. Was she “the people’s princess,” who electrified the world with her beauty and humanitarian missions? Or was she a manipulative, media-savvy neurotic who nearly brought down the monarchy? Only Tina Brown, former Editor-in-Chief of *Tatler*, England’s glossiest gossip magazine; *Vanity Fair*; and *The New Yorker* could possibly give us the truth. Tina knew Diana personally and has far-reaching insight into the royals and the Queen herself. In *The Diana Chronicles*, you will meet a formidable female cast and understand as never before the society that shaped them: Diana's sexually charged mother, her scheming grandmother, the stepmother she hated but finally came to terms with, and bad-girl Fergie, her sister-in-law, who concealed wounds of her own. Most formidable of them all was her mother-in-law, the Queen, whose admiration Diana sought till the day she died. Add Camilla Parker-Bowles, the ultimate "other woman" into this combustible mix, and it's no wonder that Diana broke out of her royal cage into celebrity culture, where she found her own power and used it to devastating effect.

Transcend

Does the Bible prohibit homosexuality? No, says Bible scholar and activist Jay Michaelson. But not only that: Michaelson also shows that the vast majority of our shared religious traditions support the full equality

and dignity of LGBT people. In this accessible, passionate, and provocative book, Michaelson argues for equality, not despite religion but because of it. From the Hardcover edition.

Forthcoming Books

A study of the cultural practices and paradigms of reading and textual composition among medieval Iberian women readers and writers (specifically Violant of Bar, Leonor López de Córdoba, Constanza de Castilla, Teresa de Cartagena and Isabel de Villena).

Domestic Tourism in Asia and the Pacific

"A toolkit for building a cohesive, innovative and successful group culture, from the New York Times bestselling author of *The Talent Code*. Daniel Coyle spent three years researching the question of what makes a successful group tick, visiting some of the world's most productive groups--including Pixar, Navy

SEALs, Zappos, IDEO, and the San Antonio Spurs. Coyle discovered that high-performing groups relentlessly generate three key messages that enable them to excel: 1) Safety - we are connected. 2) Shared Risk - we are vulnerable together. 3) Purpose - we are part of the same story. Filled with first-hand reporting, fascinating science, compelling real-world stories, and leadership tools that can apply to businesses, schools, sports, families, and any kind of group, *The Culture Code* will revolutionize how you think about creating and sustaining successful groups"--

Prisoners of War in Britain 1756 to 1815

The groundbreaking classic that explores how women can and should negotiate for parity in their workplaces, homes, and beyond When Linda Babcock wanted to know why male graduate students were teaching their own courses while female students were always assigned as assistants, her dean said: "More men ask. The women just don't ask." Drawing on psychology, sociology, economics, and organizational behavior as well as dozens of interviews with men and women in different fields and at all stages in their careers, *Women Don't Ask* explores how our institutions, child-rearing practices, and implicit assumptions discourage women from asking for the opportunities and resources that they have earned and deserve—perpetuating inequalities that are fundamentally unfair and economically unsound. *Women Don't Ask* tells women how to ask, and why they should.

The Princess and the Pea

Strategy and Command

First Conquer Thyself: Socialization of violence and abuse is often highly structured through the Munchausen Complex. Munchausen Syndrome occurs when an individual harms themselves for attention and self-glorification. Munchausen Syndrome by Proxy is when an individual harms another, usually under their care. Attention and self-glorification are achieved through their victim's subsequent medical treatment. Munchausen Syndrome by Proxy is a crime with a victim. Violence and abuse are often common in families, passed down from one generation to the next and may be termed Transgenerational Munchausen Syndrome as these families expand and their habits are introduced into society. Munchausen Syndrome in Collective Transmission occurs when such practices become an acceptable part of society often eventuating into full acculturation. In this way societies attach themselves to self-glorification with various explanations of justification. A Mandated Report is required to be filed by health care, legal, social service and educational professionals who suspect child abuse, as well as developers of film. As socialized beings, we are often unaware why we think what we think and why we do what we do. Exploring beneath the surface, we may discover we are not who we imagine we are. Are our subtle perversions and aberrations so different from those of the ancients, or other cultures we label primitive? The author was

under military orders not to discuss the subjects presented in this part's Mandated Report on child abuse to the social body for the last six years of his U.S. Navy career. Censorship is strong when one questions social norms, folkways and rituals that address issues of identity. Internal, interpersonal and professional conflicts arise.

The Far West Coast

Master's Thesis from the year 2011 in the subject Politics - Methods, Research, grade: A+, , course: International Cooperation Policy, language: English, abstract: Undoubtedly, the mangroves and associated wildlife show signs of degradation in every region of the world. The historical data proves that in 10 regions there is a continuous mangrove lost since 1980 to 2005. The research destination, the Philippines has lost its mangrove cover severely. The government involvements, necessary law enforcement, political will proper leadership, community involvement, alternative livelihoods, education campaign, and involvement of all local and national organization and willingness of local communities are needed to change this trend of degradation of mangroves around the world. There is an example in the City of Puerto Princesa in Palawan, Philippines that combined all the ingredients to a continuously performing sustainable environmental development project. This mangrove plantation project is known as "Love Affair with Nature". This project is being held annually since 2003 and 58.5 hectares has been rehabilitated in Puerto Princesa.

Access Free Princessa Beauty Case Analysis

This project is very attractive with its mass wedding ceremony and celebrations. Averagely, about 150 couples get marry with the support of the local mayor under one condition of planting a mangrove tree together. The performances rely upon the integrated environmental projects conducted in the Puerto Princesa city. The planting mangrove project on every Valentine's Day is not a standalone program. There are varieties of other community based mangrove and tree planting projects conducted regularly. Every citizen of the Puerto Princesa is a part of the pride of being environmentally sound citizens. In this study, the author has proven that Puerto Princesa City in Palawan has gained its forest cover and mangrove forest during the past two decades. The qualitative findings among interviewing local community at various stages have proven that every citizen in Puerto Princesa is aware of the importance of mangroves and they believe that the mangrove forest in Puerto Princesa is growing. The available national statistics also prove that in Puerto Princesa City and in the whole Palawan Province, both mangrove and forest cover is increasing. A unique methodology was used in this study and photography was used to document many of the qualitative findings. Also, the author has originally developed a framework of success for "Love Affair with Nature" Mangrove Plantation project and which can be adopted in various parts of the Philippines.

Women Don't Ask

Bedtime Classics: charmingly illustrated board book

editions of perennial favorites, simplified for the youngest readers! Bedtime Classics introduce classic works of fiction to little literary scholars through character-driven narratives and colorful illustrations. Designed to be the perfect one-minute bedtime story (or five minutes--if you're begged to read it over and over), parents can feel good about exposing their children to some of the most iconic pieces of literature while building their child's bookshelf with these trendy editions! A King and Queen invite all the princesses in the land to their palace to find a proper suitor for their son, the prince. But when an unconventional princess stumbles through the castle gates, she's put to the ultimate test. By setting a pea under a large stack of mattresses, the royal family will discover if the girl is "princess material" once and for all.

Secrets of Pinar's Game (2 vols)

An absorbing chronicle of a much overlooked chapter in Jacqueline Kennedy Onassis's life—her nineteen-year editorial career History remembers Jacqueline Kennedy Onassis as the consummate first lady, the nation's tragic widow, the millionaire's wife, and, of course, the quintessential embodiment of elegance. Her biographers, however, skip over an equally important stage in her life: her nearly twenty year long career as a book editor. Jackie as Editor is the first book to focus exclusively on this remarkable woman's editorial career. At the age of forty-six, one of the most famous women in the world went to work for the first time in twenty-two years. Greg Lawrence,

who had three of his books edited by Jackie, draws from interviews with more than 125 of her former collaborators and acquaintances in the publishing world to examine one of the twentieth century's most enduring subjects of fascination through a new angle: her previously untouted skill in the career she chose. Over the last third of her life, Jackie would master a new industry, weather a very public professional scandal, and shepherd more than a hundred books through the increasingly corporate halls of Viking and Doubleday, publishing authors as diverse as Diana Vreeland, Louis Auchincloss, George Plimpton, Bill Moyers, Dorothy West, Naguib Mahfouz, and even Michael Jackson. Jackie as Editor gives intimate new insights into the life of a complex and enigmatic woman who found fulfillment through her creative career during book publishing's legendary Golden Age, and, away from the public eye, quietly defined life on her own terms.

Why Love Hurts

The life of William Carey

In the bestselling tradition of *Stuff Matters* and *The Disappearing Spoon*: a clever and engaging look at materials, the innovations they made possible, and how these technologies changed us. In *The Alchemy of Us*, scientist and science writer Ainissa Ramirez examines eight inventions—clocks, steel rails, copper communication cables, photographic film, light bulbs, hard disks, scientific labware, and silicon chips—and

reveals how they shaped the human experience. Ramirez tells the stories of the woman who sold time, the inventor who inspired Edison, and the hotheaded undertaker whose invention pointed the way to the computer. She describes, among other things, how our pursuit of precision in timepieces changed how we sleep; how the railroad helped commercialize Christmas; how the necessary brevity of the telegram influenced Hemingway's writing style; and how a young chemist exposed the use of Polaroid's cameras to create passbooks to track black citizens in apartheid South Africa. These fascinating and inspiring stories offer new perspectives on our relationships with technologies. Ramirez shows not only how materials were shaped by inventors but also how those materials shaped culture, chronicling each invention and its consequences—intended and unintended. Filling in the gaps left by other books about technology, Ramirez showcases little-known inventors—particularly people of color and women—who had a significant impact but whose accomplishments have been hidden by mythmaking, bias, and convention. Doing so, she shows us the power of telling inclusive stories about technology. She also shows that innovation is universal—whether it's splicing beats with two turntables and a microphone or splicing genes with two test tubes and CRISPR.

Soloing

Johan Reinhard's discovery of the 500-year-old frozen body of an Inca girl made international headlines in 1995, reaching more than a billion people worldwide. One of the best-preserved mummies ever found, it was a stunning and significant time capsule, the spectacular climax to an Andean quest that yielded no fewer than ten ancient human sacrifices as well as the richest collection of Inca artifacts in archaeological history. Here is the paperback edition of his first-person account, which The Washington Post called "incredible...compelling and often astonishing" and The Wall Street Journal described as "... part adventure story, part detective story, and part memoir—an engaging look at a rarefied world." It's a riveting combination of mountaineering adventure, archaeological triumph, academic intrigue, and scientific breakthrough which has produced important results ranging from the best-preserved DNA of its age to the first complete set of an Inca noblewoman's clothing. At once a vivid personal story, a treasure trove of new insights on the lives and culture of the Inca, and a fascinating glimpse of

cutting-edge research in fields as varied as biology, botany, pathology, ornithology and history, The Ice Maiden is as spellbinding and unforgettable as the long-dead but still vital young woman at its heart.

The Courage Habit

Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a

fundamental transformation in the ecology and architecture of romantic choice. The samples from which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

The National Live-stock Journal

Helping

When positive psychologist Scott Barry Kaufman first discovered Maslow's unfinished theory of transcendence, sprinkled throughout a cache of unpublished journals, he felt a deep resonance with his own work and life. In this groundbreaking book, Kaufman picks up where Maslow left off, unraveling the mysteries of his unfinished theory, and integrating these ideas with the latest research on attachment, connection, exploration, love, purpose and other building blocks of a life well lived. Maslow's model provides a roadmap for finding purpose and fulfillment--not by striving for money, success, or "happiness," but by becoming the best version of ourselves, or what Maslow called self-actualization.

Transcend reveals a level of human potential that's even higher, which Maslow termed "transcendence." Beyond individual fulfillment, this way of being--which taps into the whole person-- connects us not only to our best self, but also to one another. With never-before-published insights and new research findings, along with thought-provoking examples and personality tests, this empowering book is a manual for self-analysis and nurturing a deeper connection with our highest potential-- and beyond.

Jackie as Editor

By the bestselling author of *Career Anchors* (over 431,000 copies sold) and *Organizational Culture and Leadership* (over 153,000 sold) • A penetrating analysis of the psychological and social dynamics of helping relationships • Named one of the best leadership books of 2009 by *strategy+business* magazine *Helping* is a fundamental human activity, but it can also be a frustrating one. All too often, to our bewilderment, our sincere offers of help are resented, resisted, or refused—and we often react the same way when people try to help us. Why is it so difficult to provide or accept help? How can we make the whole process easier? Many different words are used for helping: assisting, aiding, advising, caregiving, coaching, consulting, counseling, guiding, mentoring, supporting, teaching, and many more. In this seminal book on the topic, corporate culture and organizational development guru Ed Schein analyzes the social and psychological dynamics common to all types of helping relationships, explains why help is

often not helpful, and shows what any would-be helpers must do to ensure that their assistance is both welcomed and genuinely useful. The moment of asking for and offering help is a delicate and complex one, fraught with inequities and ambiguities. Schein helps us navigate that moment so we avoid potential pitfalls, mitigate power imbalances, and establish a solid foundation of trust. He identifies three roles a helper can play, explaining which one is nearly always the best starting point if we are to provide truly effective help. So that readers can determine exactly what kind of help is needed, he describes an inquiry process that puts the helper and the client on an equal footing, encouraging the client to open up and engage and giving the helper much better information to work with. And he shows how these techniques can be applied to teamwork and to organizational leadership. Illustrated with examples from many types of relationships—husbands and wives, doctors and patients, consultants and clients—Helping is a concise, definitive analysis of what it takes to establish successful, mutually satisfying helping relationships.

Why Women Don't Ask

Around the time a woman reaches 45, there is one enemy with the power to threaten her confidence, steal her beauty, make her feel invisible, and turn even the pleasures of life against her. That enemy is Time. Most women feel that an essential part of them dies when their youth is gone, yet the reality is women can grow more beautiful, experience new

pleasures, and accomplish their best work later in life. Now, taking inspiration from a masterpiece of female beauty, mystery, and immortality, Leonardo Da Vinci's Mona Lisa, Harriet Rubin reveals a powerful stratagem for finding happiness and fulfillment in midlife and beyond. Interweaving stories of iconic women throughout history, Rubin codifies ten tactics--including how to be noticed, how to create circles of influence with you at the center, and how to express talents that have been ripening over decades. In the process, she uncovers the key to mature power, the highest art of leadership.

Military law review

What kind of life would you live if you didn't allow your fears to hold you back? The Courage Habit offers a powerful program to help you conquer your inner critic, work toward your highest aspirations, and build a courageous community. Are your fears preventing you from living the life you truly want? Do you ever wish that you had a better job, lived in a different city, or had more authentic and nurturing relationships? Many people believe that they would do more, accomplish more, and feel more fulfilled if only they could rid themselves of that fearful inner voice that constantly whispers, "you can't do it." In The Courage Habit, certified life coach Kate Swoboda offers a unique program based in cognitive behavioral therapy (CBT) and acceptance and commitment therapy (ACT) to help you act courageously in spite of fear. By identifying your fear triggers, releasing yourself from your past experiences, and acting on what you truly

value, you can make courage a daily habit. Using a practical four-part program, you'll learn to understand the emotions that arise when fears are triggered, and to pause and evaluate your emotional state before you act. You'll discover how to listen without attachment to the self-defeating messages of your inner critic, understand the critic's function, and implement respectful boundaries so that your inner voice no longer controls your behavior. You'll reframe self-limiting life narratives that can—without conscious awareness—dictate your day-to-day decisions. And finally, you'll nurture more authentic connections with family, friends, and community in order to find support and reinforce the life changes you're making. If you feel like something is holding you back from landing your dream job, moving to a new city, having a satisfying love relationship, or simply taking advantage of all life has to offer—and if you have a sneaking suspicion that that something is you—then this one-of-a-kind guide will show you how to finally break free from self-doubt and start living your best life.

I Love You, Nice to Meet You

Ice Maiden

Access Free Princessa Beauty Case Analysis

Soloing has two meanings: "going it alone" and being "complete in yourself." . . . But you don't just leave--a company/a career/a paycheck--and cross over to a more satisfying life. There's more to it. There is a mysterious passage to be negotiated, a delicate transition required to go from alone-in-the-desert to complete-in-yourself. Harriet Rubin, bestselling author of *The Princessa: Machiavelli for Women*, returns with inspiring advice for professionals dreaming of crossing over from a corporate world of prescribed boundaries to the limitless opportunities of soloing. She describes how people can do great things--things they would never be able to accomplish inside the corporate structure--when they manage or lead no one. As one successfully navigates the passage toward a truer sense of self that Rubin describes, four invaluable freedoms await: The first freedom is regaining your sense of identity. Walk out of any big company and who are you, stripped of that mighty identity? Potentially bigger and better than before. Who were you before the corporate you? To get back one's sense of self is why people go solo. The second freedom is independence. Why is working alone so important in doing great work, given that it's also the scariest part? Imagine having complete command and control over your time and the work you do. This is how soloists realize their great strengths: They are reduced to themselves. The third freedom is income. You can earn in one year what you earned in two before. Do you work harder to do this? Yes. Do you enjoy it more? Yes. Solo money is alive. Unlike a salary doled out like an allowance from parents, the money earned by soloing is a true emblem of a person's worth. The fourth freedom is illumination. A

Access Free Princessa Beauty Case Analysis

professional builds a career, but a soloist builds a portfolio and a life free of boredom, full of challenge. Direct contact with work itself is direct contact with life. With insights as diverse as Henry David Thoreau's "I want to be sure the world doesn't change," and Michael Jordan's response to the statement: "There's no 'I' in team,"--"That's right, but there is an 'I' in win,"--Rubin gives readers the chance to bring their dreams into alignment with reality.

Stuff Matters

When a division one coach comes to their smaller school to bring the football program up to contender status, Moose and the rest of the players on the team are pumped. Coach Barnes has new ideas and a vision for the future, nothing is too good for his players. With a new training regimen, everything seems to be on a winning track. But when Moose and others are offered steroids, tempers start to fray and the teammates have to decide whose side they are on.

Norton's Literary Gazette and Publishers' Circular

The Diana Chronicles

A "New Woman" was announced in Egypt at the turn of the nineteenth century. With a new genre of prescriptive literature, new products, a new education, and a physically changed home, she

increasingly emerged in public life. This book discusses and debates the place of Egyptian women, while focusing on consumerism and education. Russell sheds much-needed light on the struggle for identity in Egypt at a time of considerable flux and tension and provides a powerful angle to explore changing concepts of social dynamics and broader debates of what it meant to be "modern" while retaining local authenticity.

Messengers

"In the age of fake news, understanding who we trust and why is essential in explaining everything from leadership to power to our daily relationships." -Sinan Aral We live in a world where proven facts and verifiable data are freely and widely available. Why, then, are self-confident ignoramus so often believed over thoughtful experts? And why do seemingly irrelevant details such as a person's appearance or financial status influence whether or not we trust what they are saying, regardless of their wisdom or foolishness? Stephen Martin and Joseph Marks compellingly explain how in our uncertain and ambiguous world, the messenger is increasingly the message. We frequently fail, they argue, to separate the idea being communicated from the person conveying it, explaining why the status or connectedness of the messenger has become more important than the message itself. Messengers influence business, politics, local communities, and our broader society. And Martin and Marks reveal the forces behind the most infuriating phenomena of our

modern era, such as belief in fake news and how presidents can hawk misinformation and flagrant lies yet remain.

The Culture Code

God vs. Gay?

For the United States, full involvement in World War II began and ended in the Pacific Ocean. Although the accepted grand strategy of the war was the defeat of Germany first, the sweep of Japanese victory in the weeks and months after Pearl Harbor impelled the United States to move as rapidly as it could to stem the enemy tide of conquest in the Pacific. Shocked as they were by the initial attack, the American people were also united in their determination to defeat Japan, and the Pacific war became peculiarly their own affair. In this great theater it was the United States that ran the war, and had the determining voice in answering questions of strategy and command as they arose. The natural environment made the prosecution of war in the Pacific of necessity an interservice effort, and any real account of it must, as this work does, take into full account the views and actions of the Navy as well as those of the Army and its Air Forces. These are the factors—a predominantly American theater of war covering nearly one-third the globe, and a joint conduct of war by land, sea, and air on the largest scale in American history—that make this volume on the Pacific war of particular significance today. It is the capstone of the

eleven volumes published or being published in the Army's World War II series that deal with military operations in the Pacific area, and it is one that should command wide attention from the thoughtful public as well as the military reader in these days of global tension.
